

FPA Crescent Fund – Institutional Class (FPACX)

PROSPECTUS

FPA Crescent Fund seeks to generate equity-like returns over the long-term, take less risk than the market and avoid permanent impairment of capital. The Fund's portfolio managers employ a strategy of selectively investing across a company's capital structure in a combination of equity and debt securities that they believe have the potential to increase in market value, seeking to achieve rates of return with less risk than the broad U.S. equity indices.

THE SECURITIES AND EXCHANGE COMMISSION HAS NOT APPROVED OR DISAPPROVED THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

FUND SUMMARY

Investment Objective

The Fund seeks to generate equity-like returns over the long-term, take less risk than the market and avoid permanent impairment of capital.

Fees and Expenses of the Institutional Class

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund's Institutional Class. The table and example below do not reflect commissions that a shareholder may be required to pay directly to a broker or other financial intermediary when buying or selling shares of this class.

Shareholder Fees (fees paid directly from your investment)

Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None
Maximum Deferred Sales Charge (Load)(as a percentage of original sales price or redemption proceeds, as applicable)	None
Exchange Fee	None

Annual Operating Expenses of the Institutional Class of Shares (expenses that you pay each year as a percentage of the value of your investment in this class)

Management Fees ⁽¹⁾	1.00%
Distribution (12b-1) Fees	None
Other Expenses Before Short Sale Dividend and Interest Expenses	<u>0.08%</u>
Total Annual Fund Operating Expenses Before Short Sale Dividend and Interest Expenses	1.08%
Short Sale Dividend and Interest Expenses	0.09%
Expense Reimbursement ⁽²⁾	<u>(0.03)%</u>
Total Annual Fund Operating Expenses After Short Sale Dividend and Interest Expenses and Expense Reimbursement	1.14%

(1) The Management fees include both the advisory fee of 0.93% and class-specific administrative service fee of 0.07%. For additional information about the administrative service fee please see the section titled "Management of the Fund."

(2) First Pacific Advisors, LP (the "Adviser" or "FPA"), the Fund's investment adviser, has contractually agreed to reimburse the Fund for operating expenses in excess of 0.05% of the average net assets of the Fund, excluding management fees, administrative service fees, short sale dividend expenses and interest expenses on cash deposits relating to short sales, brokerage fees and commissions, redemption liquidity service expenses, interest, taxes, fees and expenses of other funds in which the Fund invests, and extraordinary expenses, including litigation expenses not incurred in the Fund's ordinary course of business, through April 30, 2023. The Adviser has also contractually agreed to reimburse the Fund for redemption liquidity service expenses in excess of 0.0044% of the average net assets of the Fund through April 30, 2023. These agreements may only be terminated earlier by the Fund's Board of Trustees (the "Board") or upon termination of the Advisory Agreement.

Example. This Example is intended to help you compare the cost of investing in the Institutional Class of the Fund with the cost of investing in other mutual funds. The Example assumes you invest \$10,000 in the Institutional Class for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The one-year figure is based on total annual Fund operating expenses after expense reimbursement. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

One Year	Three Years	Five Years	Ten Years
\$116	\$369	\$641	\$1,418

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 20% of the average value of its portfolio. The Fund’s portfolio turnover rate may vary from year to year as well as within a year.

Principal Investment Strategies

To pursue the Fund’s investment objective, the Fund’s portfolio managers (“portfolio managers”) invest in both equity and debt securities of companies. The Fund’s portfolio managers believe that this combination of securities broadens the universe of opportunities for the Fund, offers additional diversification and helps to lower volatility. The portfolio managers invest primarily in equity securities and the balance of the Fund’s portfolio in debt securities, cash and cash equivalents. The Fund has no limit on the amount of assets it may invest in non-U.S. securities. The decision to invest in a non-U.S. security will be based on the portfolio managers’ fundamental security analysis. In addition, the Fund may sell securities short, and the portfolio managers may employ a short selling strategy for a portion of the Fund.

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in an issuer. Different types of equity securities provide different voting and dividend rights and priority in case of the bankruptcy of the issuer. The Fund may invest in a variety of equity securities, including common stocks, preferred stocks, convertible securities, rights and warrants.

The portfolio managers look for large and small companies that it believes to have excellent future prospects that are undervalued by the securities markets. The portfolio managers believe that these opportunities often arise when companies are out-of-favor or undiscovered by most of Wall Street. The portfolio managers also search for companies that offer earnings growth, opportunity for price/earnings multiple expansion and the best combination of such quality criteria as strong market share, good management, high barriers to entry and high return on capital.

Using fundamental security analysis, the portfolio managers may look for investments that trade at a substantial discount to the portfolio managers’ determination of the company’s value (absolute value) rather than those that might appear inexpensive based on a discount to their peer groups or

the market average (relative value). The portfolio managers attempt to determine a company's absolute value using fundamental security analysis, which they believe generally provides them with a thorough view of a company's financial and business characteristics. As a part of their process, the portfolio managers may:

- Review stock prices or industry group under-performance, insider purchases, management changes and corporate spin-offs.
- Communicate directly with company management, suppliers, and customers.
- Use their judgment to define the company's future potential, financial strength and competitive position.

The portfolio managers generally seek to sell an equity investment when they believe that the company's value has been fully reflected in a higher valuation by the market or when a negative fundamental development occurs in the company or its industry that the portfolio managers believe could significantly impact future earnings growth.

A debt security is an interest-bearing security that companies or governments use to borrow money from investors. The issuer of a debt security promises to pay interest at a stated rate, which may be variable or fixed, and to repay the amount borrowed at maturity (the date when the debt security is due and payable). The Fund may invest in debt securities issued by companies, the U.S. government and its agencies; mortgage-backed and asset-backed securities (*i.e.* securities that are backed by pools of loans or mortgages assembled for sale to investors); municipal notes and bonds; and commercial paper and certificates of deposit.

The portfolio managers invest in debt securities seeking to provide the Fund with a reliable and recurring stream of income, while seeking to preserve its capital. The Fund may also invest in debt securities rated below investment grade ("high yield bonds" or "junk bonds"). The Fund has the ability to invest up to 65% of its total assets in debt securities, although it will generally invest a greater percentage of its portfolio in equity securities than debt securities.

The portfolio managers select debt securities by using an approach that is similar to the approach they use to select equity securities and by trying to forecast current interest rate trends. The portfolio managers generally employ a defensive interest rate strategy, which means they seek to keep the average maturity of the debt-securities portion of the Fund to 10 years or less, by investing at different points along the yield curve. The portfolio managers also continually consider yield spreads and other underlying factors such as credit quality, investor perception and liquidity to determine which sectors offer the best investment value at any given time.

The portfolio managers may engage in a strategy known as selling short. Selling a security short is when the Fund sells a security it does not own. To sell a security short, the Fund must borrow the security from someone else to deliver to the buyer. The Fund then replaces the security it borrowed by purchasing it at the market price at or before the time of replacement. Until it replaces the security, the Fund repays the person that lent it the security for any interest or dividends that may

have accrued during the period of the loan. The Fund typically sells securities short to take advantage of an anticipated decline in prices or to protect a profit in a security it already owns.

Principal Risks

Risks Associated with Investing in Equities. Equity securities, generally common stocks and/or depositary receipts, held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect the securities markets generally, such as adverse changes in economic or political conditions, the general outlook for corporate earnings, interest rates or investor sentiment. Sustained periods of market volatility, either globally or in any jurisdiction in which the Fund invests, may increase the risks associated with an investment in the Fund. Equity securities may also lose value because of factors affecting an entire industry or sector, such as increases in production costs, or factors directly related to a specific company, such as decisions made by its management. Equity securities generally have greater price volatility than debt securities. The Fund's shares are not bank deposits and are not guaranteed, endorsed or insured by any financial institution, government authority or the FDIC.

Interest Rate Risk. As with most funds that invest in debt securities, changes in interest rates are one of the most important factors that could affect the value of an investment in the Fund. Interest rate risk is the risk that debt securities will decline in value because of increases in interest rates. If interest rates were to rise from a low level, fixed income securities markets may experience lower prices, increased volatility and lower liquidity. The negative impact on fixed income securities from rate increases, regardless of the cause, could be swift and significant, which could result in significant losses by the Fund, even if such rate increases are anticipated by the portfolio managers.

Credit Risk. Credit risk refers to the likelihood that an issuer will default on the payment of principal and/or interest on a security. Various factors could affect the issuer's actual or perceived willingness or ability to make timely interest or principal payments, including changes in the issuer's financial condition or in general economic conditions. High yield bonds, commonly referred to as "junk" bonds, are highly speculative securities that are usually issued by smaller, less credit-worthy and/or highly leveraged (indebted) companies. Compared with investment-grade bonds, high yield bonds carry a greater degree of risk and are less likely to make payments of interest and principal. Market developments and the financial and business conditions of the corporation issuing these securities influence their price and liquidity more than changes in interest rates, when compared to investment-grade debt securities. Insufficient liquidity in the high yield bond market may make it more difficult to dispose of high yield bonds and may cause the Fund to experience sudden and substantial price declines. A lack of reliable, objective data or market quotations may make it more difficult to value high yield bonds accurately. There is no limit on the ratings of high yield securities that may be purchased or held by the Fund, and the Fund may invest in securities that are in default.

Call Risk. Issuers of callable bonds are permitted to redeem these bonds before their final maturity. If an issuer calls a security in which the Fund is invested, the Fund could lose potential price appreciation and be forced to reinvest the proceeds in securities that bear a lower interest rate or more credit risk.

Market Risk. The market price of investments owned by the Fund may go up or down, sometimes rapidly or unpredictably. Fund investments may decline in value due to factors affecting the overall markets, or particular industries or sectors. The value of a holding may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for an issuer's financial condition, national or international political events, war, acts of terrorism, public health emergencies, such as the spread of infectious illness or disease, natural disasters, changes in interest or currency rates, inflation, domestic or international monetary policy or adverse investor sentiment generally. The value of a holding may also decline due to factors that affect a particular industry or industries, such as competitive conditions within an industry or government regulations. The Fund may experience heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of an investment in the Fund to unexpectedly decline. Shareholder redemptions may also cause the Fund to engage in "odd-lot" fixed income transactions, which due to their small size, may result in the Fund receiving substantially lower value on such transactions than if the Fund had engaged in a large block trade of such securities. In addition, the Fund may rely on various third-party sources to calculate its net asset value. Errors or systems failures and other technological issues may adversely impact the Fund's calculation of its net asset value, and such net asset value calculation issues may result in inaccurately calculated net asset values, delays in net asset value calculation and/or the inability to calculate net asset values over extended periods. The Fund may be unable to recover any losses associated with such failures.

Risks Associated with Investing in Smaller-Cap and Mid-Cap Companies. The prices of securities of mid-cap and smaller-cap companies tend to fluctuate more widely than those of larger, more established companies. Mid-cap and smaller-cap companies may have limited product lines, markets or financial resources or may depend on the expertise of a few people and may be subject to more abrupt or erratic market movements than securities of larger, more established companies or market averages in general. In addition, these companies often have shorter operating histories and are more reliant on key products or personnel than larger companies. The securities of smaller- or medium-sized companies are often traded over-the-counter, and may not be traded in volumes typical of securities traded on a national securities exchange. Securities of such issuers may lack sufficient market liquidity to effect sales at an advantageous time or without a substantial drop in price.

Risks Associated with Investing in Non-U.S. Securities. Non-U.S. investments (including depositary receipts) can be riskier, more volatile and less liquid than investments in the United States. Adverse political, social and economic developments or instability, or changes in the value of non-U.S. currency can make it more difficult for the Fund to sell its securities and could reduce the value of the Fund's shares. Differences in regulatory, tax and accounting standards and differences in reporting standards may cause difficulties in obtaining information about non-U.S. companies and may negatively affect investment decisions. Investments in non-U.S. securities may be affected by restrictions on receiving investment proceeds from outside the U.S., confiscatory tax laws, and potential difficulties in enforcing contractual obligations. Transactions may be subject to less efficient settlement practices, including extended clearance and settlement periods. In addition, global economies are increasingly interconnected, which increases the possibility that conditions in one country, region or financial market might adversely impact a different country, region or financial market.

Risks Associated with Investing in Emerging Markets. Investing in emerging markets may magnify the risks of investing in non-U.S. markets. Security prices in emerging markets can be significantly more volatile than those in more developed markets, reflecting the greater uncertainties of investing in less established markets and economies. In particular, countries with emerging markets may:

- Have relatively unstable governments;
- Present greater risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets;
- Have government exchange controls, currencies with no recognizable market value relative to the established currencies of developed market economies, little or no experience in trading in securities, no financial reporting standards, or a lack of a banking and securities infrastructure to handle such trading;
- Offer less protection of property rights than more developed countries;
- Have economies that are based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates; and
- Not have developed structures governing private or foreign investment or allowing for judicial redress for investment losses or injury to private property, which may limit legal rights and remedies available to the Fund and the ability of U.S. authorities (*e.g.*, the SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.

Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times.

Risks Associated with Short Selling. The Fund can lose money if the price of the security it sold short increases between the date of the short sale and the date on which the Fund replaces the borrowed security. These losses are theoretically unlimited. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The Fund will incur transaction costs in effecting short sales. The Fund's gains and losses will be decreased or increased, as the case may be, by the amount of the premium, dividends, interest, or expenses the Fund may be required to pay in connection with a short sale.

Risks Associated with Value Investing. Value securities, including those selected by the portfolio managers for the Fund, are subject to the risks that their intrinsic value may never be realized by the market and that their prices may go down. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods. The Fund's value discipline may result in a portfolio of securities that differs materially from its illustrative indices.

Securities selected by the portfolio managers using a value strategy may never reach their intrinsic value because the market fails to recognize what the portfolio managers consider to be the true business value or because the portfolio managers have misjudged those values. There may be periods during which the investment performance of the Fund suffers while using a value strategy.

Liquidity Risk. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price.

Over-the-Counter ("OTC") Risk. Securities traded in OTC markets may trade in smaller volumes, and their prices may be more volatile, than securities principally traded on securities exchanges. Such securities may be less liquid than more widely traded securities. In addition, the prices of such securities may include an undisclosed dealer markup, which the Fund pays as part of the purchase price.

U.S. Government Securities Risk. Certain U.S. government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae) may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. government, and involve increased credit risks in comparison to U.S. Treasury securities or other securities supported by the full faith and credit of the U.S. government.

Mortgage-Related and Asset-Backed Securities Risk. Mortgage-related and other asset-backed securities represent interests in "pools" of mortgages or other assets such as consumer loans or receivables held in trust and often involve risks that are different from or possibly more acute than risks associated with other types of debt instruments. Mortgage-related securities, including commercial-mortgage backed securities (CMBS) and residential mortgage-backed securities (RMBS) are subject to prepayment risk and can be highly sensitive to changes in interest rates. Mortgage-backed securities, and in particular those not backed by a government guarantee, are subject to credit risk. The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Large Investor Risk. Ownership of shares of the Fund may be concentrated in one or a few large investors. Such investors may redeem shares in large quantities or on a frequent basis. Redemptions by a large investor may affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income to shareholders and may increase transaction costs. These transactions potentially limit the use of any capital loss carryforwards and certain other losses to offset future realized capital gains (if any). Such transactions may also increase the Fund's expenses. In addition, the Fund may be delayed in investing new cash after a large shareholder purchase, and under such circumstances may be required to maintain a larger cash position than it ordinarily would.

Management Risk. The Fund is subject to management risk as an actively managed investment portfolio. The portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. The portfolio managers' opinions about the intrinsic worth or creditworthiness of a company or security may be incorrect, the portfolio managers may not make timely purchases or sales of securities for the Fund, the Fund's investment objective may not be achieved, or the market may continue to undervalue the Fund's securities. In addition, the Fund may not be able to quickly dispose of certain securities holdings. The frequency of trading within the Fund impacts portfolio turnover rates, which are shown in the financial highlights table. A higher rate of portfolio turnover could produce higher trading costs and taxable distributions, which would detract from the Fund's performance. Moreover, there can be no assurance that all of the Adviser's personnel will continue to be associated with the Adviser for any length of time. The loss of services of one or more key employees of the Adviser, including the portfolio managers, could have an adverse impact on the Fund's ability to achieve its investment objective. Certain securities or other instruments in which the Fund seeks to invest may not be available in the quantities desired. In such circumstances, the portfolio managers may determine to purchase other securities or instruments as substitutes. Such substitute securities or instruments may not perform as intended, which could result in losses to the Fund.

Because of these and other risks, you could lose money by investing in the Fund.

Performance Information

The bar chart and Average Annual Total Returns table below provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the 1, 5 and 10 calendar year periods compare with those of two broad-based securities market indexes. The chart and table reflect the reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

The Standard & Poor's 500 Stock Index (S&P 500) is a capitalization-weighted index which covers industrial, utility, transportation and financial service companies, and represents approximately 75% of the New York Stock Exchange (NYSE) capitalization and 30% of NYSE issuers and is considered a measure of large capitalization stock performance. The MSCI All Country World Index is a float-adjusted market capitalization index that is designed to measure the combined equity market performance of developed and emerging market countries. The 60%/40% S&P 500 Index/Bloomberg Barclays U.S. Aggregate Bond Index is a composite blend of 60% of the S&P 500 Index and 40% of the Bloomberg Barclays U.S. Aggregate Bond Index. The Consumer Price Index (CPI) is an unmanaged index representing the rate of inflation of U.S. consumer prices as determined by the U.S. Bureau of Labor Statistics. The S&P 500, MSCI All Country World and 60%/40% S&P 500/Bloomberg Barclays U.S. Aggregate Bond indexes are included as broad-based comparisons to the capitalization characteristics of the Fund's portfolio. The CPI is included as comparison of the Fund's results to inflation.

To obtain updated monthly performance information, please visit the Fund’s website at <https://www.fpa.com/funds> or call (800) 982-4372.

The Fund’s highest/lowest quarterly results during this time period were:

Highest	18.15%	(Quarter ended 12/31/2020)
Lowest	-20.51%	(Quarter ended 3/31/2020)

Average Annual Total Returns—Institutional Class (for the periods ended December 31, 2021)	One Year	Five Years	Ten Years
Before Taxes	15.17%	9.63%	9.39%
After Taxes on Distributions ⁽¹⁾	12.15%	7.93%	7.89%
After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	10.95%	7.35%	7.32%
S&P 500 (reflects no deductions for fees, expenses or taxes)	28.71%	18.47%	16.55%
MSCI All Country World Index (reflects no deductions for fees, expenses or taxes)	18.54%	14.40%	11.85%
60%/40% S&P 500 Index/Bloomberg Barclays U.S. Aggregate Bond Index (reflects no deductions for fees, expenses or taxes)	15.86%	12.62%	11.14%
Consumer Price Index (reflects no deductions for fees, expenses or taxes)	7.12%	2.92%	2.12%

(1) After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend upon an investor’s tax situation and may differ from those shown. After-tax returns presented here are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). Early withdrawal from a 401(k) account or an IRA could lead to taxation of the withdrawn amount as ordinary income and could be subject to an additional penalty. The after-tax returns on distributions and sale of Fund shares may be higher than returns before taxes due to the effect of a tax benefit an investor may receive from the realization of capital losses that would have been incurred on the sale of Fund shares.

Investment Adviser

First Pacific Advisors, LP is the Fund’s investment adviser.

Portfolio Managers

Steven Romick has been a portfolio manager of the Fund since its inception on June 2, 1993. Mark Landecker and Brian Selmo have been portfolio managers of the Fund since June 2, 2013.

Purchase and Sale of Fund Shares

Investors may purchase or redeem shares on any business day by written request, check, wire, ACH (Automated Clearing House), telephone, or through dealers as further described in this prospectus. You may conduct transactions by mail (FPA Funds, c/o UMB Fund Services, Inc., P.O. Box 2175, Milwaukee, Wisconsin 53201-2175, or 235 West Galena Street, Milwaukee, Wisconsin 53212), by wire, or by telephone at (800) 638-3060. Purchases and redemptions by telephone are only permitted if you previously established this option in your account. Investors can use the Account Application for initial purchases.

Investors can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. The minimum initial investment in the Institutional Class is \$1,500, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100. However, as described herein, no minimum investment amount is imposed for investments in retirement plans. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. The Fund reserves the right to waive or lower purchase and investment minimums in certain circumstances. For example, the minimums listed above may be waived or lowered for investors who are Trustees or officers of the Fund, employees of the Adviser and/or customers of certain financial intermediaries that hold the Fund's shares in certain omnibus accounts, and investments in the Fund by ReFlow in connection with the ReFlow liquidity program (described in additional detail below under "Management of the Fund"), at the discretion of the officers of the Fund. In addition, financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

Subsequent investments and redemptions can be made directly to UMB Fund Services, Inc.

Notice to Non-U.S. Resident Individual Shareholders. The Fund and its shares are only registered in the United States and its territories ("United States"). Regulations outside of the United States may restrict the sale of shares to certain non-U.S. residents or subject certain shareholder accounts to additional regulatory requirements. As a result, individuals resident outside the United States are generally not eligible to invest in the Fund. The Fund reserves the right, however, to sell shares to certain other non-U.S. investors in compliance with applicable law. If a current shareholder of the Fund provides a non-U.S. address, this will be deemed a representation and warranty from such investor that he/she is not a U.S. resident and will continue to be a non-U.S. resident unless and until the Fund is notified of a change in the investor's resident status. Any current shareholder that has a resident address outside of the United States may be restricted from purchasing additional shares.

Tax Information

The Fund's distributions are taxable and will be taxed as ordinary income and/or long-term capital gain, unless you are investing through a tax-deferred arrangement, such as an IRA or 401(k) plan.

Information Regarding Transactions Through Financial Intermediaries

Shareholders may be required to pay a commission directly to their broker or other financial intermediary when buying or selling shares of the Fund. Shareholders and potential investors may wish to contact their broker or other financial intermediary for information regarding applicable commissions, transaction fees or other charges associated with transactions in shares of the Fund.

In addition, brokers, dealers, banks, trust companies and other financial representatives may receive compensation from the Fund or its service providers for providing a variety of services, which may include recordkeeping, transaction processing for shareholders' accounts and certain shareholder services not currently offered to shareholders that deal directly with the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.

Details about the Fund

INVESTMENT OBJECTIVE

The Fund seeks to generate equity-like returns over the long-term, take less risk than the market and avoid permanent impairment of capital. The Fund's Board of Trustees (the "Board") may change the Fund's investment objective without shareholder approval upon 90 days' written notice to shareholders.

PRINCIPAL INVESTMENT STRATEGIES

To pursue the Fund's investment objective, the portfolio managers invest in both equity and debt securities of companies. The portfolio managers believe that this combination of securities broadens the universe of opportunities for the Fund, offers additional diversification and helps to lower volatility. The portfolio managers invest primarily in equity securities and the balance of the Fund's portfolio in debt securities, cash and cash equivalents. The Fund has no limit on the amount of assets it may invest in non-U.S. securities. The decision to invest in a non-U.S. security will be based on the portfolio managers' fundamental security analysis. In addition, the Fund may sell securities short, and the portfolio managers may employ a short selling strategy for a portion of the Fund.

Equity securities represent an ownership interest, or the right to acquire an ownership interest, in an issuer. Different types of equity securities provide different voting and dividend rights and priority in case of the bankruptcy of the issuer. The Fund may invest in a variety of equity securities, including common stocks, preferred stocks, convertible securities, rights and warrants.

The portfolio managers look for large and small companies that it believes to have excellent future prospects that are undervalued by the securities markets. The portfolio managers believe that these opportunities often arise when companies are out-of-favor or undiscovered by most of Wall Street. The portfolio managers also search for companies that offer earnings growth, opportunity for price/earnings multiple expansion and the best combination of such quality criteria as strong market share, good management, high barriers to entry and high return on capital.

Using fundamental security analysis, the portfolio managers may look for investments that trade at a substantial discount to the portfolio managers' determination of the company's value (absolute value) rather than those that might appear inexpensive based on a discount to their peer groups or the market average (relative value). The portfolio managers attempt to determine a company's absolute value using fundamental security analysis, which they believe generally provides them with a thorough view of a company's financial and business characteristics. As a part of their process, the portfolio managers may:

- Review stock prices or industry group under-performance, insider purchases, management changes and corporate spin-offs.
- Communicate directly with company management, suppliers, and customers.

- Use their judgment to define the company's future potential, financial strength and competitive position.

The portfolio managers generally seek to sell an equity investment when they believe that the company's value has been fully reflected in a higher valuation by the market or when a negative fundamental development occurs in the company or its industry that the portfolio managers believe could significantly impact future earnings growth.

A debt security is an interest-bearing security that companies or governments use to borrow money from investors. The issuer of a debt security promises to pay interest at a stated rate, which may be variable or fixed, and to repay the amount borrowed at maturity (the date when the debt security is due and payable). The Fund may invest in debt securities issued by companies, the U.S. government and its agencies; mortgage-backed and asset-backed securities (*i.e.* securities that are backed by pools of loans or mortgages assembled for sale to investors); municipal notes and bonds; and commercial paper and certificates of deposit.

The portfolio managers invest in debt securities seeking to provide the Fund with a reliable and recurring stream of income, while seeking to preserve its capital. The Fund may also invest in debt securities rated below investment grade ("high yield bonds" or "junk bonds"). The Fund has the ability to invest up to 65% of its total assets in debt securities, although it will generally invest a greater percentage of its portfolio in equity securities than debt securities.

The portfolio managers select debt securities by using an approach that is similar to the approach they use to select equity securities and by trying to forecast current interest rate trends. The portfolio managers generally employ a defensive interest rate strategy, which means they seek to keep the average maturity of the debt-securities portion of the Fund to 10 years or less, by investing at different points along the yield curve. The portfolio managers also continually consider yield spreads and other underlying factors such as credit quality, investor perception and liquidity to determine which sectors offer the best investment value at any given time.

The portfolio managers may engage in a strategy known as selling short. Selling a security short is when the Fund sells a security it does not own. To sell a security short, the Fund must borrow the security from someone else to deliver to the buyer. The Fund then replaces the security it borrowed by purchasing it at the market price at or before the time of replacement. Until it replaces the security, the Fund repays the person that lent it the security for any interest or dividends that may have accrued during the period of the loan. The Fund typically sells securities short to take advantage of an anticipated decline in prices or to protect a profit in a security it already owns.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES

To pursue the Fund's investment objective, the portfolio managers generally invest the Fund's assets in common stocks and other securities of international and U.S. companies and debt securities, including but not limited to the following securities:

Equity Securities. Equity securities represent ownership shares in a company, and include securities that convey an interest in, may be converted into or give holders a right to purchase or otherwise acquire such ownership shares in a company.

Common Stock. Common stocks represent shares of ownership in a company. After other company obligations are satisfied, common stockholders participate in company profits on a pro-rata basis; profits may be paid out in dividends or reinvested in the company to help it grow. Increases and decreases in earnings are usually reflected in a company's stock price, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities. Ownership of common stock of a non-U.S. company may be represented by depositary receipts (which are certificates evidencing ownership of securities of a non-U.S. issuer).

Preferred Stock. Preferred stock is typically subordinated to an issuer's senior debt, but senior to the issuer's common stock. Typically, preferred stock is structured as a long-dated or perpetual bond that distributes income on a regular basis. Issuers are permitted to skip ("non-cumulative" preferred stock) or defer ("cumulative" preferred stock) distributions. Preferred stock may be convertible into common stock and may contain call or maturity extension features.

Warrants and Rights. Warrants are options to buy a stated number of shares of common stock at a specified price anytime during the life of the warrants (generally two or more years). They have no voting rights, pay no dividends, and have no rights with respect to the assets of the entity issuing them. Rights are similar to warrants but normally have a shorter duration and are typically distributed directly by the issuers to existing shareholders, while warrants are typically attached to new debt or preferred stock issuances. The market price of warrants may be substantially lower than the current market price of the underlying common stock, yet warrants are subject to similar price fluctuations. As a result, warrants may be more volatile investments than the underlying common stock. If a warrant is exercised, a Fund may hold common stock in its portfolio even if it does not ordinarily invest in common stock. Warrants and rights generally do not entitle the holder to dividends or voting rights with respect to the underlying common stock and do not represent any rights in the assets of the issuer. Warrants and rights will expire if not exercised on or prior to the expiration date.

Non-U.S. Securities. The Fund may invest in securities of U.S.-dollar denominated non-U.S. issuers traded in the United States and in non-U.S. currency-denominated securities of non-U.S. issuers. For purposes of this prospectus, non-U.S. issuers are generally non-U.S. governments or companies either domiciled outside the U.S. or traded on non-U.S. exchanges, but the portfolio managers may make a different designation in certain circumstances. The non-U.S. issuers that the Fund may invest in include issuers with significant exposure to countries with developing economies and/or markets.

Cash Equivalents. Cash equivalents are short-dated instruments that are readily convertible into cash. They may include bank obligations, commercial paper, and repurchase agreements. Bank obligations include certificates of deposit and bankers' acceptances. Commercial paper is a short-term promissory note issued by a corporation, which may have a floating or variable rate. Repurchase agreements are transactions under which the Fund purchases a security from a dealer counterparty and agrees to resell the security on a specified future date at the same price, plus a specified interest rate.

U.S. Government Securities. The U.S. government sector includes fixed-income securities issued by the U.S. government or its agencies and instrumentalities, such as U.S. Treasury and U.S. government agency securities, mortgage pass-through securities, including Government National Mortgage Association (Ginnie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae), and agency mortgage-backed securities.

Mortgage-Backed Securities. In addition to the U.S. government mortgage-pass through securities described above, the mortgage sector includes non-agency mortgage-backed securities, such as CMOs, CMBS, RMBS and single- and multi-class pass-through securities. Mortgage-backed securities represent direct or indirect participation in mortgage loans secured by real property.

Asset-Backed Securities. Asset-backed securities are bonds issued through special purpose vehicles and backed by pools of loans, other receivables or other assets. Asset-backed securities are created from many types of assets, such as home equity loans, auto loans, student loans and credit card receivables. The credit quality of an asset-backed security depends on the quality and performance of the underlying assets and/or the level of any credit support provided by the securitization structure. The proportions of the Fund's portfolio invested in various types of asset-backed securities will depend on many factors, including the portfolio managers' appraisal of the economy, yield, credit quality, macroeconomic factors and capital appreciation potential, among others. To the extent the Fund focuses its investments in a particular type of asset-backed security, it may be more susceptible to economic conditions and risks affecting the type of asset-backed security.

Corporate Debt Securities. The Fund may invest in corporate bonds, bank debt, notes and commercial paper of varying maturities and may invest in domestic bonds, bank debt and notes and those issued by non-U.S. corporations and governments. Issuers of these securities have a contractual obligation to pay interest at a specified rate on specified date and to repay principal on a specified maturity date, and may have provisions that allow the issuer to redeem or "call" the security before its maturity.

Temporary Investments and Other Measures. The investments and strategies described in this prospectus are those that are used under normal circumstances. During unusual economic, market, political or other circumstances, or during periods of significant shareholder redemptions, the Fund may invest up to 100% of its total assets in short-term, high quality debt instruments, such as U.S. government securities. These instruments would not ordinarily be consistent with the Fund's principal investment strategies, and may prevent the Fund from achieving its investment objective. The Fund will use a temporary strategy if the portfolio managers believe that pursuing the Fund's investment objective will subject the Fund to a significant risk of loss. When the portfolio managers pursue a temporary defensive strategy, the Fund may not profit from favorable developments that it would have otherwise profited from if it were pursuing its normal strategies.

As part of its normal operations, the Fund may hold cash or invest a portion of its portfolio in short-term interest bearing U.S. dollar denominated securities, pending investments or to provide for possible redemptions. Investments in such short-term debt securities can generally be sold easily and have limited risk of loss, but earn only limited returns. The Fund may increase its cash holdings

and/or such short-term investments in anticipation of a greater than normal number of shareholder redemptions.

The portfolio managers' emphasis on a value-oriented investment approach could result in a portfolio that does not reflect the national economy, differs significantly from broad market indices and consists of securities considered by the average investor to be unpopular or unfamiliar.

Percentage Investment Limitations. Unless otherwise stated, all percentage limitations on Fund investments listed in this prospectus will apply at the time of purchase. The Fund would not violate these limitations unless an excess or deficiency occurs or exists immediately after and as a result of an investment.

Other Investments and Techniques. The Fund may invest in other types of securities and use a variety of investment techniques and strategies which are not principal investment strategies and are not described in this prospectus. These securities and techniques may subject the Fund to additional risks. Please see the Statement of Additional Information (the "SAI") for additional information about the securities and investment techniques described in this prospectus and about additional securities and techniques that may be used by the Fund.

ADDITIONAL INFORMATION ABOUT PRINCIPAL RISKS

Risks Associated with Investing in Equities. Equity securities, generally common stocks, preferred stocks and/or depositary receipts held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect the securities markets generally, such as adverse changes in economic or political conditions, the general outlook for corporate earnings, interest rates or investor sentiment. Sustained periods of market volatility, either globally or in any jurisdiction in which the Fund invests, may increase the risks associated with an investment in the Fund. Equity securities may also lose value because of factors affecting an entire industry or sector, such as increases in production costs or factors directly related to a specific company, such as decisions made by its management.

Common stock of an issuer in the Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer of the security experiences a decline in its financial condition. Common stock is subordinated to preferred stocks, bonds and other debt instruments in a company's capital structure, in terms of priority with respect to corporate income, and therefore will be subject to greater dividend risk than preferred stocks or debt instruments of such issuers. In addition, while broad market measures of common stocks have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns. Because preferred stock is generally junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics.

Interest Rate Risk. As with most funds that invest in debt securities, changes in interest rates, including rates that fall below zero, are one of the most important factors that could affect the value of an investment in the Fund. Interest rate risk is the risk that debt securities will decline in value

because of increases in interest rates. Any such change in interest rates may be sudden and significant, with unpredictable effects on the financial markets and the Fund's investments. Generally, bonds with longer maturities have a greater duration and thus are subject to greater price volatility from changes in interest rates. Adjustable rate instruments also react to interest rate changes in a similar manner although generally to a lesser degree (depending, however, on the characteristics of the reset terms, including the index chosen, frequency of reset and reset caps or floors, among other things). Low interest rates may pose heightened risks with respect to investments in fixed income securities. If interest rates were to rise from a low level, fixed income securities markets may experience lower prices, increased volatility and lower liquidity. The negative impact on fixed income securities from rate increases, regardless of the cause, could be swift and significant, which could result in significant losses by the Fund, even if such rate increases are anticipated by the portfolio managers.

Adjustable Rate Mortgage (“ARM”) Risk. During periods of extreme fluctuations in interest rates, the resulting fluctuations of ARM rates could affect the ARMs' market value. Most ARMs generally have annual reset limits or “caps”. Fluctuations in interest rates above these levels, thus, could cause the mortgage-backed securities to “cap out” and to behave more like long-term, fixed-rate debt securities. During periods of declining interest rates, of course, the coupon rates may readjust downward and result in lower yields. Because of this feature, the value of ARMs will likely not rise during periods of declining interest rates to the same extent as fixed-rate instruments.

Credit Risk. Credit risk refers to the likelihood that an issuer will default on the payment of principal and/or interest on a security. Various factors could affect the issuer's actual or perceived willingness or ability to make timely interest or principal payments, including changes in the issuer's financial condition or in general economic conditions. In addition, lack of or inadequacy of collateral or credit enhancements for a fixed income security may affect its credit risk. Below investment grade securities have more risk with respect to the issuer's ability to pay interest and repay principal when due, and therefore involve a greater risk of default or nonpayment. Credit risk of a security may change over time. Ratings agencies periodically review certain securities and may downgrade a security that is held by the Fund. However, ratings are only opinions of the agencies issuing them and are not absolute guarantees as to quality.

Call Risk. Issuers of callable bonds are permitted to redeem these bonds before their final maturity. Issuers may call outstanding securities before maturity for a number of reasons, including decreases in prevailing interest rates or improvements to the issuer's credit profile. If an issuer calls a security in which the Fund is invested, the Fund could lose potential price appreciation and be forced to reinvest the proceeds in securities that bear a lower interest rate or more credit risk.

Market Risk. The market price of investments owned by the Fund may go up or down, sometimes rapidly or unpredictably. Fund investments may decline in value due to factors affecting the overall markets, or particular industries or sectors. The value of a holding may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, national or international political events, war, acts of terrorism, public health emergencies, such as the spread of infectious illness or disease, natural disasters, changes in interest or currency rates, domestic or international monetary policy or adverse investor sentiment generally. Such conditions may add significantly to the risk of volatility in the net asset value of the Fund's

shares. Market changes may impact equity and fixed income securities in different and, at times, conflicting manners. The value of a holding may also decline due to factors that affect a particular industry or industries, such as competitive conditions within an industry or government regulations. The Fund may experience heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of an investment in the Fund to unexpectedly decline. Shareholder redemptions may also cause the Fund to engage in “odd-lot” fixed income transactions, which due to their small size, may result in the Fund receiving substantially lower value on such transactions than if the Fund had engaged in a large block trade of such securities. The Fund potentially will be prevented from executing investment decisions at an advantageous time or price as a result of any domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity, as well as increased or changing regulations. In addition, the Fund may rely on various third-party sources to calculate its net asset value. Errors or systems failures and other technological issues may adversely impact the Fund’s calculation of its net asset value, and such net asset value calculation issues may result in inaccurately calculated net asset values, delays in net asset value calculation and/or the inability to calculate net asset values over extended periods. The Fund may be unable to recover any losses associated with such failures.

In addition, issuers of securities in which the Fund invests are subject to potential operational and information security risks from breaches in cyber security, including cyber-attacks. A breach in cyber security refers to both intentional and unintentional cyber events and may include, among other events, the stealing or corrupting of data maintained online or digitally, denial of service attacks on websites, the unauthorized release or misuse of confidential information or various other forms of cyber security breaches. Such cyber events could result in material adverse consequences for such issuers, and may cause the Fund’s investment in such portfolio companies to lose value.

Many countries have experienced outbreaks of infectious illnesses in recent decades, including swine flu, avian influenza, SARS and, more recently, COVID-19 and subsequent variants. The global outbreak of COVID-19 which began in early 2020 has resulted in various disruptions, including travel and border restrictions, quarantines, supply chain disruptions, lower consumer demand and general market uncertainty. The effects of COVID-19 and subsequent variants have and may continue to adversely affect the global economy, financial markets and the economies of certain nations and individual issuers, any of which may negatively impact the Fund and its holdings. Similar consequences could arise as a result of the spread of other infectious diseases.

As with other serious economic disruptions, governmental authorities and regulators have responded in recent years to the situation with significant fiscal and monetary policy changes. These included providing direct capital infusions into companies, introducing new monetary programs, and lowering interest rates. In some cases, these responses resulted in, and may in the future result in, negative interest rates and higher inflation.

Risks Associated with Investing in Smaller-Cap and Mid-Cap Companies. The prices of securities of smaller-cap and mid-cap companies tend to fluctuate more widely than those of larger, more established companies. Smaller-cap and mid-cap companies may have limited product lines, markets or financial resources or may depend on the expertise of a few people and may be subject to more abrupt or erratic market movements than securities of larger, more established companies or market averages in general. In addition, these companies often have shorter operating histories

and are more reliant on key products or personnel than larger companies. The securities of smaller- or medium-sized companies are often traded over-the-counter, and may not be traded in volumes typical of securities traded on a national securities exchange. Securities of such issuers may lack sufficient market liquidity to effect sales at an advantageous time or without a substantial drop in price.

Risks of Investments in SPACs. The Fund may invest in equity securities of, warrants of, and other interests in special purpose acquisition companies or similar special purpose entities (collectively, “SPACs”). A SPAC, sometimes referred to as “blank check company,” is a private or publicly traded company that raises investment capital for the purpose of acquiring or merging with an existing company. The shares of a SPAC are typically issued in “units” that include one share of common stock and one right or warrant (or partial right or warrant) conveying the right to purchase additional shares of common stock. At a specified time, the rights and warrants may be separated from the common stock at the election of the holder, after which time each security typically is freely tradeable. Private companies can combine with a SPAC to go public by taking the SPAC’s place on an exchange as an alternative to making an initial public offering. Unless and until an acquisition is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and/or cash. If an acquisition that meets the requirements for the SPAC is not completed within a pre-established period (*e.g.*, two years), the invested funds are returned to the entity’s shareholders. A significant portion of amounts raised by a SPAC for the purpose of identifying and effecting an acquisition or merger may be expended during the search for a target transaction. Because SPACs have no operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity’s management to identify and complete a profitable acquisition. An investment in a SPAC may include potential conflicts and potential for misalignment of incentives in the structure of the SPAC. Public stockholders of SPACs, including the Fund, may not be afforded a meaningful opportunity to vote on a proposed initial business combination because certain stockholders, including stockholders affiliated with the management of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a business combination even though a majority of its public stockholders do not support such a combination. Alternatively, a proposed merger or acquisition may be unable to obtain the requisite approval of SPAC shareholders. Separately, if an acquisition or merger target is identified, the Fund may elect not to participate in, or vote to approve, the proposed transaction, or the Fund may be required to divest its interests in the SPAC, due to regulatory or other considerations, in which case the Fund may not reap any resulting benefits. There is no guarantee that the SPACs in which the Fund invests will complete an acquisition or that any acquisitions that are completed will be profitable. In addition, warrants or other rights with respect to a SPAC held by the Fund may expire worthless or may be repurchased or retired by the SPAC at an unfavorable price.

SPAC sponsors generally purchase equity in the SPAC at more favorable terms than investors in the IPO or subsequent investors on the open market. In addition, the Fund’s investment in a SPAC may be diluted by additional later offerings of interests in the SPAC or by other investors exercising existing rights to purchase shares of the SPAC. Some SPACs may pursue acquisitions only within certain industries or regions, which may increase the volatility of their prices. SPACs may also encounter intense competition from other entities having a similar business objective, such as private

investors or investment vehicles and other SPACs competing for the same acquisition opportunities, which could make completing an attractive business combination more difficult. The values of the Fund's investments in SPACs may be highly volatile and may depreciate significantly over time. SPACs are typically traded in the over-the-counter market and can in certain circumstances be considered illiquid or be subject to restrictions on resale. In addition, the ownership of many SPAC-derived companies often includes large holdings by venture capital and private equity investors who seek to sell their shares in the public market in the months following a business combination transaction when shares restricted by lock-up are released, causing greater volatility and possible downward pricing pressure.

Risks Associated with Investing in Non U.S. Securities. Non-U.S. investments involve special risks not present in U.S. investments that can increase the chances that the Fund will lose money. Certain of the risks noted below may also apply to securities of U.S. issuers with significant non-U.S. operations. Investments in non-U.S. securities involve the following risks:

- The economies of some non-U.S. markets often do not compare favorably with that of the U.S. in areas such as growth of gross domestic product, reinvestment of capital, resources, and balance of payments. Some of these economies may rely heavily on particular industries or non-U.S. capital. They may be more vulnerable to adverse diplomatic developments, the imposition of economic sanctions against a country, changes in international trading patterns, trade barriers and other protectionist or retaliatory measures.
- Governmental actions—such as the imposition of capital controls, nationalization of companies or industries, expropriation of assets or the imposition of punitive taxes—may adversely affect investments in non-U.S. markets. Such governments may also participate to a significant degree, through ownership or regulation, in their respective economies.
- The governments of certain countries may prohibit or substantially restrict foreign investing in their capital markets or in certain industries. This could severely affect security prices. This could also impair the Fund's ability to purchase or sell non-U.S. securities or transfer its assets or income back to the U.S. or otherwise adversely affect the Fund's operations.
- Other non-U.S. market risks include foreign exchange controls, difficulties in pricing securities, defaults on non-U.S. government securities, difficulties in enforcing favorable legal judgments in non-U.S. courts, and political and social instability. Legal remedies available to investors in some non-U.S. countries are less extensive than those available to investors in the U.S. Many non-U.S. governments supervise and regulate stock exchanges, brokers and the sale of securities to a lesser extent than the U.S. government does. Corporate governance may not be as robust as in more developed countries. As a result, protections for minority investors may not be strong, which could adversely affect the Fund's non-U.S. holdings or exposures.
- Accounting standards in other countries are not necessarily the same as in the U.S. If the accounting standards in another country do not require as much disclosure or detail as U.S. accounting standards, it may be harder for the portfolio managers to completely and accurately determine a company's financial condition or otherwise assess a company's creditworthiness.

- Because there may be fewer investors on non-U.S. exchanges and smaller numbers of shares traded each day, it may be difficult for the Fund to buy and sell securities on those exchanges. In addition, prices of non-U.S. securities may be more volatile than prices of securities traded in the U.S.
- Non-U.S. markets may have different clearance and settlement procedures. In certain markets, settlements may not keep pace with the volume of securities transactions. If this occurs, settlement may be delayed, and the Fund's assets may be uninvested and may not be earning returns. The Fund also may miss investment opportunities or not be able to sell an investment or reduce its exposure because of these delays.
- Changes in currency exchange rates will affect the value of the Fund's non-U.S. holdings or exposures.
- The costs of non-U.S. securities transactions tend to be higher than those of U.S. transactions, increasing the transaction costs paid directly or indirectly by the Fund.
- International trade barriers or economic sanctions against non-U.S. countries may adversely affect the Fund's non-U.S. holdings or exposures.
- Global economies are increasingly interconnected, which increases the possibilities that conditions in one country region or financial market may adversely impact a different country, region or financial market.

The severity or duration of these conditions may be affected if one or more countries leave the European Union or the euro currency or if other policy changes are made by governments or quasi-governmental organizations.

The Fund may invest in depositary receipts, including American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs") and Global Depositary Notes ("GDNs"), which are certificates evidencing ownership of securities of a non-U.S. issuer. Depositary receipts may be sponsored by the non-U.S. issuer or unsponsored. Depositary receipts are subject to the risks of changes in currency or exchange rates and the risks of investing in non-U.S. securities that they evidence or into which they may be converted. The issuers of unsponsored depositary receipts are not obligated to disclose information that would be considered material in the U.S., or to pass through to shareholders any voting rights with respect to the deposited securities. Therefore, there may be less information available regarding these issuers, and there may not be a correlation between such information and the market value of the depositary receipts.

Risks Associated with Investing in Emerging Markets. In investing the Fund's assets, the portfolio managers focus on countries with established rules of law and political systems that allow for transparent and unbiased enforcement of those laws, although there can be no assurance that the Fund's assets will in all cases be invested in countries that offer such protections, and such investments may be subject to heightened risk. The Fund's investments in non-U.S. issuers in developing or emerging market countries may involve increased exposure to changes in economic, social and political factors as compared to investments in more developed countries. The economies of most emerging market countries are in the early stage of capital market development and may

be dependent on relatively fewer industries. As a result, their economic systems are still evolving. Emerging markets may have less established legal, accounting, and financial reporting systems than those in more developed markets, which may reduce the scope or quality of financial information available to investors. Companies in emerging markets may also be subject to less stringent standards on disclosure, accounting and financial reporting, and record keeping, which may affect the Fund's ability to evaluate potential and current investments. In addition, their legal and political systems may also be less stable than those in developed economies. Securities markets in these countries can also be smaller, and there may be increased settlement risks, and investor protection regimes may be more limited. For example, it may be more difficult for shareholders to bring derivative litigation or for U.S. regulators to bring enforcement actions against issuers in emerging markets. Emerging market countries often suffer from currency devaluation and higher rates of inflation. Due to these risks, securities issued in developing or emerging countries may be more volatile, less liquid, and harder to value than securities issued in more developed countries.

Risks Associated with Short Selling. The Fund can lose money if the price of the security it sold short increases between the date of the short sale and the date on which the Fund replaces the borrowed security. These losses are theoretically unlimited. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The Fund will incur transaction costs in effecting short sales. The Fund's gains and losses will be decreased or increased, as the case may be, by the amount of the premium, dividends, interest, or expenses the Fund may be required to pay in connection with a short sale.

Risks Associated with Value Investing. Value stocks, including those selected by the portfolio managers for the Fund, are subject to the risks that their intrinsic value may never be realized by the market and that their prices may go down. In addition, value style investing may fall out of favor and underperform growth or other styles of investing during given periods. The Fund's value discipline may result in a portfolio of securities that differs materially from its illustrative indices.

Securities selected by the portfolio managers using a value strategy may never reach their intrinsic value because the market fails to recognize what the portfolio managers consider to be the true business value or because the portfolio managers have misjudged those values. There may be periods during which the investment performance of the Fund suffers while using a value strategy.

Liquidity Risk. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price. Investments in high yield securities, non-U.S. securities, derivatives or other securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. Certain investments in private placements and Rule 144A securities may be considered illiquid investments under certain circumstances. Lower-rated debt securities tend to be less liquid than higher-rated securities. Illiquid securities may trade at a discount from comparable, more liquid investments, and may be subject to wider fluctuations in market value. Furthermore, reduced number and capacity of dealers and other counterparties to "make markets" in fixed income securities, in connection with the growth of the fixed income markets, may increase liquidity risk with respect to the Fund's investments in fixed income securities. When there is no willing buyer and investments cannot be readily sold, the Fund may have to lower the selling price, sell other investments, or may not be able to sell the securities at all and may have to forego another, more appealing investment opportunity, any of which could have a negative effect on the Fund's performance. These securities may also be difficult

to value and their values may be more volatile because of liquidity risk. Increased Fund redemption activity may negatively impact Fund performance and increase liquidity risk due to the need of the Fund to sell portfolio securities. Regulatory changes may further constrain the ability of market participants to create liquidity, particularly in times of increased market volatility. Liquidity risk may intensify during periods of economic uncertainty.

Over-the-Counter (“OTC”) Risk. Securities traded in OTC markets may trade in smaller volumes, and their prices may be more volatile, than securities principally traded on securities exchanges. Such securities may be less liquid than more widely traded securities. In addition, the prices of such securities may include an undisclosed dealer markup, which the Fund pays as part of the purchase price.

U.S. Government Securities Risk. Certain U.S. government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. government to purchase the agency’s obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae) may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. government, and involve increased credit risks in comparison to U.S. Treasury securities or other securities supported by the full faith and credit of the U.S. government. Any security guaranteed by the U.S. government or its agencies or instrumentalities, or a security backed by the U.S. Treasury or the full faith and credit of the United States, is guaranteed or backed only as to the timely payment of interest and principal when held to maturity, but the market values for such securities are not guaranteed and will fluctuate.

Any market movements, regulatory changes or changes in political or economic conditions that affect the U.S. government agencies or instrumentalities in which the Fund invests may have a significant impact on the Fund’s performance. Events that would adversely affect the market prices of securities issued or guaranteed by one government agency or instrumentality may adversely affect the market price of securities issued or guaranteed by other government agencies or instrumentalities. Because many types of U.S. government securities trade actively outside the United States, their prices may rise and fall as changes in global economic conditions affect the demand for these securities.

Mortgage-Related and Asset-Backed Securities Risk. Mortgage-related and other asset-backed securities represent interests in “pools” of mortgages or other assets such as consumer loans or receivables held in trust and often involve risks that are different from or possibly more acute than risks associated with other types of debt instruments. Mortgage-related securities, including CMBS and RMBS, are subject to prepayment risk and, thus, can be highly sensitive to changes in interest rates. Generally, in a period of rising interest rates, individual borrowers are less likely to exercise prepayment options which tend to extend the expected maturity of mortgage-related securities, making them more sensitive to changes in interest rates. As a result, if the Fund holds mortgage-related securities, rising interest rates may cause the Fund to exhibit additional volatility due to the increased expected average life of its mortgage-related holdings. When interest rates decline, borrowers may pay their mortgages sooner than expected. These prepayments can reduce the returns

of the Fund because the Fund may realize losses on securities that were acquired at a premium to par and the Fund may have to reinvest the proceeds from prepayments at the lower prevailing interest rates which can reduce the Fund's yield.

Mortgage-related securities may be either pass-through securities or collateralized mortgage obligations ("CMOs"). Pass-through securities represent a right to receive principal and interest payments collected on a pool of mortgages which are passed through to security holders. CMOs are created by dividing the principal and interest payments collected on a pool of mortgages into several cash flow streams ("tranches") with different priority rights to portions of the underlying mortgage payments. Certain CMO tranches may represent a right to receive specific sources of cash flow such as interest-only ("IOs") or principal-only ("POs"). These securities are frequently referred to as "stripped securities" and may be extremely sensitive to changes in interest rates. Stripped securities can produce higher yields than more traditional securities. However, stripped mortgage securities are highly sensitive to changes in interest and prepayment rates. As a result, such securities are extremely volatile. For example, generally, the value of principal-only stripped mortgage-related securities fall as interest rates rise, whereas the value of interest-only stripped mortgage-related securities rise as interest rates rise, and vice versa. If the Fund invests in CMO tranches (including CMO tranches issued by government agencies) and interest rates move in a manner not anticipated by the managers, it is possible that the Fund could lose all or substantially all of its investment. The market prices of CMOs structured as accrual certificates (also known as "Z-Bonds") are affected to a greater extent by interest rate changes and therefore tend to be more volatile than securities which pay current interest in cash. Mortgage-related securities, including CMBS and RMBS, and in particular those not backed by a government guarantee, are subject to credit risk, *i.e.* the likelihood that an issuer will default on the payment of principal and/or interest on a security. CMBS and RMBS investments that are backed by mortgages given to borrowers considered to be higher risk borrowers generally include one or more aggressive mortgage terms, such as a high loan-to-value ratio. Such mortgages carry a higher degree of credit risk than other loans, and, therefore, a higher probability of default.

The Fund may invest in collateralized debt obligations ("CDOs"), which include collateralized loan obligations ("CLOs"), collateralized bond obligations ("CBOs"), and other similarly structured securities. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. In addition to the normal risks associated with credit-related securities discussed elsewhere in the prospectus (*e.g.*, interest rate risk and default risk), CDOs carry additional risks including, but not limited to, the risk that: (i) distributions from collateral securities may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Fund may invest in CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results. Investments in CDOs are also more difficult to value than other investments. In addition, although not required, valuations of Fund holdings are ordinarily verified via a second pricing source. However, second source pricing may not be available with respect to certain CDOs in which the Fund invests as a result of a lack of readily available market quotations. In addition, there may be delays in the Fund's ability to invest in CDOs at desired levels as a result of the increased time necessary for the Adviser to resolve valuation and operational issues necessary to make these investments.

The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Payment of principal and interest on asset-backed securities may be largely dependent upon the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets. Certain asset-backed securities, including securities backed by auto loans, are subject to subprime lending and loan-to-value risk. One of the most significant risks to a holder of an auto loan asset-backed security is the fluctuation of the value of the loans acquired. The higher the loan-to-value ratio, the riskier the loan is for a lender. Further, subprime loans underlying auto loan asset-backed securities may have higher default rates than loans that meet more stringent underwriting requirements.

Risks Associated with Investing in High Yield Securities. High yield bonds, sometimes called “junk” bonds, are highly speculative securities that are usually issued by smaller, less credit-worthy and/or highly leveraged (indebted) companies. Because investment in lower-rated or unrated securities involves greater investment risk, achievement of the Fund's investment objective is more dependent on the portfolio managers' credit analysis of these securities than with respect to the Fund's investments in higher-rated securities. The portfolio managers do not employ a rating valuation for unrated securities. Decisions to purchase and sell these securities are based on the portfolio manager's evaluation of their investment potential and not on the ratings assigned by credit agencies. Compared with investment-grade bonds, high yield bonds carry a greater degree of risk and are less likely to make payments of interest and principal. Compared to investment-grade debt securities, market developments and the financial and business conditions of the corporation issuing high yield securities influence the price and liquidity of high yield securities more than changes in interest rates when compared to investment grade debt securities. Lower-rated securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn, for example, could cause a decline in the prices of lower-rated securities because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. New and proposed laws and regulations could negatively impact the market for high-yield bonds. Insufficient liquidity in the high yield bond market may make it more difficult to dispose of high yield bonds and may cause the Fund to experience sudden and substantial price declines. A lack of reliable, objective data or market quotations may make it more difficult to value high yield bonds accurately. There is no limit on the ratings of high yield securities that may be purchased or held by the Fund, and the Fund may invest in securities that are in default.

Sovereign and Government-Related Debt. Sovereign debt includes securities issued or guaranteed by a non-U.S. sovereign government or its agencies, authorities, or political subdivisions. Government-related debt includes securities issued by non-U.S. regional or local governmental entities or government-controlled entities. In the event an issuer of sovereign debt or government-related debt is unable or unwilling to make scheduled payments of interest or principal, holders may be asked to participate in a restructuring of the debt and to extend further credit to the issuer. In the event of a default by such an issuer, there may be few or no effective legal remedies for collecting on such debt.

Risks Associated with Investing in Convertible Securities. A convertible security is a bond, debenture, or note that may be exchanged for particular common stocks in the future at a predetermined price or formula within a specified period of time. A convertible security entitles the holder to receive interest paid or accrued on the debt security until the convertible security matures or is redeemed. Prior to redemption, convertible securities provide benefits similar to nonconvertible debt securities in that they generally provide income with higher yields than those of similar common stocks. Convertible securities may entail less risk than the corporation's common stocks. Convertible securities are generally not investment grade. The risks of nonpayment of the principal and interest increase when debt securities are rated lower than investment grade or are not rated.

Risks Associated with Investing in Repurchase Agreements. A repurchase agreement is a short-term investment. The Fund acquires a debt security that the seller agrees to repurchase at a future time and set price. If the seller declares bankruptcy or defaults, the Fund may incur delays and expenses liquidating the security. The security may also decline in value or fail to provide income.

Large Investor Risk. Ownership of shares of the Fund may be concentrated in one or a few large investors. Such investors may redeem shares in large quantities or on a frequent basis. Redemptions of Fund shares by a large investor may negatively affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income to shareholders and may increase transaction costs. These transactions potentially limit the use of any capital loss carryforwards and certain other losses to offset future realized capital gains (if any). Such transactions may also increase the Fund's expenses. In addition, the Fund may be delayed in investing new cash after a large shareholder purchase, and under such circumstances may be required to maintain a larger cash position than it ordinarily would.

Management Risk. The Fund is subject to management risk as an actively managed investment portfolio. The portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. The portfolio managers' opinion about the intrinsic worth or creditworthiness of a company or security may be incorrect, the portfolio managers may not make timely purchases or sales of securities for the Fund, the Fund's investment objective may not be achieved, or the market may continue to undervalue the Fund's securities. In addition, the Fund may not be able to quickly dispose of certain securities holdings. The frequency of trading within the Fund impacts portfolio turnover rates, which are shown in the financial highlights table. A higher rate of portfolio turnover could produce higher trading costs and taxable distributions, which would detract from the Fund's performance. Moreover, there can be no assurance that all of the Adviser's personnel will continue to be associated with the Adviser for any length of time. The loss of services of one or more key employees of the Adviser, including the portfolio managers, could have an adverse impact on the Fund's ability to achieve its investment objective. Certain securities or other instruments in which the Fund seeks to invest may not be available in the quantities desired. In such circumstances, the portfolio managers may determine to purchase other securities or instruments as substitutes. Such substitute securities or instruments may not perform as intended, which could result in losses to the Fund. In addition, the Fund and its service providers are subject to potential operational and information security risks from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional cyber events and may include, among other events, the stealing or

corrupting of data maintained online or digitally, denial of service attacks on websites, the unauthorized release or misuse of confidential information or various other forms of cyber-attacks. Cyber-security breaches affecting the Fund or the Adviser, custodian, transfer agent, intermediaries, trading counterparties or other third-party service providers may adversely impact the Fund. For instance, cyber security breaches may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its net asset value, cause the release of private shareholder information or confidential (including proprietary) company information, impede trading, result in violations of applicable privacy and other laws, subject the Fund to regulatory fines, cause the Fund and its shareholders to experience financial losses, or cause reputational damage and/or otherwise disrupt normal business operations. The Fund may also incur additional costs for cyber security risk management purposes. The Fund has established business continuity plans and risk management systems reasonably designed to seek to reduce the risks associated with cyber-attacks and disruptions in services, but there are inherent limitations in these plans and systems. For example, the nature of malicious cyber-attacks is becoming increasingly sophisticated; the Fund cannot control the cyber-security systems of issuers or third-party service providers; and certain current risks may not have been identified and additional unknown threats may emerge in the future. There is also a risk that cyber security breaches may not be detected. The Fund and its shareholders could be negatively impacted as a result.

INFORMATION ABOUT NON-PRINCIPAL INVESTMENT STRATEGIES

As a secondary matter, the Fund may invest in a wide range of other investments, including futures and other derivatives. The Fund may also employ investment practices that are not principal investment strategies and that this prospectus does not describe. For more information concerning the Fund's investment practices and its risks, see the SAI.

Derivatives. The Fund may invest in derivatives, a category of investments that includes forward non-U.S. currency exchange contracts, futures, options and swaps to protect its investments against changes resulting from market conditions or currency changes (a practice called "hedging"), to reduce transaction costs or to manage cash flows. Forward non-U.S. currency exchange contracts, futures and options are called derivatives because their value is derived from an underlying asset or economic factor. Derivatives are often more volatile than other investments and may magnify the Fund's gains or losses. There are various factors that affect the Fund's ability to achieve its objectives with derivatives. Successful use of a derivative depends on the degree to which prices of the underlying assets correlate with price movements in the derivatives the Fund buys or sells. The Fund could be negatively affected if the change in market value of its securities fails to correlate perfectly with the values of the derivatives it purchased or sold. In addition, derivatives can be volatile and involve significant risks, including counterparty risk (the risk that the other party to a contract defaults or refuses to honor the obligation), leverage risk (the risk that some derivatives entail embedded leverage magnifying losses) and liquidity risk (the risk that the derivative will be difficult to sell or close out at a favorable time or price). Changes in regulations relating to a mutual fund's use of derivatives and related instruments could potentially limit or impact the Fund's ability to invest in derivatives and adversely affect the value or performance of derivatives and the Fund.

Portfolio Holdings Disclosure

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI. For instructions on how to obtain an SAI, please refer to the back cover of this prospectus.

Management of the Fund

Investment Adviser

First Pacific Advisors, LP is the Fund's investment adviser. Together with its predecessor organizations, the Adviser has been in the investment advisory business since 1954 and has served as the Fund's investment adviser since March 1, 1996. As of March 31, 2022, the Adviser manages assets of approximately \$28 billion and serves as the investment adviser for eight investment companies, including one closed-end investment company and one exchange-traded fund, and more than 40 institutional, sub-advised, and private fund accounts. The Adviser is headquartered at 11601 Wilshire Boulevard, Suite 1200, Los Angeles, California 90025. The portfolio managers, who are affiliated with the Adviser, select investments for the Fund.

The total management fee rate paid by the Fund, as a percentage of average daily net assets, for the previous fiscal year was 1.00%. Effective September 4, 2020, the Board approved the reduction in the annual advisory fee rate paid by the Fund to 0.93%. The current management fee rate paid by Institutional Class shares remains 1.00%, which includes both the advisory fee of 0.93% and a class-specific administrative service fee of 0.07%. In addition, the Adviser has contractually agreed to reimburse operating expenses in excess of 0.05% of the average daily net assets of the Fund, excluding management fees, administrative service fees, short sale dividend expenses and interest expenses on cash deposits relating to short sales, brokerage fees and commissions, redemption liquidity service expenses, interest, taxes, fees and expenses of other funds in which the Fund invests, and extraordinary expenses, including litigation expenses not incurred in the Fund's ordinary course of business, through April 30, 2023. The Adviser has also contractually agreed to reimburse the Fund for redemption liquidity service expenses in excess of 0.0044% of the average net assets of the Fund through April 30, 2023.

A discussion regarding the basis for the Board's approval of the Investment Advisory Agreement is available in the Fund's annual report dated December 31, 2021.

"Management Fees" in the Annual Fund Operating Expenses table in this prospectus include the advisory fee and fees for administrative services provided by the Adviser. Under a separate agreement effective September 4, 2020 approved by the Board, administrative services are provided by the Adviser to provide non-distribution services to Fund shareholders and their advisors either directly or by assisting third parties. These services include providing in-depth information on the Fund and market developments that impact Fund investments, communicating with shareholders about their holdings of shares; answering shareholder inquiries regarding account status and the procedures for the purchase and redemption of shares; providing account balances; providing communications from the fund and its portfolio managers and officers; detailed Fund analytics, and; such other matters as may reasonably be requested by advisers or other intermediaries to assist

them in their provision of service to shareholders of the Fund. Administrative services also include, but are not limited to, coordinating, monitoring and overseeing third parties that provide services to Fund shareholders. The Administrative Services Agreement between the Fund and the Adviser provides the Fund the ability to charge an administrative services fee of up to 0.07%, depending on the share class. The Fund's Adviser receives an administrative services fee at the annual rate of 0.07% of the average daily net assets of the Fund attributable to the Institutional Class for its provision of administrative services.

Portfolio Managers

Steven Romick has been a Portfolio Manager of the Fund since the Fund's inception on June 2, 1993. He has also been a Trustee of the Fund since 2002 and a Managing Partner of the Adviser since January 2010.

Mark Landecker has been a Portfolio Manager of the Fund since June 2, 2013. Mr. Landecker is currently a Partner of the Adviser since December 2013. Mr. Landecker was a Managing Director from January 2013-December 2013 and a Vice President from 2009-2012 of the Adviser.

Brian Selmo has been a Portfolio Manager since June 2, 2013. Mr. Selmo is currently a Partner of the Adviser since December 2013. Mr. Selmo was a Managing Director from January 2013 to December 2013 and a Vice President from 2008 to 2012 of the Adviser.

Messrs. Romick, Landecker and Selmo are primarily responsible for the day-to-day management of the Fund's portfolio.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of shares of the Fund.

ReFlow Liquidity Program

The Fund may participate in the ReFlow liquidity program, which is designed to provide an alternative liquidity source for mutual funds experiencing net redemptions of their shares. Pursuant to the program, ReFlow Fund, LLC ("ReFlow") provides participating mutual funds with a source of cash to meet net shareholder redemptions by standing ready each business day to purchase fund shares up to the value of the net shares redeemed by other shareholders that are to settle the next business day. Following purchases of fund shares, ReFlow then generally redeems those shares when the fund experiences net sales, at the end of a maximum holding period determined by ReFlow (currently 14 days) or at other times at ReFlow's discretion. While ReFlow holds fund shares, it will have the same rights and privileges with respect to those shares as any other shareholder.

For use of the ReFlow service, a fund pays a fee to ReFlow each time it purchases fund shares, calculated by applying to the purchase amount a fee rate determined through an automated daily auction among participating mutual funds. The current minimum fee rate is 0.20% of the value of the fund shares purchased by ReFlow, although the fund may submit a bid at a higher fee rate if it determines that doing so is in the best interest of fund shareholders. This fee is allocated among a

fund's share classes based on relative net assets. ReFlow's purchases of fund shares through the liquidity program are made on an investment-blind basis without regard to the fund's objective, policies or anticipated performance. In accordance with federal securities laws, ReFlow is prohibited from acquiring more than 3% of the outstanding voting securities of a fund. ReFlow will purchase Institutional Class shares of the Fund at net asset value and will not be subject to any investment minimum applicable to such shares. ReFlow will periodically redeem its entire share position in the Fund and request that such redemption be met in kind in accordance with the Fund's redemption in-kind policies described under "Other Shareholder Services" below. The Fund's Board of Trustees has approved the Fund's use of the ReFlow program.

The Adviser believes that the program may assist in stabilizing the Fund's net assets, to the benefit of the Fund and its shareholders, although there is no guarantee that the program will do so. To the extent the Fund's net assets do not decline, the Adviser may also benefit

Investing with the Fund

PURCHASE AND INVESTMENT MINIMUMS

Investors can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. Investors can obtain an Account Application for initial investment. The minimum initial investment in the Institutional Class is \$1,500, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100. However, as described herein, no minimum investment amount is imposed for investments in retirement plans. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. The Fund reserves the right to waive or lower purchase and investment minimums in certain circumstances. For example, the minimums listed above may be waived or lowered for investors who are Trustees or officers of the Fund, employees of the Adviser and/or customers of certain financial intermediaries that hold the Fund's shares in certain omnibus accounts, at the discretion of the officers of the Fund. In addition, financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

SHARE PRICE

Net Asset Value. The share price, also called net asset value, of each share class of the Fund is the value of a single share of that class. The Fund calculates the share price as of the close of trading on the New York Stock Exchange ("NYSE"), every day the NYSE is open, normally 4:00 p.m. Eastern time. The NYSE is closed not only on weekends but also on customary holidays, which currently are New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Non-U.S. securities owned by the Fund may trade on weekends or other days when the Fund does not price its shares. As a result, the net asset value may change on days when you will not be able to purchase or redeem the shares. The share price is rounded to the nearest cent per share and equals the market value of all portfolio securities plus other assets, less all liabilities, divided by the number of shares outstanding. Orders received by dealers before the NYSE closes on any business day are priced based on the share price for that day, as described in greater detail

below. Orders received by UMB Fund Services, Inc. at the P.O. Box address are priced based upon the Fund's share price at the close of trading on the day received at the P.O. Box.

The Fund uses various methods and inputs to establish the value of its investments, other assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve. Equity securities are generally valued each day at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are principally traded, as of the close of business on that day. If there have been no sales that day, or if an equity security is unlisted, such equity securities are generally valued at the last available bid price. Fixed income securities are valued at the last reported sales price, if available and if the security is actively traded. Most fixed income securities are generally valued at prices obtained from pricing vendors. If no such vendor prices are available, such fixed income securities are valued using at least three broker quotes (or two broker quotes if three are not available). Vendors value fixed income securities based on one or more of the following inputs: transactions, bids, offers, quotations from dealers and trading systems, spreads and other relationships observed in the markets among comparable securities, benchmarks, underlying equity of the issuer, and proprietary pricing models such as cash flows, financial or collateral performance and other reference data (includes prepayments, defaults, collateral, credit enhancements, and interest rate volatility). Fixed-income and convertible securities listed on a national securities exchange for which the over-the-counter market more accurately reflects the securities' value in the judgment of the Fund's officers, are valued at the most recent bid price. Currency forwards are valued at the closing currency exchange rate which is typically not materially different from the forward rate. Short-term corporate notes with maturities of 60 days or less are valued at amortized cost.

Securities for which representative market quotations are not readily available or are considered unreliable by the Adviser are valued as determined in good faith under fair valuation procedures adopted by authority of the Board. For example, if trading in a security has been halted, suspended or otherwise materially restricted; a security has been de-listed from a national exchange; a security has not been traded for an extended period of time; there is other data that may call into question the reliability of market quotations; or if events occur between the close of markets outside the United States and the close of regular trading on the NYSE that, in the opinion of the Adviser, materially affect the value of any of the Fund's securities that trade principally in those international markets, those securities will be valued in accordance with such fair value procedures. Various inputs may be reviewed in order to make a good faith determination of a security's value. These inputs include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; financial statements of the issuer; size of the holding; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; changes in overall market conditions; reports prepared by internal or external analysts, third party pricing consultants and/or industry experts; valuations from brokers and/or market makers; and other factors that the Adviser reasonably believes to be relevant under the circumstances. Special valuation considerations may apply with respect to "odd-lot" fixed-income transactions, which due to their small size, may receive evaluated prices by pricing services that reflect a large block trade and not what actually could be obtained for the odd-lot position. Fair valuations and valuations of investments that are not actively trading involve judgment

and may differ materially from valuations of investments that would have been used had greater market activity occurred. Use of fair valuation procedures is intended to result in more appropriate net asset values.

Additional fair value procedures are followed to address issues related to Fund holdings outside the United States. Non-U.S. securities held by the Fund trade in markets that open and close at different times, reflecting time zone differences. If significant events occur after the close of a market (and before the Fund's net asset value is next determined) which affect the value of these portfolio securities, appropriate adjustments from closing market prices may be made to reflect these events. Events of this type could include, for example, significant price changes in other markets. The Fund may utilize an independent fair valuation service in adjusting the valuations of non-U.S. securities. In addition, such use is intended to reduce potential arbitrage opportunities otherwise available to short-term investors.

Orders received by authorized dealers, certain retirement plans and certain other financial intermediaries before the NYSE closes, if communicated to UMB Fund Services, Inc. by later deadlines on the following business day, are priced at the share price for the prior business day. The share price for sales (redemptions) of shares is the first share price determined after UMB Fund Services, Inc. receives a properly completed request, except that sale orders received by an authorized dealer, certain retirement plans and certain other financial intermediaries before the NYSE closes are priced at the closing price for that day if communicated to UMB Fund Services, Inc. within the times specified by the Fund. No other action is required by the shareholder who places an order with a financial intermediary.

How to Buy Fund Shares

Investors may purchase shares on any business day by written request, check, wire, ACH (Automated Clearing House), telephone, or through dealers as further described in this prospectus. You may conduct transactions by mail (FPA Funds, c/o UMB Fund Services, Inc., P.O. Box 2175, Milwaukee, Wisconsin 53201-2175, or 235 West Galena Street, Milwaukee, Wisconsin 53212), by wire, or by telephone at (800) 638-3060. Purchases and redemptions by telephone are only permitted if you previously established this option in your account. You can use the Account Application for initial purchases.

Investors can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. The minimum initial investment in the Institutional Class is \$1,500, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100. However, as described herein, no minimum investment amount is imposed for investments in retirement plans. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. The Fund reserves the right to waive or lower purchase and investment minimums in certain circumstances. For example, the minimums listed above may be waived or lowered for investors who are Trustees or officers of the Fund, employees of the Adviser and/or customers of certain financial intermediaries that hold the Fund's shares in certain omnibus accounts, at the discretion of the officers of the Fund. In addition, financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

Subsequent investments can be made directly to UMB Fund Services, Inc.

Federal regulations may require the Fund to obtain your name, your date of birth (for a natural person), your residential street address or principal place of business and your Social Security Number, Employer Identification Number or other government issued identification when you open an account. Additional information may be required in certain circumstances or to open accounts for corporations or other entities, and certain information regarding beneficial ownership will be verified, including information about beneficial owners of such entities. The Fund may use this information to attempt to verify your identity and, for legal entities, the identity of beneficial owners. The Fund may not be able to establish an account if the necessary information is not received. The Fund may also place limits on account transactions while it is in the process of attempting to verify your identity and, for legal entities, the identity of beneficial owners. Additionally, if the Fund is unable to verify the identity of you or your beneficial owners after your account is established, the Fund, the Fund's distributor and the Fund's transfer agent each reserve the right to reject further purchase orders from you or to take such other action as they deem reasonable or required by law, including closing your account. If your account is closed for this reason, your shares will be redeemed at the NAV next calculated on the date your account is closed, and you bear the risk of loss.

How to Redeem Your Shares

Redeeming (Selling) Your Shares—Redemption Payments May Be Made By Check, Wire or ACH. You can redeem (sell) for cash without charge any or all of your shares at any time by sending a written request to UMB Fund Services, Inc. Faxes are not acceptable. You can also place redemption requests through dealers, but they may charge a fee. If you are selling shares from a retirement plan, you should consult the plan documentation concerning federal tax consequences and consult your plan custodian about applicable procedures for selling shares.

The amount of time for a redeeming shareholder to receive redemption proceeds will vary based on the method of payment elected (*i.e.*, ACH, wire, check). Redemption proceeds by check will generally be mailed to you within three to seven business days after UMB Fund Services, Inc., receives a properly completed redemption request; and redemption proceeds by ACH or wire will generally be sent to you within one to three business days after UMB Fund Services, Inc., receives a properly completed redemption request (as described below under "Written Requests" and "Telephone Transactions"). Generally your redemption request cannot be processed on days the NYSE is closed. If you purchase shares by check and request a redemption before the check has cleared, the Fund may postpone payment of your redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemption proceeds are normally paid in cash; however, subject to the limits described below in "In-Kind Transactions," the Fund reserves the right to make payment for redeemed shares wholly or in part by giving the redeeming shareholder portfolio securities. For cash redemptions, under normal market conditions, the Fund typically expects to meet such redemption requests by using holdings of cash or cash equivalents and/or proceeds from the sale of portfolio securities. In addition, for temporary or emergency purposes, the Fund may borrow to meet redemption requests.

The right of redemption can be suspended and the payment therefore may be postponed for more than seven days during any period when: (a) the NYSE is closed for other than customary weekends or holidays; (b) trading on the NYSE is restricted; (c) an emergency exists as a result of which disposal by the Fund of securities it owns is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets; or (d) the Securities and Exchange Commission, by order, so permits.

The Fund's transfer agent, consistent with relevant regulatory guidance or court rulings, may place a temporary hold on the payment of redemption proceeds from an account if the transfer agent reasonably believes that financial exploitation of a Specified Adult (as defined below) has occurred, is occurring, has been attempted, or will be attempted. For purposes of this paragraph, the term "Specified Adult" refers to an individual who is (A) a natural person age 65 and older, or (B) a natural person age 18 and older who is reasonably believed to have a mental or physical impairment that renders the individual unable to protect his or her own interests.

Written Requests. Requests must be signed by the registered shareholder(s). A signature guarantee is required if the redemption is made payable to someone other than the registered shareholder, being sent to somewhere other than the registered address or being sent to the address of record if that address of record has been changed within the past 30 days.

A signature guarantee must be a Stamp 2000 Medallion Signature Guarantee and can be obtained from a bank or trust company; a broker or dealer; a credit union; a national securities exchange, registered securities association or clearing agency; or a savings and loan association. Additional documents such as articles of incorporation, business licenses, partnership agreements or trust documents may be required for sales by corporations, partnerships, trusts, fiduciaries, executors or administrators.

Telephone Transactions. You must elect the option on the Account Application to have the right to sell your shares by telephone. If you wish to make an election to have the right to sell your shares via telephone or to change such an election after opening an account, you will need to complete an Account Privileges Change Form with a signature guarantee. Sales via telephone are not available for shares in certificate form.

If you have elected the option to sell your shares by telephone, you may direct that a check for the proceeds payable to the shareholder of record be mailed to the address of record or you may designate a bank account to receive the proceeds of such redemptions. There is a \$3.50 charge per wire. No telephone redemptions to the address of record will be processed within 30 days of a change in the address of record.

UMB Fund Services, Inc. uses procedures it considers reasonable to confirm redemption instructions via telephone, including requiring account registration verification from the caller and recording telephone instructions. Neither UMB Fund Services, Inc. nor the Fund is liable for losses due to unauthorized or fraudulent instructions if there is a reasonable belief in the authenticity of received instructions and reasonable procedures are employed. During periods of significant economic or market changes, it may be difficult to sell your shares by telephone.

The Fund can change or discontinue telephone redemption privileges without notice.

Automatic Redemption (Sale) of Your Shares. If as a result of a redemption, your account value falls below \$500, the Fund can direct UMB Fund Services, Inc. to redeem your remaining Fund shares. In such case, you will be notified in writing that your account value is insufficient and be given up to 60 days to increase it to \$500.

Escheatment. If your account is deemed “abandoned” or “unclaimed” under state law, the Fund may be required to “escheat” or transfer the assets in your account to the applicable state’s unclaimed property administration. The state may sell escheated Fund shares and, if you subsequently seek to reclaim your proceeds of liquidation from the state, you may only be able to recover the amount received when the shares were sold. Escheatment rules vary considerably by state. Please check your state’s unclaimed or abandoned property department website for specific information. It is your responsibility to ensure that you maintain a correct address for your account, keep your account active, and promptly cash all checks for dividends, capital gains and redemptions. Neither the Fund, the Fund’s transfer agent, the Fund’s distributor nor the Adviser or its affiliates will be liable to shareholders or their representatives for good faith compliance with state escheatment laws. Escheatment of an IRA account will be subject to 10% federal withholding tax and treated as a taxable distribution to you.

Excessive Trading and Market Timing. The Fund is not intended as a vehicle for frequent trading and/or market timing in an attempt to profit from short-term fluctuations in the securities markets and does not accommodate frequent trading. The Board has adopted policies and procedures designed to deter or prevent frequent purchases and redemptions. Such trading could interfere with the efficient management of the Fund’s portfolio, increase brokerage and administrative costs and dilute the value of Fund shares held by long-term investors. In addition, exchanges between this Fund and the other FPA Funds are limited to no more than four exchanges during any calendar year (see the section titled “How to Exchange Your Shares”). Irrespective of these exchange limits, the Fund reserves the right to reject any purchase request (including in connection with an exchange) if management determines in its discretion that the request may be part of a pattern of excessive trading that could adversely affect the Fund. Notifications will be made in writing by the Fund within five days. There can be no assurance that the Fund will successfully detect or prevent market timing.

How to Exchange Your Shares

You can add to an existing FPA Fund account or start a new FPA Fund account by exchanging your shares of the Fund for shares of other FPA Funds, namely FPA Flexible Fixed Income Fund, FPA New Income, Inc., FPA Queens Road Small Cap Value Fund, FPA Queens Road Value Fund, and FPA U.S. Core Equity Fund. The availability of shares of FPA New Income, Inc. to new investors is limited, as described in the FPA New Income, Inc. prospectus.

The Fund can change or discontinue the right to exchange Fund shares into other FPA Funds upon 60 days’ notice to shareholders.

You can exercise your exchange privileges either by written instructions or telephone (telephone exchange privileges are available unless you specifically decline them on the Account Application).

Exchanges and purchases are effected at the share price next determined after receipt of a proper request (as described above under “Written Requests”) by UMB Fund Services, Inc.

For federal income tax purposes, an exchange is treated as a sale of shares and could result in a capital gain or loss.

Exchanges are subject to the following restrictions:

- You are limited to four exchanges in one account during any calendar year;
- Shares must be owned 15 days before exchanging, and cannot be in certificate form unless you deliver the certificate when you request the exchange;
- An exchange is subject to the same initial investment minimums required for each particular FPA Fund and, at a minimum, requires the purchase of shares with a value of at least \$1,000; and
- Exchanges are subject to the same signature and signature guarantee requirements applicable to the redemption of shares.

Converting Shares

If you hold Institutional Class shares and are eligible to purchase Supra Institutional Class shares, which are offered under a separate prospectus, you may be eligible to convert your Institutional Class shares to Supra Institutional Class shares of the Fund, subject to the discretion of the Fund to permit or reject such a conversion. Please contact your financial intermediary, UMB Fund Services, Inc., or the Fund for information related to share class conversions.

A conversion between share classes of the Fund is generally expected to be a nontaxable event.

If you convert from one class of shares to another, the transaction will be based on the respective NAVs of the two classes on the trade date for the conversion. Consequently, a conversion may provide you with fewer shares or more shares than you originally owned, depending on that day’s NAV. At the time of conversion, the total dollar value of your “old” shares will equal the total dollar value of your “new” shares. However, subsequent share price fluctuations may decrease or increase the total dollar value of your “new” shares compared with that of your “old” shares.

For more information or for prospectuses for other FPA Funds, please visit <https://www.fpa.com/funds> or contact a dealer or UMB Distribution Services, LLC. You should read the prospectuses of these other Funds and consider differences in objectives and policies before making any exchange.

Other Shareholder Services

Investment Account. Each shareholder has an investment account in which UMB Fund Services, Inc. holds shares. You will receive a statement showing account activity after each transaction. Unless you make a written request, stock certificates will not be issued. Stock certificates are only issued for full shares.

In-Kind Transactions. Subject to procedures adopted by the Fund's Board and at the Fund's sole discretion, you may pay for shares of the Fund with securities instead of cash.

The Fund has agreed to redeem shares, with respect to any one shareholder of record during any 90-day period, solely in cash up to the lesser of \$250,000 or 1% of the net asset value of the Fund at the beginning of the period. Pursuant to procedures adopted by the Fund's Board, the Fund reserves the right in its sole discretion to honor any redemption request in excess of the foregoing limits by making payment in whole or in part in readily marketable securities chosen by the Fund and valued as such securities are valued for purposes of computing the Fund's net asset value. The Fund may also use redemptions in-kind for certain Fund shares redeemed by ReFlow. If payment is made in securities, a shareholder may incur transaction expenses in converting those securities to cash, may realize, upon receipt, a gain or loss for tax purposes, and will be exposed to market risk prior to and upon the sale of such securities or other property.

Pre-authorized Investment Plan. You may establish an account with a \$100 minimum initial investment and the establishment of automatic monthly investments of at least \$100. To make automatic monthly investments, you must complete the Account Application available from dealers or UMB Distribution Services, LLC. UMB Fund Services, Inc. will withdraw funds from your bank account monthly for \$100 or more as specified through the Automated Clearing House.

Retirement Plans. A retirement plan account and/or an IRA can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. Investments can be made directly to UMB Fund Services, Inc., and no minimum investment amount is imposed for subsequent investments in retirement plans. UMB Fund Services, Inc. currently charges an annual account maintenance fee of \$15 on retirement accounts. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. Please note that financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

You should consult your tax adviser about the implications of investing in Fund shares through a retirement account. Persons with earned income ineligible for deductible contributions generally may make non-deductible contributions to an IRA. The earnings on shares held in an IRA are generally tax-deferred. In addition, although contributions to a Roth IRA are not deductible, earnings in the account generally are not taxed even on withdrawal. Retirement-related tax matters are complicated and you should consult your tax adviser about them. UMB Distribution Services, LLC and dealers have applicable forms and information regarding plan administration, custodial fees and other plan documents.

Systematic Withdrawal Plan. If you have an account with a value of \$10,000 or more, you can make monthly, quarterly, semi-annual or annual withdrawals of \$50 or more by electing this option on the Account Privileges Change Form. Under this arrangement, sufficient Fund shares will be sold to cover the withdrawals and the proceeds will be forwarded to you as directed on the Account Privileges Change Form. If withdrawals continually exceed reinvestments, your account will be reduced and ultimately exhausted. Please note that concurrent withdrawals and purchases are ordinarily not in your best interest and you will generally recognize any taxable gains or losses on the withdrawals.

Shareholder Servicing Arrangements. Brokers, dealers, banks, trust companies and other financial representatives may receive compensation from the Fund or its service providers for providing a variety of services. This section briefly describes how the financial representatives may be compensated.

For providing certain services to their clients, financial representatives may be paid a fee based on the assets or number of accounts of the Fund that are attributable to the financial representative. These services may include recordkeeping, transaction processing for shareholders' accounts and certain shareholder services not currently offered to shareholders that deal directly with the Fund. In addition, your financial representatives may charge you other account fees for buying or redeeming shares of the Fund or for servicing your account. Your financial representative should provide you with a schedule of its fees and services.

The Fund may pay all or part of the fees paid to financial representatives. The Fund does not pay these service fees on shares purchased directly. In addition, the Adviser may, at its own expense, pay financial representatives for these services.

UMB Distribution Services, LLC, the Fund's principal underwriter, may enter into agreements with selling dealers where the selling dealer waives its right to shareholder servicing fees for selling Fund shares or servicing shareholder accounts. These arrangements typically are intended to avoid duplicate payment of fees where the selling dealer's transactions are through an omnibus account with a different clearing broker and that broker is entitled to receive shareholder servicing fees from the Fund.

The Adviser may, at its own expense and out of its own resources, pay financial representatives for distribution and marketing services performed with respect to the Fund. These payments by the Adviser may include one or more of the following types of payments: one-time account establishment fees, annual per-account fees and/or annual asset-based charges. These payments may create a conflict of interest by influencing the broker or financial intermediary and your salesperson to recommend the Fund over another investment. For more information, ask your salesperson or visit your financial intermediary's website.

Distributions and Taxes

DISTRIBUTIONS

The Fund earns income from its investments and distributes that income, if and to the extent it exceeds expenses, to its shareholders as dividends. The Fund also realizes capital gains and losses from the sale or exchange of its investments and distributes any net capital gains to its shareholders as capital gain distributions (as used in this section, together with income dividends, “distributions”). The Fund distributes any distributions at least annually.

Distributions the Fund pays may be reinvested automatically in Fund shares at net asset value or taken in cash. If your account is held directly with the Fund and you would like to receive distributions in cash, contact UMB Fund Services, Inc. at 800-638-3060. If your account is with a securities dealer or other financial intermediary that has an agreement with the Fund, contact your dealer or intermediary about which option you prefer.

TAXES

Except for tax-advantaged retirement plans and accounts and other tax-exempt investors, all Fund distributions you receive generally are subject to federal income tax, whether you receive them in cash or reinvest them in additional shares. Fund distributions to IRAs (including Roth IRAs) and qualified retirement plans generally are tax-free, but may be taxable upon later distribution from such accounts.

Distributions of net investment income, the excess of net short-term capital gain over net long-term capital loss, and net gains (if any) from certain non-U.S. currency transactions (*i.e.*, “dividends”) are generally taxed as ordinary income. The Fund’s dividends attributable to “qualified dividend income” (generally, dividends it receives on stock of most U.S. and certain non-U.S. corporations with respect to which the Fund satisfies certain holding period and other restrictions) are subject to federal income tax for individual and certain other non-corporate shareholders (each, an “individual shareholder”) who satisfy those restrictions with respect to their Fund shares at the rates for long-term capital gains—a maximum of 15% or 20%, depending on whether the individual shareholder’s income exceeds certain threshold amounts.

Distributions of net capital gain (*i.e.*, the excess of net long-term capital gain over net short-term capital loss) are generally taxed as long-term capital gain and, for individual shareholders, are subject to the 15% or 20% maximum federal income tax rates mentioned above. The tax treatment of capital gain distributions from the Fund depends on how long the Fund held the securities it sold that generated the gain, not when you bought your Fund shares or whether you reinvested your distributions.

Fund distributions generally are taxable to you in the year you receive them. In some cases, however, distributions you receive in January are taxable as if they had been paid the previous December 31.

When you sell (redeem) shares, including pursuant to an exchange, you generally will realize a taxable gain or loss. An exception, once again, applies to tax-advantaged retirement plans and

accounts and other tax-exempt investors. Any capital gain that an individual shareholder recognizes on a redemption of his or her shares that have been held for more than one year will qualify for the 15% or 20% maximum federal income tax rates mentioned above.

The federal income tax you actually owe on distributions and share transactions can vary with many factors, such as your marginal tax bracket, how long you held your shares and whether you owe federal alternative minimum tax. Shortly after the end of each calendar year, the Fund will send you a tax statement that will detail the distributions you received during that year and will show their tax status. This may be separate from the statement that covers your share transactions. Most importantly, consult your tax professional. Everyone's tax situation is different, and your tax professional should be able to help you answer any questions you may have.

The Fund is required to withhold 24% of the money you are otherwise entitled to receive from its distributions and redemption proceeds (regardless of whether you realize a gain or loss) if you are an individual shareholder who fails to provide a correct taxpayer identification number to the Fund (together with the withholding described in the next sentence, "backup withholding"). Withholding at that rate also is required from the Fund's distributions to which you are otherwise entitled if you are such a shareholder and the Internal Revenue Service ("Service") tells the Fund that you are subject to backup withholding or you are subject to backup withholding for any other reason. Backup withholding is not an additional tax, and any amounts so withheld may be credited against a shareholder's federal income tax liability or refunded.

If you buy shares when the Fund has earned or realized, but not yet distributed, ordinary income or net capital gains, you will be "buying a dividend" by paying the full price of the shares and then receiving a portion of the price back in the form of a taxable distribution. You can avoid this situation by waiting to invest until after the record date for the distribution.

Distributions are taxable to you even if they are paid from income or gain earned by the Fund before your investment (and thus were included in the price you paid for your Fund shares).

The amounts of the Fund's distributions are driven by federal tax requirements. The Fund's required taxable distributions to shareholders may be significant even if the Fund's overall performance for the period is negative.

Generally, if you are investing in the Fund through a tax-advantaged retirement plan or account, distributions paid by the Fund are not taxable to you on a current basis (but may be taxable upon withdrawal from such plan or account).

An individual is required to pay a 3.8% tax on the lesser of (1) the individual's "net investment income," which generally includes distributions the Fund pays and net gains realized on the redemption or exchange of Fund shares, or (2) the excess of the individual's "modified adjusted gross income" over a threshold amount (\$250,000 for married persons filing jointly and \$200,000 for single taxpayers). This tax is in addition to any other taxes due on that income. A similar tax applies to estates and trusts. Shareholders should consult their own tax advisers regarding the effect, if any, this provision may have on their investment in Fund shares.

A Fund shareholder's basis in shares acquired after December 31, 2011 ("Covered Shares"), will be determined in accordance with the Fund's default method, which is HIFL (highest in, first long-term) basis, unless the shareholder affirmatively elects in writing (which may be electronic) to use the average basis method or a different acceptable basis determination method (*e.g.*, a specific identification method). The method a Fund shareholder elects (or the default method) may not be changed with respect to a redemption of Covered Shares after the settlement date of the redemption.

In addition to the requirement to report the gross proceeds from the redemption of shares, the Fund (or its administrative agent) must report to the Service and furnish to its shareholders the basis information for Covered Shares and indicate whether they had a short-term (one year or less) or long-term (more than one year) holding period. Fund shareholders should consult with their tax advisers to determine the best Service-accepted basis method for their tax situation and to obtain more information about how the basis reporting law applies to them.

Shareholders other than U.S. persons may be subject to a different U.S. federal income tax treatment, including withholding tax at the rate of 30% on amounts treated as ordinary dividends from the Fund, as discussed in more detail in the SAI.

This section summarizes some of the consequences under current federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. **Consult your tax adviser about the potential tax consequences of an investment in the Fund under all applicable tax laws.**

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years. Certain information reflects financial results for a single share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund purchased at net asset value and assuming reinvestment of all dividends and distributions. The information for the year ended December 31, 2017 has been audited by another independent registered public accounting firm. The information for the years ended December 31, 2018, December 31, 2019, December 31, 2020, and December 31, 2021 has been audited by Ernst & Young, LLP, whose report dated February 28, 2022, along with the Fund's financial statements and related notes, is included in the Fund's annual report, which is available upon request.

Institutional Class	Year Ended December 31				
	2021	2020	2019	2018	2017
Per share operating performance:					
Net asset value at beginning of year	\$ 35.97	\$ 33.83	\$ 29.53	\$ 34.69	\$ 32.61
Income from investment operations:					
Net investment income ^(a)	— ^(b)	0.18	0.62	0.24	0.23
Net realized and unrealized gain (loss) on investment securities	5.34	3.69	5.25	(2.78)	3.14
Total from investment operations	\$ 5.34	\$ 3.87	\$ 5.87	\$ (2.54)	\$ 3.37
Less distributions:					
Dividends from net investment income	(0.29)	(0.11)	(0.80)	(0.21)	(0.34)
Distributions from net realized capital gains	(4.01)	(1.62)	(0.77)	(2.41)	(0.95)
Total distributions	\$ (4.30)	\$ (1.73)	\$ (1.57)	\$ (2.62)	\$ (1.29)
Redemption fees	— ^(b)	— ^(b)	— ^(b)	— ^(b)	— ^(b)
Net asset value at end of year	\$ 37.01	\$ 35.97	\$ 33.83	\$ 29.53	\$ 34.69
Total investment return	15.17%	12.11%	20.02%	(7.43)%	10.39%
Ratios/supplemental data:					
Net assets, end of year (000's)	\$ 8,394,402	\$ 8,903,455	\$ 14,009,883	\$ 13,707,240	\$ 17,484,747
Ratio of expenses to average net assets:					
Before reimbursement from Adviser	1.17% ^(c)	1.15% ^(c)	1.23% ^(c)	1.18% ^(c)	1.10% ^(c)
After reimbursement from Adviser	1.14% ^(c)	1.13% ^(c)	1.23% ^(c)	1.18% ^(c)	1.10% ^(c)
Net investment income:					
Before reimbursement from Adviser	(0.03)%	0.54%	1.90%	0.70%	0.66%
After reimbursement from Adviser	0.01%	0.56%	1.90%	0.70%	0.66%
Portfolio turnover rate	20%	29%	23%	64%	18%

(a) Per share amount is based on average shares outstanding.

(b) Rounds to less than \$0.01 per share.

(c) For the periods ended December 31, 2021, December 31, 2020, December 31, 2019, December 31, 2018 and December 31, 2017, the expense ratio includes short sale dividend expense equal to 0.09%, 0.07%, 0.16%, 0.11% and 0.03% of average net assets, respectively.
