

Highlights

Primary investment objective is long-term growth of capital by investing in a select number of high quality businesses. Current income is a secondary consideration.

- **Invests primarily in small and medium-sized public companies presenting:** Market leaders, a history of profitability, balance sheets with little to no leverage, high-quality management teams, and discounted – at least 3 to 1 upside to downside ratio.
- **A focus on absolute value.**
- **Low turnover, long-term focused (average holding period of seven plus years).**
- **Concentrated portfolios, not benchmark emulative (typically 20-40 holdings).**
- **Powered by fundamental analysis and a bottom-up investment process.**

² The chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since 8/1/1984. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable redemption fees, which would lower these figures. An investor cannot invest in an index. This chart is not intended to imply any future performance of the Fund. Past performance is not a guarantee of future results.

³ Inception for FPA Management was July 11, 1984. A benchmark comparison is not available based on the Fund's inception date therefore a comparison using August 1, 1984 is used.

⁴ Periods over one year are annualized.

⁵ Market Cycle Performance reflects three most recent cycles (peak to peak) defined as a period that contains a decline of at least 20% from the previous market peak over at least a two-month period and a rebound to establish a new peak above the previous one by Russell 2500 Index.

Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. This data represents past performance and investors should understand that investment returns and principal values fluctuate, so that when you redeem your investment it may be worth more or less than its original cost. The Fund's expense ratio as of its most recent prospectus is 0.80%. Current month-end performance data may be obtained by calling toll-free, 1-800-982-4372.

You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. The Prospectus details the Fund's objective and policies, charges, and other matters of interest to the prospective investor. Please read this Prospectus carefully before investing. The Prospectus may be obtained by visiting the website at www.fpa.com, by email at crm@fpa.com, toll-free by calling 1-800-982-4372 or by contacting the Fund in writing.

Fund Risks

Investments in mutual funds carry risks and investors may lose principal value. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Fund may purchase foreign securities, including American Depositary Receipts (ADRs) and other depository receipts, which are subject to interest rate, currency exchange rate, economic and political risks; this may be enhanced when investing in emerging markets. Small and mid cap stocks involve greater risks and they can fluctuate in price more than larger company stocks. Groups of stocks, such as value and growth, go in and out of favor which may cause certain funds to underperform other equity funds.

The Russell 2500 Index consists of the 2,500 stocks that cover the small and mid-cap market capitalizations. The Russell 2500 is a market cap weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of United States-based listed equities.

The FPA Funds are distributed by UMB Distribution Services, LLC, 235 W. Galena Street, Milwaukee, WI 53212.

⁶ Active Share is defined as "the percentage of the Fund's portfolio that differs from the Fund's benchmark index".

⁷ Excludes undisclosed holdings.

⁸ 12-Month Trailing is calculated using weighted harmonic averaging, which helps avoid extreme results that may occur due to small relative numbers.

⁹ Price/Book ratio is the market price of a stock divided by the book value per share.

¹⁰ Return on Equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

¹¹ Debt/Capital is the measure of a company's financial leverage calculated by dividing its total liabilities by its total capital.
