

## Highlights

Primary investment objective is long-term growth of capital. Current income is a secondary consideration.

- Invests primarily in small and medium-sized public companies representing: Market leaders, a history of profitability, balance sheets with little to no leverage, strong management teams, and discounted.
- A focus on absolute value.
- Low turnover, long-term focused.
- Concentrated portfolios, not benchmark emulative (typically 20-40 holdings).
- Powered by fundamental analysis and a bottom-up investment process.

<sup>2</sup> The chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund since 8/1/1984. Fund returns shown assume reinvestment of distributions and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares, which would lower these figures. This chart is not intended to imply any future performance of the Fund.

<sup>3</sup> Fund inception date was July 11, 1984. An index comparison is not available based on the Fund's inception date therefore a comparison using August 1, 1984 is used for both the Fund and the Index.

<sup>4</sup> Periods over one year are annualized. Fund performance is net of all fees and expenses and includes the reinvestment of distributions. Fund returns shown assume reinvestment of distributions and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares, which would lower these figures. Comparison to any index is for illustrative purposes only. An investor cannot invest directly in an index. The Fund does not include outperformance of any index or benchmark in its investment objectives.

<sup>5</sup> Market Cycle Performance reflects three most recent cycles (peak to peak) defined as a period that contains a decline of at least 20% from the previous market peak over at least a two-month period and a rebound to establish a new peak above the previous one by the Russell 2500 Index.

Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. This data represents past performance and investors should understand that investment returns and principal values fluctuate, so that when you redeem your investment it may be worth more or less than its original cost. The Fund's expense ratio as of its most recent prospectus is 0.89%. Current month-end performance data, which may be lower or higher than the performance data quoted, may be obtained by calling toll-free, 1-800-982-4372.

You should consider the Fund's investment objectives, risks, and charges and expenses carefully before you invest. The Prospectus details the Fund's objective and policies, charges, and other matters of interest to a prospective investor. Please read the Prospectus carefully before investing. The Prospectus may be obtained by visiting the website at [www.fpa.com](http://www.fpa.com), by email at [crm@fpa.com](mailto:crm@fpa.com), toll-free by calling 1-800-982-4372 or by contacting the Fund in writing.

The Net Asset Value (NAV) is the market value of one share of the Fund. The NAV is calculated by subtracting the Fund's liabilities from the value of the Fund's total assets and dividing by the number of the Fund's outstanding shares.

\* As of July 29, 2020, portfolio management responsibilities for the Fund transitioned to Mr. Kaplan. For more information, please see the press release dated July 30, 2020 at [www.fpa.com](http://www.fpa.com).

## Fund Risks

Investments, including investments in mutual funds, carry risks and investors may lose principal value. Capital markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Fund may purchase foreign securities, including American Depositary Receipts (ADRs) and other depository receipts, which are subject to interest rate, currency exchange rate, economic and political risks; this may be enhanced when investing in emerging markets. Foreign investments, especially those of companies in emerging markets, can be riskier, less liquid, harder to value, and more volatile than investments in the United States. Adverse political and economic developments or changes in the value of foreign currency can make it more difficult for the Fund to value the securities. Differences in tax and accounting standards, difficulties in obtaining information about foreign companies, restrictions on receiving investment proceeds from a foreign country, confiscatory foreign tax laws, and potential difficulties in enforcing contractual obligations, can all add to the risk and volatility of foreign investments. Small and mid cap stocks involve greater risks and they can fluctuate in price more than larger company stocks. Groups of stocks, such as value and growth, go in and out of favor which may cause certain funds to underperform other equity funds. Value style investing presents the risk that the holdings or securities may never reach their full market value because the market fails to recognize what the portfolio management team considers the true business value or because the portfolio management team has misjudged those values. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods. The Fund is more concentrated because it holds fewer securities. Holding fewer securities increases the risk that the value of the Fund could go down because of the poor performance of a single investment. Please refer to the Fund's Prospectus for a complete overview of the primary risks associated with the Fund.

The Russell 2500 Index consists of the 2,500 stocks that cover the small and mid-cap market capitalizations. The Russell 2500 is a market cap weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of United States-based listed equities. An investor cannot invest directly in an index. Comparison to the Russell 2500 Index is for illustrative purposes only. Index returns do not reflect transactions costs, investment management fees or other commissions, fees and expenses that would reduce performance for an investor. The Fund does not include outperformance of any index or benchmark in its investment objectives.

Portfolio composition will change due to ongoing management of the Fund. References to individual securities are for informational purposes only and should not be construed as recommendations by the Fund, the portfolio manager, the Adviser, or the distributor. It should not be assumed that future investments will be profitable or will equal the performance of the security examples discussed. The portfolio holdings as of the most recent quarter-end may be obtained at [www.fpa.com](http://www.fpa.com).

The FPA Funds are distributed by UMB Distribution Services, LLC. 235 W. Galena Street, Milwaukee, WI 53212.

<sup>6</sup> Active Share is defined as the percentage of the Fund's portfolio that differs from the Fund's illustrative index.

<sup>7</sup> Excludes undisclosed holdings.

<sup>8</sup> 12-Month Trailing Price to Earnings (P/E) is calculated using weighted harmonic averaging, which helps avoid extreme results that may occur due to small relative numbers.

<sup>9</sup> Price/Book ratio is the market price of a stock divided by the book value per share.

<sup>10</sup> Return on Equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.
