

Important Disclosures

This update is for informational and discussion purposes only and does not constitute, and should not be construed as, an offer or solicitation for the purchase or sale with respect to any securities, products or services discussed, and neither does it provide investment advice. Any such offer or solicitation shall only be made pursuant to the Fund's Prospectus which supersedes the information contained herein in its entirety.

The views expressed herein and any forward-looking statements are as of the date of the publication and are those of the portfolio management team. Future events or results may vary significantly from those expressed and are subject to change at any time in response to changing circumstances and industry developments. This information and data has been prepared from sources believed reliable, but the accuracy and completeness of the information cannot be guaranteed and is not a complete summary or statement of all available data.

Thomas Atteberry and Abhijeet Patwardhan have been portfolio managers in this strategy since November 2004 and November 2015, respectively, and manage the strategy in a manner that is substantially similar to the prior portfolio manager, Robert Rodriguez. Mr. Rodriguez ceased serving as the strategy's portfolio manager effective December 2009.

In relation to the Fund, portfolio composition will change due to ongoing management of the funds. References to individual securities are for informational purposes only and should not be construed as recommendations by the funds, the portfolio managers, the Adviser, or the distributor. It should not be assumed that future investments will be profitable or will equal the performance of the security examples discussed. The portfolio holdings as of the most recent quarter-end may be obtained at www.fpa.com.

The statements made herein may be forward-looking and/or based on current expectations, projections, and/or information currently available. Actual results may differ from those anticipated. The portfolio managers and/or FPA cannot assure future results and disclaims any obligation to update or alter any statistical data and/or references thereto, as well as any forward-looking statements, whether as a result of new information, future events, or otherwise. Such statements may or may not be accurate over the long-term.

Investments, including investments in mutual funds, carry risks and investors may lose principal value. Capital markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Fund may purchase foreign securities, which are subject to interest rate, currency exchange rate, economic and political risks; this may be enhanced when investing in emerging markets. The securities of smaller, less well-known companies can be more volatile than those of larger companies.

The return of principal in a bond fund is not guaranteed. Bond funds have the same issuer, interest rate, inflation and credit risks that are associated with underlying bonds owned by the Fund. Lower rated bonds, convertible securities and other types of debt obligations involve greater risks than higher rated bonds.

Interest rate risk is the risk that when interest rates go up, the value of fixed income securities, such as bonds, typically go down and investors may lose principal value. Credit risk is the risk of loss of principal due to the issuer's failure to repay a loan. Generally, the lower the quality rating of a security, the greater the risk that the issuer will fail to pay interest fully and return principal in a timely manner. If an issuer defaults the security may lose some or all of its value. Credit ratings range from AAA (highest) to D (lowest). Securities rated BBB or above are considered investment grade. Securities rated BB and below are lower-rated securities (junk bonds). High-yielding, non-investment grade bonds (junk bonds) involve higher risks than investment grade bonds.

Mortgage securities and collateralized mortgage obligations (CMOs) are subject to prepayment risk and the risk of default on the underlying mortgages or other assets; such derivatives may increase volatility. Convertible securities are generally not investment grade and are subject to greater credit risk than higher-rated investments. High yield securities can be volatile and subject to much higher instances of default.
