Dividend distributions are the net income from dividends and interest earned by fund securities. Distributions may include ordinary income, net capital gains and/or returns of capital. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. All mutual funds periodically distribute profits they earn to investors. By law, if a fund has net gains from the sale of securities, or if it earns dividends and interest from securities, it must pass substantially all of those earnings to its shareholders or it will be subject to corporate income taxes and excise taxes. These taxes would, in effect, reduce investors' total return. For more information, including how these distributions are taxed, please see the Fund's Prospectus.

First Pacific Advisors, LP does not provide legal, accounting, or tax advice. Please contact your accounting or tax advisor and/or legal counsel to review the impact of any distributions on your situation and discuss possible tax strategies.
