

FPA New Income Fund

PROSPECTUS

January 31, 2026

Institutional Class Shares - (FPNIX)

Investor Class Shares - (FPNRX)

FPA New Income Fund (the “Fund”), a series of Investment Managers Series Trust III, seeks to provide long-term total return, which includes income and capital appreciation, while considering capital preservation. The Fund’s portfolio manager invests the Fund’s assets primarily in a diversified portfolio of debt securities, cash and cash equivalents.

THE SECURITIES AND EXCHANGE COMMISSION HAS NOT APPROVED OR DISAPPROVED THESE SECURITIES OR PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

SUMMARY SECTION—FPA NEW INCOME FUND

Investment Objective

The FPA New Income Fund (the “Fund”) seeks to provide long-term total return, which includes income and capital appreciation, while considering capital preservation.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Shareholder Fees <i>(fees paid directly from your investment)</i>	Institutional Class	Investor Class
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of original sales price or redemption proceeds, as applicable)	None	None
Exchange Fee	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management fees	0.50%	0.50%
Distribution (Rule 12b-1) fees	None	None
Other Expense	0.09%	0.27%
Shareholder Service fee	0.07%	0.25%
All other expenses	0.02%	0.02%
Total Annual Fund Operating Expenses	0.59%	0.77%
Expense Reimbursement ¹	(0.14)%	(0.22)%
Total Annual Fund Operating Expenses after Expense Reimbursement¹	0.45%	0.55%

1 The Fund’s investment adviser has contractually agreed to reimburse the Fund for Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage fees and commissions payable by the Fund in connection with the purchase or sale of portfolio securities, and extraordinary expenses, including litigation expenses not incurred in the Fund’s ordinary course of business) in excess of 0.454% of the average daily net assets of the Institutional Class shares of the Fund through January 31, 2027, and in excess of 0.554% of the average daily net assets of the Investor Class shares of the Fund through January 31, 2027. This agreement may only be terminated earlier by the Fund’s Board of Trustees (the “Board”) or upon termination of the Advisory Agreement.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example reflects the Fund's contractual expense reimbursement for the term of the expense reimbursement. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	One Year	Three Years	Five Years	Ten Years
Institutional Class	\$46	\$175	\$315	\$725
Investor Class	\$56	\$224	\$406	\$934

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year ended September 30, 2025, the Fund’s portfolio turnover rate was 41% of the average value of its portfolio. The Fund’s portfolio turnover rate may vary from year to year as well as within a year.

Principal Investment Strategies

The Fund primarily invests in a diversified portfolio of debt instruments, cash and cash equivalents. The Fund generally invests in highly rated debt instruments and invests at least 75% of its total assets, calculated at market value at the time of purchase, in debt instruments rated at least A- or its equivalent by a nationally recognized statistical rating organization (“NRSRO”) and in cash equivalent securities.

Under normal circumstances, the Fund invests primarily in the following debt instruments, among others:

- Corporate bonds, municipal bonds, bank loans, bonds issued by governments and their agencies and instrumentalities, mortgage-backed pools, sovereign debt, and obligations of supra-national agencies, including international development institutions that provide global financing and advisory services for economic development.
- Structured investments, commercial mortgage-backed securities, residential mortgage-backed securities, collateralized mortgage obligations (“CMOs”), asset-backed securities, collateralized loan obligations (“CLOs”), collateralized debt obligations (“CDOs”) and structured notes. The Fund may invest a significant portion of its portfolio in these investments.

- Cash equivalent securities, which may include publicly traded securities issued by the U.S. government or agencies of the U.S. government, money market funds, certificates of deposit, commercial paper, repurchase agreements, bankers' acceptances and other similar short-term bonds.

The Fund may invest up to 25% of its total assets, calculated at market value at the time of purchase, in debt instruments that are rated below A- or its equivalent by an NRSRO, which may include securities that are in default, or that are unrated.

The Fund may also invest up to 25% of its total assets, calculated at market value at the time of purchase, in securities of non-U.S. governments and corporations, non-U.S. structured investments or in securities that are not denominated in U.S. dollars; and up to 15% of its total assets, calculated at market value at the time of purchase, in stripped mortgage securities (such as interest-only and principal-only classes of collateralized mortgage obligations), collateralized mortgage obligations structured as accrual certificates, also known as Z-Bonds, and inverse floating rate debt instruments.

The Fund may also invest up to 5% of its total assets, calculated at market value at the time of purchase, in preferred stocks.

The Fund may hold investments in common stocks and rights to purchase common stocks. Such investments are typically received as a result of a conversion, corporate restructuring or recapitalization. Further, common stocks may be purchased as a result of exercising such rights, or purchased to increase an existing investment in common stocks. The Fund may also hold investments in privately placed securities.

The Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis. The Fund may also invest in currency forwards, swaps and other certain currency derivatives, in each case for hedging purposes only.

Principal Risks

Risk is inherent in all investing and you could lose money by investing in the Fund. A summary description of certain principal risks of investing in the Fund is set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective.

Interest Rate Risk. As with most funds that invest in debt instruments, changes in interest rates are one of the most important factors that could affect the value of an investment in the Fund. Interest rate risk is the risk that debt instruments will decline in value because of increases in interest rates. Rising interest rates tend to cause the prices of debt instruments (especially those with longer maturities) and the Fund's share price to fall. When interest rates rise from a low level, fixed income securities markets may experience lower prices, increased volatility and lower liquidity. The negative impact on fixed income securities from rate increases, regardless of the cause, could be swift and significant, which could result in significant losses by the Fund, even if such rate increases are anticipated by the portfolio manager.

Market Risk. The market price of investments owned by the Fund may go up or down, sometimes rapidly or unpredictably. Fund investments may decline in value due to factors affecting the overall markets, or particular industries or sectors. The value of a holding may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for an issuer's financial condition, national or international political events, war, acts of terrorism, inflation/deflation, market disruptions, public health emergencies, such as the spread of infectious illness or disease, natural disasters or climate events, changes in interest or currency rates, domestic or international monetary policy or adverse investor sentiment generally. The value of a holding may also decline due to factors that affect a particular industry or industries, such as tariffs, labor shortages or increased production costs, competitive conditions within an industry, or government regulations. The Fund may experience heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of an investment in the Fund to unexpectedly decline. Shareholder redemptions may also cause the Fund to engage in "odd-lot" fixed income transactions, which due to their small size, may result in the Fund receiving substantially lower value on such transactions than if the Fund had engaged in a large block trade of such securities.

Mortgage-Related and Asset-Backed Securities Risk. Mortgage-related and other asset-backed securities represent interests in "pools" of mortgages or other assets such as consumer loans or receivables held in trust and often involve risks that are different from or possibly more acute than risks associated with other types of debt instruments. Mortgage-related securities, including commercial mortgage-backed securities ("CMBS") and residential mortgage-backed securities ("RMBS") are subject to prepayment risk and can be highly sensitive to changes in interest rates. The risks of an investment in a CDO depend largely on the type of collateral securities and the class of the CDO in which the Fund's invests. In addition to the normal risks associated with credit-related securities (*e.g.*, interest rate risk and default risk), CDOs carry additional risks including, but not limited to, the risk that: (i) distributions from collateral securities may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Fund may invest in CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results. Investments in CDOs are also more difficult to value than other investments. Mortgage-backed securities, and in particular those not backed by a government guarantee, are subject to credit risk. The Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Collateralized Loan Obligations ("CLO") Risk. A CLO is a trust collateralized by a pool of credit-related assets. While CLOs are subject to the typical risks associated with debt instruments (*i.e.*, including default, interest rate and prepayment risks), the Fund is also subject to asset manager, legal and regulatory, limited recourse, liquidity, redemption and reinvestment risks as a result of the structure of CLOs in which the Fund may invest. A CLO's performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. Changes in the regulation of CLOs may adversely affect the value of the CLO investments held by the Fund and the ability of the Fund to execute its investment strategy. CLO debt is payable solely from the proceeds of the CLO's underlying assets and, therefore, if the income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment. CLO debt securities

may be subject to redemption and the timing of redemptions may adversely affect the returns on CLO debt. The CLO manager may not find suitable assets in which to invest and the CLO manager's opportunities to invest may be limited.

Bank Loan Risk. The Fund's investments in secured and unsecured participations in bank loans and assignments of such loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest which will expose the Fund to the credit risk of both the financial institution and the underlying borrower. The market for bank loans may not be highly liquid and the Fund may have difficulty selling them.

Municipal Bond Risk. The value of municipal bonds that depend on a specific revenue source or general revenue source to fund their payment obligations may fluctuate as a result of changes in the cash flows generated by the revenue source(s) or changes in the priority of the municipal obligation to receive the cash flows generated by the revenue source(s). In addition, changes in federal tax laws or the activity of an issuer may adversely affect the tax-exempt status of municipal bonds. There is no guarantee that a municipality will pay interests or repay principal.

Stripped Securities Risk. Stripped securities are more volatile than securities for which the principal and interest payments have not been separated. The value of stripped securities generally fluctuates more in response to interest rate movements than the value of traditional bonds because a change in interest rates may increase or decrease prepayments of principal. The market for stripped securities may be limited, which may make it difficult for the Fund to dispose of them quickly at an acceptable price.

Credit Risk. Credit risk refers to the likelihood that an issuer will default on the payment of principal and/or interest on a security. Various factors could affect the issuer's actual or perceived willingness or ability to make timely interest or principal payments, including changes in the issuer's financial condition or in general economic conditions.

Call Risk. Issuers of callable bonds are permitted to redeem these bonds before their final maturity. If an issuer calls a security in which the Fund is invested, the Fund could lose potential price appreciation and be forced to reinvest the proceeds in securities that bear a lower interest rate or more credit risk.

Liquidity Risk. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price.

Large Investor Risk. Ownership of shares of the Fund may be concentrated in one or a few large investors. Such investors may redeem shares in large quantities or on a frequent basis. Redemptions by a large investor may affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income to shareholders and may increase transaction costs. These transactions potentially limit the use of any capital loss carryforwards and certain other losses to offset future realized capital gains (if any). Such transactions may also increase the Fund's expenses. In addition, the Fund may be delayed in investing new cash after a large shareholder purchase, and under such circumstances may be required to maintain a larger cash position than it ordinarily would.

Management and Strategy Risk. The value of your investment depends on the judgment of the Adviser about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. The Fund is subject to management risk as an actively managed investment portfolio. The portfolio manager will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Private Placements and Restricted Securities Risk. Private placement securities are securities that are not registered under the federal securities laws, and are generally eligible for sale only to certain eligible investors. The Fund may invest in securities that are purchased in private placements. Because there may be relatively few potential purchasers for such investments, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult to sell such securities when FPA believes it advisable to do so or may be able to sell such securities only at prices lower than if such securities were more widely held. At times, it may also be more difficult to determine the fair value of such securities for purposes of computing the net asset value of the Fund. The sale of such investments may also be restricted under securities laws.

U.S. Government Securities Risk. Certain U.S. government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae) may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. government, and involve increased credit risks in comparison to U.S. Treasury securities or other securities supported by the full faith and credit of the U.S. government.

Risks Associated with Investing in High Yield Securities. High yield bonds, which are sometimes called "junk" bonds, are highly speculative securities that are usually issued by smaller, less credit-worthy and/or highly leveraged (indebted) companies. High yield securities are generally subject to greater levels of credit, call and liquidity risks than higher-rated securities of similar maturity. In addition, such securities may, under certain circumstances, be less liquid than higher rated securities. These securities pay investors a premium (a high interest rate or yield) because of the potential illiquidity and increased risk of loss. These securities can also be subject to greater price volatility. In times of unusual or adverse market, economic or political conditions, these securities may experience higher than normal default rates.

Risks Associated with Investing in Repurchase Agreements. A repurchase agreement is a short-term investment. The Fund acquires a debt security that the seller agrees to repurchase at a future time and set price. If the seller declares bankruptcy or defaults, the Fund may incur delays and expenses liquidating the security. The security may also decline in value or fail to provide income.

Sovereign Debt Risk. An issuer of sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due. In the

event of a default by a governmental entity on a sovereign debt obligation, there may be few or no effective legal remedies for collecting on such debt.

Risks Associated with Investing in Non-U.S. Securities. Non-U.S. investments involve special risks not present in U.S. investments that can increase the chances that the Fund will lose money. The prices of non-U.S. securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. Changes in exchange rates and interest rates, and the imposition of sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and/or other governments may adversely affect the values of the Fund's non-U.S. investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. Emerging markets tend to be more volatile than the markets of more mature economies and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries.

Risks Associated with Deep Discount Securities. The high yield securities in which the Fund may invest may from time to time include debt securities of companies that are financially troubled, in default or are in bankruptcy or reorganization. These securities are called "deep discount securities" and are deeply discounted from their face value. A debt instrument purchased at a deep discount, but prior to default, may pay a very high effective yield. If the issuer cannot meet its debt obligations, however, the deep discount securities may stop generating income and lose its value or become worthless. A lack of reliable, objective data or market quotations may make it more difficult to value deep discount securities accurately. Insufficient liquidity in the deep discount security market may make it more difficult to dispose of such securities and may cause the Fund to experience sudden and substantial price declines.

Adjustable Rate Mortgage ("ARM") Risk. During periods of extreme fluctuations in interest rates, the resulting fluctuations of ARM rates could affect the ARMs' market value. Most ARMs generally have annual reset limits or "caps." Fluctuations in interest rates above these levels, thus, could cause the mortgage-backed securities to "cap out" and to behave more like long-term, fixed-rate debt securities. During periods of declining interest rates, of course, the coupon rates may readjust downward and result in lower yields.

Currency Transactions Risk. Currency hedging involves many risks such as leveraging risk, market risk, liquidity risk, counterparty risk, management risk, operational risk and legal risk. Currency derivative transactions are also subject to risks different from those of other derivative transactions and can be adversely affected by changes to government controls, limitations or restrictions on repatriation of currency, and manipulations or exchange restrictions imposed by governments and based on broader factors extrinsic to any particular country's economy. There can be no assurance that currency transactions or currency hedging techniques will be successful.

Over-the-Counter ("OTC") Investments Risk. Securities and derivatives traded in OTC markets may trade in smaller volumes, and their prices may be more volatile, than securities principally traded on securities exchanges. Such securities may be less liquid than more widely traded securities. In addition, the prices of such securities may include an undisclosed dealer markup, which the Fund pays as part of the purchase price.

Cybersecurity Risk. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the adviser and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder's ability to exchange or redeem Fund shares may be affected. The use of artificial intelligence and machine learning could exacerbate these risks. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of those securities could decline if the issuers experience cybersecurity incidents.

Recent Market Events. Periods of market volatility may occur in response to market events, public health emergencies, natural disasters or climate events, and other economic, political, and global macro factors. U.S. and international markets have recently experienced, and may continue to experience, periods of significant volatility due to various factors, including uncertainty regarding inflation and central banks' interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, and political and geopolitical events. In addition, wars or threats of war and aggression, such as Russia's invasion of Ukraine and the conflict among nations and militant groups in the Middle East, have led, and in the future may lead, to short term market volatility and may have adverse long term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments. Additionally, since the change in the U.S. presidential administration in 2025, the administration has pursued an aggressive foreign policy agenda, including actual or potential imposition of tariffs, which may have consequences on the United States' relations with foreign countries, the economy, and markets generally. These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance.

Performance

The Fund acquired the assets and liabilities of FPA New Income, Inc. (the "Predecessor Fund") following the reorganization of the Predecessor Fund on July 28, 2023. As a result of the acquisition, the Fund is the accounting successor of the Predecessor Fund. Performance results shown in the bar chart and the performance table below for periods through July 28, 2023, reflect the performance of the Predecessor Fund.

The bar chart and Average Annual Total Returns table below provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the 1, 5 and 10 calendar year periods compare with those of the Bloomberg U.S. Aggregate Bond Index, a broad-based securities market index, and with a measure of the change in cost of living plus 100 basis points. The past performance information shown below is for Institutional Class shares of the Fund. Although Institutional Class shares would have similar annual returns to Investor Class shares because the classes are invested in the same portfolio of securities, the returns for Investor Class shares will vary from Institutional Class shares because of the higher expenses paid by Investor Class shares. The chart and table reflect the reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

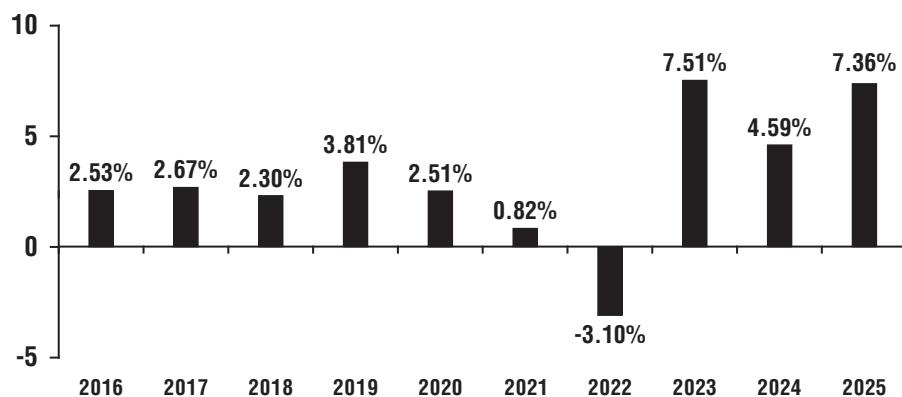

The Bloomberg U.S. Aggregate Bond Index is a market capitalization-weighted index, meaning the securities in the index are weighted according to the market size of each bond type. Most U.S.

traded investment grade bonds are represented. Municipal bonds and Treasury Inflation-Protected Securities are excluded, due to tax treatment issues. The index includes Treasury securities, Government agency bonds, mortgage-backed bonds, corporate bonds, and a small amount of non-U.S. bonds traded in the U.S. CPI + 100 is a measure of the consumer price index (“CPI”) plus an additional 100 basis points. The CPI is calculated by taking price changes for each item in the predetermined basket of goods and averaging them; the goods are weighted according to their importance. Changes in CPI are used to assess price changes associated with the cost of living.

To obtain updated monthly performance information, please visit the Fund’s website at <https://fpa.com/fund> or call (800) 982-4372.

Calendar Year Total Return (before taxes) for Institutional Class

For each calendar year at net asset value (“NAV”) per share

The Fund’s highest/lowest quarterly results during this time period were:

Institutional Class

Highest	3.79%	(Quarter ended 12/31/23)
Lowest	(1.74)%	(Quarter ended 03/31/22)

Average Annual Total Returns (for the periods ended December 31, 2025)	One Year	Five Years	Ten Years
Institutional Class Shares Before Taxes	7.36%	3.35%	3.06%
Institutional Class Shares After Taxes on Distributions ¹	6.35%	2.18%	1.92%
Institutional Class Shares After Taxes on Distributions and Sale of Fund Shares ¹	5.05%	2.14%	1.88%
Investor Class Shares Before Taxes ²	7.21%	3.28%	2.97%
Bloomberg U.S. Aggregate Bond Index (reflects no deductions for fees, expenses or taxes)	7.30%	(0.36)%	2.01%
CPI + 100	3.57%	5.50%	4.24%

¹ After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend upon an investor’s tax situation and may differ from those shown. After-tax returns presented here are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). Early withdrawal from a 401(k) account or an IRA could lead to taxation of the withdrawn amount

as ordinary income and could be subject to an additional tax penalty. The after-tax returns on distributions and sale of Fund shares may be higher than returns before taxes due to the effect of a tax benefit an investor may receive from the realization of capital losses that would have been incurred on the sale of Fund shares.

Investor Class shares commenced operations on April 30, 2024. The performance figures for Investor Class shares include the performance for the Institutional shares for the periods prior to the inception date of Investor Class shares, adjusted for the difference in Institutional Class shares and Investor Class shares expenses. Investor Class shares impose higher expenses than Institutional Class shares. Since Investor Class shares have higher expenses and are more expensive than Institutional Class shares, the returns for Investor Class shares are expected to be lower than the returns of the Institutional Class shares.

Investment Adviser

First Pacific Advisors, LP (“FPA” or the “Adviser”) is the Fund’s investment adviser.

Portfolio Managers

Abhijeet Patwardhan, Partner of the Adviser, is primarily responsible for the day-to-day management of the Fund’s portfolio. Mr. Patwardhan has served as the portfolio manager of the Fund since July 2023 and as the portfolio manager of the Predecessor Fund since November 2015.

Purchase and Sale of Fund Shares

Investors may purchase or redeem Fund shares on any business day by written request, check, wire, ACH (Automated Clearing House), telephone, or through dealers as further described in this Prospectus. You may conduct transactions by mail (FPA Funds, c/o UMB Fund Services, Inc., P.O. Box 2175, Milwaukee, Wisconsin 53201-2175, or 235 West Galena Street, Milwaukee, Wisconsin 53212), by wire, or by telephone at (800) 638-3060. Purchases and redemptions by telephone are only permitted if you previously established this option in your account. Investors can use the Account Application for initial purchases.

Investors can purchase shares by contacting any investment dealer authorized to sell the Fund’s shares. The minimum initial investment is \$1,500 for the Institutional Class Shares and Investor Class Shares, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100. However, as described herein, no minimum investment amount is imposed for subsequent investments in retirement plans. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. The Fund reserves the right to waive or lower purchase and investment minimums in certain circumstances. For example, the minimums listed above may be waived or lowered for investors who are customers of certain financial intermediaries that hold the Fund’s shares in certain omnibus accounts, at the discretion of the officers of the Fund. In addition, financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

Subsequent investments and redemptions can be made directly to UMB Fund Services, Inc.

Notice to Non-U.S. Resident Individual Shareholders. The Fund and its shares are only registered in the United States and its territories (“United States”). Regulations outside of the United States may restrict the sale of shares to certain non-U.S. residents or subject certain shareholder

accounts to additional regulatory requirements. As a result, individuals resident outside the United States are generally not eligible to invest in the Fund. The Fund reserves the right, however, to sell shares to certain other non-U.S. investors in compliance with applicable law. If a current shareholder of the Fund provides a non-U.S. address, this will be deemed a representation and warranty from such investor that he/she is not a U.S. resident and will continue to be a non-U.S. resident unless and until the Fund is notified of a change in the investor's resident status. Any current shareholder that has a resident address outside of the United States may be restricted from purchasing additional shares.

Tax Information

The Fund's distributions are taxable and will be taxed as ordinary income and/or long-term capital gain, unless you are investing through a tax-deferred arrangement, such as an IRA or 401(k) plan.

Information Regarding Transactions Through Financial Intermediaries

Shareholders may be required to pay a commission directly to their broker or other financial intermediary when buying or selling shares of the Fund. Shareholders and potential investors may wish to contact their broker or other financial intermediary for information regarding applicable commissions, transaction fees or other charges associated with transactions in shares of the Fund.

In addition, brokers, dealers, banks, trust companies and other financial representatives may receive compensation from the Fund or its service providers for providing a variety of services, which may include recordkeeping, transaction processing for shareholders' accounts and certain shareholder services not currently offered to shareholders that deal directly with the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund seeks to provide long-term total return, which includes income and capital appreciation, while considering capital preservation.

There is no assurance that the Fund will achieve its investment objective. The Fund's investment objective is fundamental and may not be changed without shareholder approval. The Fund's investment strategies and policies may be changed from time to time without shareholder approval or prior written notice, unless specifically stated otherwise in this Prospectus or the Statement of Additional Information (the "SAI").

Principal Investment Strategies

The Fund primarily invests in a diversified portfolio of debt instruments, cash and cash equivalents. The Fund generally invests in highly rated debt instruments and will invest at least 75% of its total assets, calculated at market value at the time of purchase, in debt instruments rated at least A- or its equivalent by a NRSRO and in cash equivalent securities.

Under normal circumstances, the Fund invests primarily in the following debt instruments, among others:

- Corporate bonds, municipal bonds, bank loans, bonds issued by governments and their agencies and instrumentalities, mortgage-backed pools, sovereign debt, and obligations of supra-national agencies, including international development institutions that provide global financing and advisory services for economic development.
- Structured investments, commercial mortgage-backed securities, residential mortgage-backed securities, CMOs, asset-backed securities, CLOs, CDOs and structured notes. The Fund may invest a significant portion of its portfolio in these investments.
- Cash equivalent securities, which may include publicly traded securities issued by the U.S. government or agencies of the U.S. government, money market funds, certificates of deposit, commercial paper, repurchase agreements, bankers' acceptances and other similar short-term bonds.

The Fund may invest up to 25% of its total assets, calculated at market value at the time of purchase, in debt instruments that are rated below A- or its equivalent by an NRSRO, which may include securities that are in default, or that are unrated.

The Fund may also invest up to 25% of its total assets, calculated at market value at the time of purchase, in instruments of non-U.S. governments and corporations, non-U.S. structured investments or in instruments that are not denominated in U.S. dollars; and up to 15% of its total assets, calculated at market value at the time of purchase, in stripped mortgage securities (such as interest-only and principal-only classes of collateralized mortgage obligations), collateralized

mortgage obligations structured as accrual certificates, also known as Z-Bonds, and inverse floating rate debt instruments.

The Fund may also invest up to 5% of its total assets, calculated at market value at the time of purchase, in preferred stocks.

The Fund may hold investments in common stocks and rights to purchase common stocks. Such investments are typically received as a result of a conversion, corporate restructuring or recapitalization. Further, common stocks may be purchased as a result of exercising such rights, or purchased to increase an existing investment in common stocks. The Fund may also hold investments in privately placed securities.

The Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis. The Fund may also invest in currency forwards, swaps and other certain currency derivatives, in each case for hedging purposes only.

ADDITIONAL INFORMATION ABOUT THE PRINCIPAL INVESTMENT STRATEGIES

To pursue the Fund's investment objective, the Fund generally invests in a diversified portfolio of debt securities, cash and cash equivalents, including but not limited to the following securities:

U.S. Government Securities. The U.S. government sector includes fixed income securities issued by the U.S. government or its agencies and instrumentalities, such as U.S. Treasury and U.S. government agency securities, mortgage pass-through securities, including Government National Mortgage Association (Ginnie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae), and agency mortgage-backed securities.

Mortgage-Backed Securities. In addition to the U.S. government mortgage-pass through securities described above, the mortgage sector includes non-agency mortgage-backed securities, such as collateralized mortgage obligations ("CMOs"), CMBS, RMBS and single- and multi-class pass-through securities. Mortgage-backed securities represent direct or indirect participation in mortgage loans secured by real property.

Stripped Securities. Some of the U.S. government and non-agency mortgage-pass through and mortgage-backed securities in which the Fund invests are "stripped securities" *i.e.*, they represent distributions of a specific source of cash flow on a pool of mortgage assets (*e.g.*, interest payments, principal payments, prepayment penalties). The Fund may invest in stripped securities which can be highly sensitive to the rate of principal payments on the underlying mortgage securities. Stripped securities can produce higher yields than more traditional securities. However, stripped mortgage securities are highly sensitive to changes in interest and prepayment rates. As a result, such securities are extremely volatile.

Asset-Backed Securities. Asset-backed securities are bonds issued through special purpose vehicles and backed by pools of loans, other receivables or other assets. Asset-backed securities

are created from many types of assets, such as home equity loans, auto loans, student loans and credit card receivables. The credit quality of an asset-backed security depends on the quality and performance of the underlying assets and/or the level of any credit support provided by the securitization structure. The proportions of the Fund's portfolio invested in various types of asset-backed securities will depend on many factors, including the portfolio manager's appraisal of the economy, yield, credit quality, macroeconomic factors and capital appreciation potential, among others. To the extent the Fund focuses its investments in a particular type of asset-backed security, it may be more susceptible to economic conditions and risks affecting the type of asset-backed security.

Corporate Debt Securities. The Fund may invest in corporate bonds, bank debt, notes and commercial paper of varying maturities and may invest in domestic bonds, bank debt and notes and those issued by non-U.S. corporations and governments. Issuers of these securities have a contractual obligation to pay interest at a specified rate on specified date and to repay principal on a specified maturity date, and may have provisions that allow the issuer to redeem or "call" the security before its maturity.

Sovereign and Government-Related Debt. Sovereign debt includes securities issued or guaranteed by a non-U.S. sovereign government or its agencies, authorities, or political subdivisions. Government-related debt includes securities issued by non-U.S. regional or local governmental entities or government-controlled entities. In the event an issuer of sovereign debt or government-related debt is unable or unwilling to make scheduled payments of interest or principal, holders may be asked to participate in a restructuring of the debt and to extend further credit to the issuer. In the event of a default by such an issuer, there may be few or no effective legal remedies for collecting on such debt.

Non-U.S. Securities. Up to 25% of the Fund's total assets, calculated at market value at the time of purchase, may be invested in securities of non-U.S. governments and corporations, non-U.S. structured investments or in securities that are not denominated in U.S. dollars. These non-U.S. securities entail additional risks compared to investments in securities of the U.S. government or U.S. issuers. For purposes of this Prospectus, non-U.S. issuers are generally non-U.S. governments or companies either domiciled outside the U.S. or traded on non-U.S. exchanges, but the portfolio manager may make a different designation in certain circumstances.

Covered Bonds. Covered bonds are debt securities issued by banks and are secured by collateral, typically mortgages. In the event of a default, bondholders also have an unsecured claim against the issuing bank if the underlying collateral is insufficient to repay amounts owing in respect of the bonds.

Cash Equivalents. Cash equivalents are short-dated instruments that are readily convertible into cash. They may include bank obligations, commercial paper, and repurchase agreements. Bank obligations include certificates of deposit and bankers' acceptances. Commercial paper is a short-term promissory note issued by a corporation, which may have a floating or variable rate. Repurchase agreements are transactions under which the Fund purchases a security from a dealer counterparty and agrees to resell the security on a specified future date at the same price, plus a specified interest rate.

High Yield Securities. High yield securities are medium or lower rated securities and unrated securities of comparable quality, sometimes referred to as “high yield” or “junk” bonds. Generally, such securities offer a higher current yield than is offered by higher rated securities, but also are predominantly speculative with respect to the issuer’s capacity to pay interest and repay principal in accordance with the terms of the obligations. The market values of certain of these securities also tend to be more sensitive to individual corporate developments and changes in economic conditions than higher quality bonds. In addition, medium and lower rated securities and comparable unrated securities generally present a higher degree of credit risk.

Zero Coupon Securities. Special tax considerations are associated with investing in high yield bonds structured as zero coupon or pay-in-kind securities. The Fund does not receive any cash interest on such bonds until the bond matures, but the interest on these securities is accrued as income. Similarly, the inflation accretion income recorded on inflation-indexed notes is not received until maturity. The Internal Revenue Code requires the Fund to distribute such income to its shareholders. Thus, the Fund may have to dispose of securities when it might not want to in order to provide the cash necessary to make distributions to those shareholders who do not reinvest dividends.

Warrants and Rights. Warrants are options to buy a stated number of shares of common stock at a specified price anytime during the life of the warrants (generally two or more years). They have no voting rights, pay no dividends, and have no rights with respect to the assets of the entity issuing them. Rights are similar to warrants but normally have a shorter duration and are typically distributed directly by the issuers to existing shareholders, while warrants are typically attached to new debt or preferred stock issuances. The market price of warrants may be substantially lower than the current market price of the underlying common stock, yet warrants are subject to similar price fluctuations. As a result, warrants may be more volatile investments than the underlying common stock. If a warrant is exercised, the Fund may hold common stock in its portfolio even if it does not ordinarily invest in common stock. Warrants and rights generally do not entitle the holder to dividends or voting rights with respect to the underlying common stock and do not represent any rights in the assets of the issuer. Warrants and rights will expire if not exercised on or prior to the expiration date.

Temporary Investments and Other Measures. As a temporary measure for defensive purposes, the Fund may invest up to 100% of its total assets in short-term investments, including cash or cash equivalents, corporate debt, or direct or indirect U.S. and non-U.S. government and agency obligations, money market instruments, bank obligations, commercial paper, corporate notes and repurchase agreements. The Fund may make these investments or increase its investment in these securities when the manager is unable to find enough attractive long-term investments, to reduce exposure to the Fund’s primary investments when the manager believes it is advisable to do so, during periods of significant shareholder redemptions or when adverse or unusual market, economic, political or other conditions exist. The Fund may take such portfolio positions for as long a period as deemed necessary, when conditions such as the aforementioned market conditions exist. In doing so, the Fund may succeed in avoiding losses but may otherwise fail to achieve its investment objective. However, there can be no guarantee that a defensive strategy will be successful. Investing defensively may adversely affect Fund performance. During these times, the

portfolio manager may make frequent portfolio holding changes, which could result in increased trading expenses and taxes, and decreased Fund performance.

As part of its normal operations, the Fund may hold cash or invest a portion of its portfolio in short-term interest bearing U.S. dollar denominated securities, pending investments or to provide for possible redemptions. Investments in such short-term debt securities can generally be sold easily and have limited risk of loss, but earn only limited returns. The Fund may increase its cash holdings and/or such short-term investments in anticipation of a greater than normal number of shareholder redemptions.

The Fund's emphasis on a value-oriented investment approach could result in a portfolio that does not reflect the national economy, differs significantly from broad market indices and consists of securities considered by the average investor to be unpopular or unfamiliar.

Percentage Investment Limitations. Unless otherwise stated, all percentage limitations on Fund investments listed in this Prospectus will apply at the time of purchase. The Fund would not violate these limitations unless an excess or deficiency occurs or exists immediately after and as a result of an investment.

Other Investments and Techniques. The Fund may invest in other types of securities and use a variety of investment techniques and strategies which are not principal investment strategies and are not described in this Prospectus. These securities and techniques may subject the Fund to additional risks. Please see the SAI for additional information about the securities and investment techniques described in this Prospectus and about additional securities and techniques that may be used by the Fund.

ADDITIONAL INFORMATION ABOUT THE PRINCIPAL RISKS

The Fund's principal risks are set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors and special considerations associated with investing in the Fund, which may cause you to lose money.

Interest Rate Risk. As with most funds that invest in debt instruments, changes in interest rates, including rates that fall below zero, are one of the most important factors that could affect the value of an investment in the Fund. Interest rate risk is the risk that debt instrument will decline in value because of increases in interest rates. Any such change in interest rates may be sudden and significant, with unpredictable effects on the financial markets and the Fund's investments. Rising interest rates tend to cause the prices of debt instruments (especially those with longer maturities) and the Fund's share price to fall. Generally, bonds with longer maturities have a greater duration and thus are subject to greater price volatility from changes in interest rates. Adjustable rate instruments also react to interest rate changes in a similar manner although generally to a lesser degree (depending, however, on the characteristics of the reset terms, including the index chosen, frequency of reset and reset caps or floors, among other things). Low interest rates may pose heightened risks with respect to investments in fixed income securities. When interest rates rise from a low level, fixed income securities markets may experience lower prices, increased volatility and lower liquidity. The negative impact on fixed income securities from rate increases, regardless

of the cause, could be swift and significant, which could result in significant losses by the Fund, even if such rate increases are anticipated by the portfolio manager. The Fund may be subject to heightened interest rate risk because the Federal Reserve has raised, and may continue to raise, interest rates. During periods of increasing interest rates the Fund may experience high redemptions and, as a result, increased portfolio turnover, which could increase the costs that the Fund incurs and may negatively impact the Fund's performance.

Market Risk. The market price of investments owned by the Fund may go up or down, sometimes rapidly or unpredictably. Fund investments may decline in value due to factors affecting the overall markets, or particular industries or sectors. The value of a holding may decline due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for an issuer's financial condition, national or international political events, war, acts of terrorism, inflation/deflation, market disruptions, public health emergencies, such as the spread of infectious illness or disease, natural disasters or climate events, changes in interest or currency rates, domestic or international monetary policy or adverse investor sentiment generally. Such conditions may add significantly to the risk of volatility in the net asset value of the Fund's shares. Market changes may impact equity and fixed income securities in different and, at times, conflicting manners. The value of a holding may also decline due to factors that affect a particular industry or industries, such as competitive conditions within an industry or government regulations. The Fund may experience heavy redemptions that could cause the Fund to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of an investment in the Fund to unexpectedly decline. Shareholder redemptions may also cause the Fund to engage in "odd-lot" fixed income transactions, which due to their small size, may result in the Fund receiving substantially lower value on such transactions than if the Fund had engaged in a large block trade of such securities. The Fund potentially will be prevented from executing investment decisions at an advantageous time or price as a result of any domestic or global market disruptions, particularly disruptions causing heightened market volatility and reduced market liquidity, as well as increased or changing regulations.

Mortgage-Related and Asset-Backed Securities Risk. Mortgage-related and other asset-backed securities represent interests in "pools" of mortgages or other assets such as consumer loans or receivables held in trust and often involve risks that are different from or possibly more acute than risks associated with other types of debt instruments. Mortgage-related securities, including CMBS and RMBS, are subject to prepayment risk and, can be highly sensitive to changes in interest rates. Generally, in a period of rising interest rates, individual borrowers are less likely to exercise prepayment options which tend to extend the expected maturity of mortgage-related securities, making them more sensitive to changes in interest rates. As a result, if the Fund holds mortgage-related securities, rising interest rates may cause the Fund to exhibit additional volatility due to the increased expected average life of its mortgage-related holdings. When interest rates decline, borrowers may pay their mortgages sooner than expected. These prepayments can reduce the returns of the Fund because the Fund may realize losses on securities that were acquired at a premium to par and the Fund may have to reinvest the proceeds from prepayments at the lower prevailing interest rates which can reduce the Fund's yield.

Mortgage-related securities may be either pass-through securities or CMOs. Pass-through securities represent a right to receive principal and interest payments collected on a pool of mortgages which

are passed through to security holders. CMOs are created by dividing the principal and interest payments collected on a pool of mortgages into several cash flow streams (“tranches”) with different priority rights to portions of the underlying mortgage payments. Certain CMO tranches may represent a right to receive specific sources of cash flow such as interest-only (“IOs”) or principal-only (“POs”). These securities are frequently referred to as “stripped securities” and are subject to interest rate risks described below. If the Fund invests in CMO tranches (including CMO tranches issued by government agencies) and interest rates move in a manner not anticipated by the manager, it is possible that the Fund could lose all or substantially all of its investment. The market prices of CMOs structured as accrual certificates (also known as “Z-Bonds”) are affected to a greater extent by interest rate changes and therefore tend to be more volatile than securities which pay current interest in cash. Mortgage-related securities, including CMBS and RMBS, and in particular those not backed by a government guarantee, are subject to credit risk, *i.e.*, the likelihood that an issuer will default on the payment of principal and/or interest on a security. CMBS and RMBS investments that are backed by mortgages given to borrowers considered to be higher risk borrowers generally include one or more aggressive mortgage terms, such as a high loan-to-value ratio. Such mortgages carry a higher degree of credit risk than other loans, and, therefore, a higher probability of default.

The Fund may invest in CDO, which include CLOs, collateralized bond obligations (“CBOs”), and other similarly structured securities. The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. In addition to the normal risks associated with credit-related securities discussed elsewhere in the Prospectus (*e.g.*, interest rate risk and default risk), CDOs carry additional risks including, but not limited to, the risk that: (i) distributions from collateral securities may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Fund may invest in CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results. Investments in CDOs are also more difficult to value than other investments. In addition, although not required, valuations of Fund holdings are ordinarily verified via a second pricing source. However, second source pricing may not be available with respect to certain CDOs in which the Fund invests as a result of a lack of readily available market quotations. In addition, there may be delays in the Fund’s ability to invest in CDOs at desired levels as a result of the increased time necessary for the Adviser to resolve valuation and operational issues necessary to make these investments.

The Fund’s investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Payment of principal and interest on asset-backed securities may be largely dependent upon the cash flows generated by the assets backing the securities, and asset-backed securities may not have the benefit of any security interest in the related assets. Certain asset-backed securities, including securities backed by auto loans, are subject to subprime lending and loan-to-value risk. One of the most significant risks to a holder of an auto loan asset-backed security is the fluctuation of the value of the loans acquired. The higher the loan-to-value ratio, the riskier the loan is for a lender. Further, subprime loans underlying auto loan asset-backed securities may have higher default rates than loans that meet more stringent underwriting requirements.

CLO Obligations Risk. The risks of an investment in a CLO largely depend on the type of underlying collateral securities and the tranche in which the Fund invests. While CLOs are subject to the typical risks associated with debt instruments (*i.e.*, interest rate risk and credit risk), additional risks of CLOs include the possibility that distributions from collateral securities will be insufficient to make interest or other payments, the potential for a decline in the quality of the collateral, and the possibility that the Fund may invest in a subordinate tranche of a CLO. In addition, due to the complex nature of a CLO, an investment in a CLO may not perform as expected. An investment in a CLO also is subject to the risk that the issuer and the investors may interpret the terms of the instrument differently, giving rise to disputes. In addition, the Fund is subject to the following risks as a result of its investments in CLOs:

Asset Manager Risk. A CLO's performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. The experience of a CLO manager plays an important role in the rating and risk assessment of CLO debt securities. One of the primary risks to investors of a CLO is the potential change in CLO manager, over which the Fund will have no control.

Legal and Regulatory Risk. The Fund may be adversely affected by new (or revised) laws or regulations that may be imposed by government regulators or self-regulatory organizations that supervise the financial markets. These agencies are empowered to promulgate a variety of rules pursuant to financial reform legislation in the United States. Changes in the regulation of CLOs may adversely affect the value of the investments held by the Fund and the ability of the Fund to execute one of its investment strategies.

Limited Recourse Risk. CLO debt securities are limited recourse obligations of their issuers. CLO debt is payable solely from the proceeds of its underlying assets. Consequently, CLO investors must rely solely on distributions from the underlying assets for payments on the CLO debt they hold. No party or entity other than the issuer will be obligated to make payments on CLO debt. CLO debt is not guaranteed by the issuer or any other party or entity involved in the organization and management of a CLO. If income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment.

Redemption Risk. CLO debt securities may be subject to redemption. For example, certain tranches of CLO debt may be redeemed if the CLO manager is unable to identify assets suitable for investment during the period when it has the ability to reinvest the principal proceeds from the sale of assets, scheduled redemptions and prepayments in additional assets (the "Reinvestment Period"). Additionally, holders of subordinated CLO debt may cause the redemption of senior CLO debt. In the event of an early redemption, holders of the CLO debt being redeemed will be repaid earlier than the stated maturity of the debt. The timing of redemptions may adversely affect the returns on CLO debt.

Reinvestment Risk. The CLO manager may not find suitable assets in which to invest during the Reinvestment Period or to replace assets that the manager has determined are no longer suitable for investment (for example, if a security has been downgraded by a rating agency). Additionally, the reinvestment period is a pre-determined finite period of time; however, there is a risk that the reinvestment period may terminate early if, for example, the CLO defaults on

payments on the securities which it issues or if the CLO manager determines that it can no longer reinvest in underlying assets. Early termination of the Reinvestment Period could adversely affect a CLO investment.

Liquidity Risk. The CLO debt securities in which the Fund invests are restricted securities (securities with limited transferability under the securities laws). CLOs are not registered under the Securities Act of 1933, as amended, and are subject to restrictions on resale. They are eligible for sale only to certain qualified institutional buyers and are not sold on a trading market or exchange. Because such securities are available to few buyers, they may be both difficult to sell and to value. Because of the potential for a limited market, the Fund may find it difficult to sell the securities when it finds it advisable to do so and, to the extent such securities are sold in private negotiations, they may be sold for less than the price for which they were purchased or less than their fair market value. However, an active dealer market may exist for CLOs allowing a CLO to qualify for transactions pursuant to Rule 144A under the Securities Act and to be deemed liquid.

Structured Products Risks. The CLOs in which the Fund may invest are structured products. Holders of structured products bear risks of the underlying assets and are subject to issuer repayment or counterparty risk. Certain structured products may be thinly traded or have a limited trading market and as a result may be characterized by the Fund as illiquid securities.

Bank Loan Risk. The Fund's investments in secured and unsecured participations in bank loans and assignments of such loans may create substantial risk. In making investments in such loans, which are made by banks or other financial intermediaries to borrowers, the Fund will depend primarily upon the creditworthiness of the borrower for payment of principal and interest, which will expose the Fund to the credit risk of both the financial institution and the underlying borrower. The market for bank loans may not be highly liquid and the Fund may have difficulty selling them. Bank loan trades may also be subject to settlement delays. In addition, bank loans may not be considered securities under U.S. federal securities laws and, as a result, investments in them may not have the protection of federal securities laws. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement with the same rights and obligations as the assigning lender. Assignments may, however, be arranged through private negotiations between potential assignees and potential assignors, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender. Participations by the Fund in a lender's portion of a bank loan typically will result in the Fund having a contractual relationship only with such lender, not with the borrower. The Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling a loan participation and only upon receipt by such lender of such payments from the borrower. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights with respect to any funds acquired by other lenders through set-off against the borrower, and the Fund may not directly benefit from any collateral supporting the loan in which it has purchased the participation. As a result, the Fund may assume the credit risk of both the borrower and the lender selling the participation.

Municipal Bond Risk. As the Fund may purchase the debt securities of municipal issuers, changes or proposed changes in federal tax laws could impact the value of those securities. Of particular concern would be large changes in marginal income tax rates or the elimination of the tax preference for tax-exempt municipal interest income versus currently taxable interest income. Also, the failure or possible failure of such debt issuances to qualify for tax-exempt treatment may cause the prices of such municipal securities to decline, possibly adversely affecting the value of the Fund's portfolio, and such a failure could also result in additional taxable income to the Fund and/or shareholders. In addition, the municipal market is a highly fragmented market that is very technically driven. There can be regional variations in economic conditions or supply-demand fundamentals. Investment interest or other expenses incurred for the purchase of tax-exempt municipal bonds generally may not be deducted for federal income tax purposes, although certain expenses may be taken into account in computing gain or loss if the holder disposes of the bond prior to maturity. Tax-exempt municipal bonds issued by municipalities must be held by beneficial owners for their interest to be treated as tax-exempt.

Stripped Securities Risk. Stripped securities are more volatile than securities for which the principal and interest payments have not been separated. The value of stripped securities generally fluctuates more in response to interest rate movements than the value of traditional bonds because a change in interest rates may increase or decrease prepayments of principal. While the U.S. government or its agencies or instrumentalities may guarantee the full repayment of principal on stripped securities they issue, repayment of interest is generally guaranteed only while the underlying assets or pools of assets are outstanding. The market for stripped securities may be limited, which may make it difficult for the Fund to dispose of them quickly at an acceptable price.

Credit Risk. Credit risk refers to the likelihood that an issuer will default on the payment of principal and/or interest on a security. Various factors could affect the issuer's actual or perceived willingness or ability to make timely interest or principal payments, including changes in the issuer's financial condition or in general economic conditions. In addition, lack of or inadequacy of collateral or credit enhancements for a fixed income security may affect its credit risk. Below investment grade securities have more risk with respect to the issuer's ability to pay interest and repay principal when due, and therefore involve a greater risk of default or nonpayment. Credit risk of a security may change over time. Ratings agencies periodically review certain securities and may downgrade a security that is held by the Fund. However, ratings are only opinions of the agencies issuing them and are not absolute guarantees as to quality.

Call Risk. Issuers of callable bonds are permitted to redeem these bonds before their final maturity. Issuers may call outstanding securities before maturity for a number of reasons, including decreases in prevailing interest rates or improvements to the issuer's credit profile. If an issuer calls a security in which the Fund is invested, the Fund could lose potential price appreciation and be forced to reinvest the proceeds in securities that bear a lower interest rate or more credit risk.

Liquidity Risk. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price. Investments in high yield securities, non-U.S. securities, derivatives or other securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. Certain investments in private placements and Rule 144A securities may be considered illiquid investments. Lower-rated debt

securities tend to be less liquid than higher-rated securities. Illiquid securities may trade at a discount from comparable, more liquid investments, and may be subject to wider fluctuations in market value. Investments in illiquid derivatives may create the potential for the Fund to face ongoing margin and settlement payment obligations thereunder. Furthermore, reduced number and capacity of dealers and other counterparties to “make markets” in fixed income securities, in connection with the growth of the fixed income markets, may increase liquidity risk with respect to the Fund’s investments in fixed income securities. When there is no willing buyer and investments cannot be readily sold, the Fund may have to lower the selling price, sell other investments, or may not be able to sell the securities at all and may have to forego another, more appealing investment opportunity, any of which could have a negative effect on the Fund’s performance. These securities may also be difficult to value and their values may be more volatile because of liquidity risk. Increased Fund redemption activity may negatively impact Fund performance and increase liquidity risk due to the need of the Fund to sell portfolio securities. Regulatory changes may further constrain the ability of market participants to create liquidity, particularly in times of increased market volatility. Liquidity risk may intensify during periods of economic uncertainty.

Large Investor Risk. Ownership of shares of the Fund may be concentrated in one or a few large investors. Such investors may redeem shares in large quantities or on a frequent basis. Redemptions of Fund shares by a large investor may negatively affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income to shareholders and may increase transaction costs. These transactions potentially limit the use of any capital loss carryforwards and certain other losses to offset future realized capital gains (if any). Such transactions may also increase the Fund’s expenses. In addition, the Fund may be delayed in investing new cash after a large shareholder purchase, and under such circumstances may be required to maintain a larger cash position than it ordinarily would.

Management and Strategy Risk. The value of your investment depends on the judgment of the Adviser about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incurred. The Fund is subject to management risk as an actively managed investment portfolio. The portfolio manager will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. The portfolio manager’s opinion about the intrinsic worth or creditworthiness of a company or security may be incorrect, the portfolio manager may not make timely purchases or sales of securities for the Fund, the Fund’s investment objective may not be achieved, or the market may continue to undervalue the Fund’s securities. In addition, the Fund may not be able to quickly dispose of certain securities holdings. The frequency of trading within the Fund impacts portfolio turnover rates, which are shown in the financial highlights table. A higher rate of portfolio turnover could produce higher trading costs and taxable distributions, which would detract from the Fund’s performance. Moreover, there can be no assurance that all of the Adviser’s personnel will continue to be associated with the Adviser for any length of time. The loss of services of one or more key employees of the Adviser, including the portfolio manager, could have an adverse impact on the Fund’s ability to achieve its investment objective. Certain securities or other instruments in which the Fund seeks to invest may not be available in the quantities desired. In such circumstances, the portfolio manager may determine to purchase other securities or instruments as substitutes. Such substitute securities or instruments may not perform as intended, which could result in losses to the Fund.

Private Placements and Restricted Securities Risk. Private placement securities are securities that are not registered under the federal securities laws, and are generally eligible for sale only to certain eligible investors. The Fund may invest in securities that are purchased in private placements. Because there may be relatively few potential purchasers for such investments, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult to sell such securities when FPA believes it advisable to do so or may be able to sell such securities only at prices lower than if such securities were more widely held. At times, it may also be more difficult to determine the fair value of such securities for purposes of computing the net asset value of the Fund. The sale of such investments may also be restricted under securities laws.

U.S. Government Securities Risk. Certain U.S. government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal National Mortgage Association (Fannie Mae) may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. government, and involve increased credit risks in comparison to U.S. Treasury securities or other securities supported by the full faith and credit of the U.S. government. Any security guaranteed by the U.S. government or its agencies or instrumentalities, or a security backed by the U.S. Treasury or the full faith and credit of the United States, is guaranteed or backed only as to the timely payment of interest and principal when held to maturity, but the market values for such securities are not guaranteed and will fluctuate.

Any market movements, regulatory changes or changes in political or economic conditions that affect the U.S. government agencies or instrumentalities in which the Fund invests may have a significant impact on the Fund's performance. Events that would adversely affect the market prices of securities issued or guaranteed by one government agency or instrumentality may adversely affect the market price of securities issued or guaranteed by other government agencies or instrumentalities. Because many types of U.S. government securities trade actively outside the United States, their prices may rise and fall as changes in global economic conditions affect the demand for these securities.

Risks Associated with Investing in High Yield Securities. High yield bonds, sometimes called "junk" bonds, are highly speculative securities that are usually issued by smaller, less credit-worthy and/or highly leveraged (indebted) companies. Because investment in lower-rated or unrated securities involves greater investment risk, achievement of the Fund's investment objective is more dependent on the portfolio manager's credit analysis of these securities than with respect to the Fund's investments in higher-rated securities. The portfolio manager does not employ a rating valuation for unrated securities. Decisions to purchase and sell these securities are based on the portfolio manager's evaluation of their investment potential and not on the ratings assigned by credit agencies. Compared with investment-grade bonds, high yield bonds carry a greater degree of risk and are less likely to make payments of interest and principal. Compared to investment-grade debt securities, market developments and the financial and business conditions of the

corporation issuing high yield securities influence the price and liquidity of high yield securities more than changes in interest rates when compared to investment grade debt securities. Lower-rated securities may be more susceptible to real or perceived adverse economic and competitive industry conditions than investment grade securities. A projection of an economic downturn, for example, could cause a decline in the prices of lower-rated securities because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. New and proposed laws and regulations could negatively impact the market for high-yield bonds. Insufficient liquidity in the high yield bond market may make it more difficult to dispose of high yield bonds and may cause the Fund to experience sudden and substantial price declines. A lack of reliable, objective data or market quotations may make it more difficult to value high yield bonds accurately. There is no limit on the ratings of high yield securities that may be purchased or held by the Fund, and the Fund may invest in securities that are in default.

Risks Associated with Investing in Repurchase Agreements. A repurchase agreement is a short-term investment. The Fund acquires a debt security that the seller agrees to repurchase at a future time and set price. If the seller declares bankruptcy or defaults, the Fund may incur delays and expenses liquidating the security. The security may also decline in value or fail to provide income.

Sovereign Debt Risk. An issuer of sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due. In the event of a default by a governmental entity on a sovereign debt obligation, there may be few or no effective legal remedies for collecting on such debt.

Risks Associated with Investing in Non-U.S. Securities. Non-U.S. investments involve special risks not present in U.S. investments that can increase the chances that the Fund will lose money. Certain of the risks noted below may also apply to securities of U.S. issuers with significant non-U.S. operations. Investments in non-U.S. securities involve the following risks:

- The economies of some non-U.S. markets often do not compare favorably with that of the U.S. in areas such as growth of gross domestic product, reinvestment of capital, resources, and balance of payments. Some of these economies may rely heavily on particular industries or non-U.S. capital. They may be more vulnerable to adverse diplomatic developments, the imposition of economic sanctions against a country, changes in international trading patterns, trade barriers and other protectionist or retaliatory measures.
- Governmental actions—such as the imposition of capital controls, nationalization of companies or industries, expropriation of assets or the imposition of punitive taxes—may adversely affect investments in non-U.S. markets. Such governments may also participate to a significant degree, through ownership or regulation, in their respective economies.
- The governments of certain countries may prohibit or substantially restrict foreign investing in their capital markets or in certain industries. This could severely affect security prices. This could also impair the Fund's ability to purchase or sell non-U.S. securities or transfer its assets or income back to the U.S. or otherwise adversely affect the Fund's operations.

- Other non-U.S. market risks include foreign exchange controls, difficulties in pricing securities, defaults on non-U.S. government securities, difficulties in enforcing favorable legal judgments in non-U.S. courts, and political and social instability. Legal remedies available to investors in some non-U.S. countries are less extensive than those available to investors in the U.S. Many non-U.S. governments supervise and regulate stock exchanges, brokers, and the sale of securities to a lesser extent than the U.S. government does. Corporate governance may not be as robust as in more developed countries. As a result, protections for minority investors may not be strong, which could adversely affect the Fund's non-U.S. holdings or exposures.
- Accounting standards in other countries are not necessarily the same as in the U.S. If the accounting standards in another country do not require as much disclosure or detail as U.S. accounting standards, it may be harder for the portfolio manager to completely and accurately determine a company's financial condition or otherwise assess a company's creditworthiness.
- Because there may be fewer investors on non-U.S. exchanges and smaller numbers of shares traded each day, it may be difficult for the Fund to buy and sell securities on those exchanges. In addition, prices of non-U.S. securities may be more volatile than prices of securities traded in the U.S.
- Non-U.S. markets may have different clearance and settlement procedures. In certain markets, settlements may not keep pace with the volume of securities transactions. If this occurs, settlement may be delayed, and the Fund's assets may be uninvested and may not be earning returns. The Fund also may miss investment opportunities or not be able to sell an investment or reduce its exposure because of these delays.
- Changes in currency exchange rates will affect the value of the Fund's non-U.S. holdings or exposures.
- The costs of non-U.S. securities transactions tend to be higher than those of U.S. transactions, increasing the transaction costs paid directly or indirectly by the Fund.
- International trade barriers or economic sanctions against non-U.S. countries may adversely affect the Fund's non-U.S. holdings or exposures.
- Global economies are increasingly interconnected, which increases the possibilities that conditions in one country, region or financial market might adversely impact a different country, region, or financial market.
- The severity or duration of these conditions may be affected if one or more countries leave the European Union, or the euro currency or if other policy changes are made by governments or quasi-governmental organizations.

Risks Associated with Deep Discount Securities. The high yield securities in which the Fund may invest may from time to time include debt securities of companies that are financially troubled,

in default or are in bankruptcy or reorganization. These securities are called “Deep Discount Securities” and are deeply discounted from their face value. The Fund will invest in Deep Discount Securities when the portfolio manager believes that the issuer’s financial condition is likely to improve. A debt instrument purchased at a deep discount, but prior to default, may pay a very high effective yield. If the issuer’s financial condition improves, the underlying value of the securities may increase and result in a capital gain. If the issuer cannot meet its debt obligations, however, the Deep Discount Securities may stop generating income and lose its value or become worthless. The portfolio manager will balance the benefits of Deep Discount Securities with their risks. A diversified portfolio may reduce the overall impact of a Deep Discount Security in default or reduced in value, but the risk cannot be eliminated. A lack of reliable, objective data or market quotations may make it more difficult to value deep discount securities accurately. Insufficient liquidity in the deep discount security market may make it more difficult to dispose of such securities and may cause the Fund to experience sudden and substantial price declines.

ARM Risk. During periods of extreme fluctuations in interest rates, the resulting fluctuations of ARM rates could affect the ARMs’ market value. Most ARMs generally have annual reset limits or “caps.” Fluctuations in interest rates above these levels, thus, could cause the mortgage-backed securities to “cap out” and to behave more like long-term, fixed-rate debt securities. During periods of declining interest rates, of course, the coupon rates may readjust downward and result in lower yields. Because of this feature, the value of ARMs will likely not rise during periods of declining interest rates to the same extent as fixed-rate instruments.

Currency Transactions Risk. Currency hedging involves many of the same risks as other derivative transactions, such as leveraging risk, market risk, liquidity risk, counterparty risk, management risk, operational risk, and legal risk. Currency derivative transactions are also subject to risks different from those of other derivative transactions. Because currency control is of great importance to the issuing governments and influences economic planning and policy, purchases and sales of currency and related instruments can be adversely affected by government exchange controls, limitations, or restrictions on repatriation of currency, and manipulations or exchange restrictions imposed by governments. Currency exchange rates may also fluctuate based on broader factors extrinsic to any particular country’s economy. There can be no assurance that currency transactions or currency hedging techniques will be successful.

OTC Investments Risk. Securities and derivatives traded in OTC markets may trade in smaller volumes, and their prices may be more volatile, than securities principally traded on securities exchanges. Such securities may be less liquid than more widely traded securities. In addition, the prices of such securities may include an undisclosed dealer markup, which the Fund pays as part of the purchase price.

Recent Market Events. Periods of market volatility may occur in response to market events, public health emergencies, natural disasters or climate events, and other economic, political, and global macro factors. U.S. and international markets have recently experienced, and may continue to experience, periods of significant volatility due to various factors, including uncertainty regarding inflation and central banks’ interest rate changes, the possibility of a national or global recession, trade tensions and tariffs, and political and geopolitical events. In addition, some countries and regions in which the Fund may invest have experienced security concerns; war or threats of war

and aggression, such as Russia's invasion of Ukraine and conflicts among nations and militant groups in the Middle East; terrorism; economic uncertainty; natural and environmental disasters; and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.

Additionally, since the change in the U.S. presidential administration in 2025, the administration has pursued an aggressive foreign policy agenda, including through suggestions that the United States should control sovereign foreign territories, attempts to restructure federal government agencies with international influence, and the actual or potential imposition of tariffs on foreign countries, including China and long-time U.S. allies. In particular, the imposition of tariffs could lead to retaliatory tariffs by foreign countries, increased and prolonged market volatility, and sector-specific downturns in industries reliant on international trade. The new administration has also sought to reduce the headcount of and freeze funding available to certain U.S. government agencies. Such efforts may continue throughout U.S. federal agencies, which could increase administrative burdens on remaining government employees, increase processing times of company filings, alter regulatory policymaking, and increase regulatory volatility. These efforts may have a negative impact on the Fund or on markets generally.

In September 2024, the Federal Reserve lowered interest rates for the first time since 2020. Changing interest rate environments (whether downward or upward) impact various sectors of the economy and asset classes in different ways. For example, low interest rate environments tend to be positive for the equity markets, whereas high interest rate environments tend to apply downward pressure on earnings and equity prices.

In addition, raising the ceiling on U.S. government debt and passing periodic legislation to fund the government have become increasingly politicized. Any failure to do either could lead to a default on U.S. government obligations, with unpredictable consequences for economies and markets in the United States and elsewhere.

The events and circumstances described above could be prolonged and could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance. Other market events may cause similar disruptions and effects.

Cybersecurity Risk. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Adviser and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. A cybersecurity incident may disrupt the processing of shareholder transactions, impact the Fund's ability to calculate its net asset value, and prevent shareholders from redeeming their shares. The use of artificial intelligence and machine learning could exacerbate these risks. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of those securities could decline if the issuers experience cybersecurity incidents.

Because of these and other risks, you could lose money by investing in the Fund. For more information about the Fund and its investments, please see the Fund's SAI.

Portfolio Holdings Disclosure

A description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio securities is available in the Fund’s SAI. Currently, disclosure of the Fund’s holdings is required to be made quarterly within 60 days of the end of each fiscal quarter in the Fund’s Financials and Other Information, which is included in the Fund’s Form N-CSR filings, and in its monthly holdings report on Form N-PORT. For instructions on how to obtain an SAI, please refer to the back cover of this Prospectus.

MANAGEMENT OF THE FUND

Investment Adviser

First Pacific Advisors, LP, is the Fund’s investment adviser. Together with its predecessor organizations, the Adviser has been in the investment advisory business since 1954, and has served as the Fund’s investment adviser since 1984. As of December 31, 2025, the Adviser manages assets of approximately \$31.9 billion and serves as the investment adviser for other investment companies, as well as institutional, sub-advised and private fund accounts. The Adviser is headquartered at 2101 E. El Segundo Blvd., Suite 301, El Segundo, California 90245. The portfolio manager, who is affiliated with the Adviser, selects investments for the Fund.

Pursuant to the investment advisory agreement (the “Investment Advisory Agreement”), the Fund pays the Adviser an annual advisory fee of 0.50% of the Fund’s average daily net assets for the services and facilities it provides, payable on a monthly basis. For the fiscal year ended September 30, 2025, the Adviser received advisory fees of 0.37% of the Fund’s average daily net assets, after waiving fees pursuant to its expense limitation agreement with the Trust on behalf of the Fund. In addition, the Adviser has contractually agreed to reimburse expenses (excluding interest, taxes, brokerage fees and commissions payable by the Fund in connection with the purchase or sale of portfolio securities, and extraordinary expenses, including litigation expenses not incurred in the Fund’s ordinary course of business) in excess of 0.454% of the average daily net assets of the Institutional Class shares of the Fund through January 31, 2027, and in excess of 0.554% of the average daily net assets of the Investor Class shares of the Fund through January 31, 2027. These agreements may only be terminated earlier by the Board or upon termination of the Investment Advisory Agreement.

In addition, the Adviser has voluntarily agreed to waive the advisory fee it receives from the Fund by 0.046% through January 31, 2027 of the Fund’s average daily net assets. The Adviser will not seek recoupment of the advisory fees voluntarily waived.

A discussion regarding the basis for the Board’s approval of the Investment Advisory Agreement is available in the Fund’s Form N-CSR for the fiscal year ended September 30, 2025.

Portfolio Manager

Abhijeet Patwardhan, Partner and Director of Research of the Adviser, is primarily responsible for the day-to-day management of the Fund’s portfolio. Mr. Patwardhan has served as the portfolio

manager of the Fund since July 2023 and as the portfolio manager of the Predecessor Fund since November 2015. Mr. Patwardhan joined the Adviser in 2010.

The SAI provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager and the portfolio manager's ownership of shares of the Fund.

INVESTING WITH THE FUND

Purchase and Investment Minimums

Investors can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. Investors can obtain an Account Application for initial investment. The minimum initial investment is \$1,500 for the Institutional Class Shares and Investor Class Shares, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100. However, as described herein, no minimum investment amount is imposed for investments in retirement plans. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. The Fund reserves the right to waive or lower purchase and investment minimums in certain circumstances. For example, the minimums listed above may be waived or lowered for investors who are Trustees or officers of the Fund, employees of the Adviser and/or customers of certain financial intermediaries that hold the Fund's shares in certain omnibus accounts, at the discretion of the officers of the Fund. In addition, financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

Share Price

Net Asset Value. The offering price of each class of the Fund's shares is the NAV of that class, as of the close of trading on the New York Stock Exchange ("NYSE"), every day the NYSE is open, normally 4:00 p.m. Eastern time. The NYSE is closed not only on weekends but also on customary holidays, which currently are New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Non-U.S. securities owned by the Fund may trade on weekends or other days when the Fund does not price its shares. As a result, the Fund's net asset value may change on days when you will not be able to purchase or redeem the Fund's shares. The share price for each share class is rounded to the nearest cent per share and equals the market value of all portfolio securities plus other assets, less all liabilities, divided by the number of shares outstanding of each class. Orders received by dealers before the NYSE closes on any business day are priced based on the share price for that day, as described in greater detail below. Orders received by UMB Fund Services, Inc. at the Fund's P.O. Box address are priced based upon the Fund's share price at the close of trading on the day received at the P.O. Box.

The value of an instrument is either the market value, if quotes are readily available (defined below), or the fair value as determined, in good faith, by the Board, or its designee. The Board has designated the Adviser as valuation designee (the "Valuation Designee") to perform the fair value determinations relating to all Fund investments pursuant to the valuation procedures of the Fund

and the Valuation Designee (the “Valuation Procedures”). Pursuant to Rule 2a-5 under the 1940 Act, a market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable. As a result, any security valued using inputs other than Level 1 inputs under U.S. GAAP (unless an SEC staff no-action position is available providing an exception from the readily available market quotation requirement) is deemed to be a fair value.

The Valuation Designee uses various methods and inputs to establish the value of its investments, other assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve. Equity securities are generally valued each day at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are principally traded, as of the close of business on that day. If there have been no sales that day, or if an equity security is unlisted, such equity securities are generally valued at the last available bid price. Fixed income securities are valued at the last reported sales price, if available and if the security is actively traded. Most fixed income securities are generally valued at prices obtained from pricing vendors. If no such vendor prices are available, such fixed income securities are valued using at least three broker quotes (or two broker quotes if three are not available). Vendors value fixed income securities based on one or more of the following inputs: transactions, bids, offers, quotations from dealers and trading systems, spreads and other relationships observed in the markets among comparable securities, benchmarks, underlying equity of the issuer, and proprietary pricing models such as cash flows, financial or collateral performance and other reference data (includes prepayments, defaults, collateral, credit enhancements, and interest rate volatility). Fixed income and convertible securities listed on a national securities exchange for which the over-the-counter market more accurately reflects the securities’ value in the judgment of the Fund’s officers, are valued at the most recent bid price. Currency forwards are valued at the closing currency exchange rate which is typically not materially different from the forward rate. Short-term corporate notes with maturities of 60 days or less are valued at amortized cost.

The Valuation Designee will assess the availability of market quotations each day and may determine that a market quotation for a security is not available (such as when the market for a security is closed) or is unreliable (such as when transactions in a security are infrequent, the validity of quotations appears questionable, there is a thin market, or the size of the reported trades is not considered representative of the Fund’s holdings). If such a determination is made, the Valuation Designee will fair value the security in accordance with the Valuation Procedures or override the security’s price. For example, if trading in a security has been halted, suspended or otherwise materially restricted; a security has been de-listed from a national exchange; a security has not been traded for an extended period of time; there is other data that may call into question the reliability of market quotations; or if events occur between the close of markets outside the United States and the close of regular trading on the NYSE that, in the opinion of the Valuation Designee, materially affect the value of any of the Fund’s securities that trade principally in those international markets, those securities will be valued in accordance with the Valuation Procedures. Various inputs may be reviewed in order to determine a fair valuation of a security. These inputs include, but are not limited to: fundamental analytical data relating to the investment, including the Valuation Designee’s analysis of the fundamental position of the issuer; the most recent closing market prices, including

“after hours” trading; the type of security or asset; financial statements of the issuer; the cost of the security or asset at the date of purchase; the size of the holding; information as to any transactions or offers with respect to the security; price and extent of public trading in similar securities of the issuer or comparable companies; related corporate actions; significant events occurring after the close of trading in the security; changes in overall market conditions, including interest rates; reports prepared by internal or external analysts, third party pricing consultants and/or industry experts; values of baskets of securities traded on other markets, exchanges or among dealers; and other factors that the Valuation Designee reasonably believes to be relevant under the circumstances.

Special valuation considerations may apply with respect to “odd-lot” fixed income transactions, which due to their small size, may receive evaluated prices by pricing services that reflect a large block trade and not what actually could be obtained for the odd-lot position. Fair valuations and valuations of investments that are not actively trading involve judgment and may differ materially from valuations of investments that would have been used had greater market activity occurred. Use of the Valuation Procedures is intended to result in more appropriate net asset values.

Additional fair value procedures are followed to address issues related to Fund holdings outside the United States. Non-U.S. securities held by the Fund trade in markets that open and close at different times, reflecting time zone differences. If significant events occur after the close of a market (and before the Fund’s net asset value is next determined) which affect the value of these portfolio securities, appropriate adjustments from closing market prices may be made to reflect these events. Events of this type could include, for example, significant price changes in other markets. The Valuation Designee may utilize an independent fair valuation service in adjusting the valuations of non-U.S. securities. In addition, such use is intended to reduce potential arbitrage opportunities otherwise available to short-term investors.

Orders received by authorized dealers, certain retirement plans and certain other financial intermediaries before the NYSE closes, if communicated to UMB Fund Services, Inc. by later deadlines on the following business day, are priced at the share price for the prior business day. The share price for sales (redemptions) of Fund shares is the first share price determined after UMB Fund Services, Inc. receives a properly completed request, except that sale orders received by an authorized dealer, certain retirement plans and certain other financial intermediaries before the NYSE closes are priced at the closing price for that day if communicated to UMB Fund Services, Inc. within the times specified by the Fund. No other action is required by the shareholder who places an order with a financial intermediary.

HOW TO BUY FUND SHARES

Investors may purchase shares on any business day by written request, check, wire, ACH (Automated Clearing House), telephone, or through dealers as further described in this Prospectus. You may conduct transactions by mail (FPA Funds, c/o UMB Fund Services, Inc., P.O. Box 2175, Milwaukee, Wisconsin 53201-2175, or 235 West Galena Street, Milwaukee, Wisconsin 53212), by wire, or by telephone at (800) 638-3060. Purchases and redemptions by telephone are only permitted if you previously established this option in your account. You can use the Account Application for initial purchases.

Investors can purchase shares by contacting any investment dealer authorized to sell the Fund's shares. The minimum initial investment is \$1,500 for the Institutional Class Shares and Investor Class Shares, and each subsequent investment, which can be made directly to UMB Fund Services, Inc., must be at least \$100. However, as described herein, the Fund has established different initial investment and subsequent investment minimums for retirement accounts and accounts established with a pre-authorized investment plan. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. The Fund reserves the right to waive or lower purchase and investment minimums in certain circumstances. For example, the minimums listed above may be waived or lowered for investors who are Trustees or officers of the Fund, employees of the Adviser and/or customers of certain financial intermediaries that hold the Fund's shares in certain omnibus accounts, at the discretion of the officers of the Fund. In addition, financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

Subsequent investments can be made directly to UMB Fund Services, Inc.

Federal regulations may require the Fund to obtain your name, your date of birth (for a natural person), your residential street address or principal place of business and your Social Security Number, Employer Identification Number or other government issued identification when you open an account. Additional information may be required in certain circumstances or to open accounts for corporations or other entities, and certain information regarding beneficial ownership will be verified, including information about beneficial owners of such entities. The Fund may use this information to attempt to verify your identity and, for legal entities, the identity of beneficial owners. The Fund may not be able to establish an account if the necessary information is not received. The Fund may also place limits on account transactions while it is in the process of attempting to verify your identity and, for legal entities, the identity of beneficial owners. Additionally, if the Fund is unable to verify the identity of you or your beneficial owners after your account is established, the Fund, the Fund's distributor and the Fund's transfer agent each reserve the right to reject further purchase orders from you or to take such other action as they deem reasonable or required by law, including closing your account. If your account is closed for this reason, your shares will be redeemed at the NAV next calculated on the date your account is closed, and you bear the risk of loss.

HOW TO REDEEM YOUR SHARES

Redeeming (Selling) Your Shares—Redemption Payments May Be Made By Check, Wire or ACH. You can redeem (sell) for cash without charge any or all of your Fund shares at any time by sending a written request to UMB Fund Services, Inc. Faxes are not acceptable. You can also place redemption requests through dealers, but they may charge a fee. If you are selling Fund shares from a retirement plan, you should consult the plan documentation concerning federal tax consequences and consult your plan custodian about applicable procedures for selling Fund shares.

The amount of time for a redeeming shareholder to receive redemption proceeds will vary based on the method of payment elected (*i.e.*, ACH, wire, check). Redemption proceeds by check will generally be mailed to you within three to seven business days after UMB Fund Services, Inc., receives a properly completed redemption request; and redemption proceeds by ACH or wire will

generally be sent to you within one to three business days after UMB Fund Services, Inc., receives a properly completed redemption request (as described below under “Written Requests” and “Telephone Transactions”). Generally, your redemption request cannot be processed on days the NYSE is closed. If you purchase shares by check and request a redemption before the check has cleared, the Fund may postpone payment of your redemption proceeds up to 15 days while the Fund waits for the check to clear.

Redemption proceeds are normally paid in cash; however, subject to the limits described below in “In-Kind Transactions,” the Fund reserves the right to make payment for redeemed shares wholly or in part by giving the redeeming shareholder portfolio securities. For cash redemptions, under normal market conditions, the Fund typically expects to meet such redemption requests by using holdings of cash or cash equivalents and/or proceeds from the sale of portfolio securities. In addition, for temporary or emergency purposes, the Fund may borrow to meet redemption requests.

The right of redemption can be suspended and the payment therefore may be postponed for more than seven days during any period when: (a) the NYSE is closed for other than customary weekends or holidays; (b) trading on the NYSE is restricted; (c) an emergency exists as a result of which disposal by the Fund of securities it owns is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets; or (d) the Securities and Exchange Commission, by order, so permits.

The Fund’s transfer agent, consistent with relevant regulatory guidance or court rulings, may place a temporary hold on the payment of redemption proceeds from an account if the transfer agent reasonably believes that financial exploitation of a Specified Adult (as defined below) has occurred, is occurring, has been attempted, or will be attempted. For purposes of this paragraph, the term “Specified Adult” refers to an individual who is (A) a natural person age 65 and older, or (B) a natural person age 18 and older who is reasonably believed to have a mental or physical impairment that renders the individual unable to protect their own interests.

Written Requests. Requests must be signed by the registered shareholder(s). A signature guarantee is required if the redemption is made payable to someone other than the registered shareholder, being sent to somewhere other than the registered address or being sent to the address of record if that address of record has been changed within the past 30 days.

A signature guarantee must be a Stamp 2000 Medallion Signature Guarantee and can be obtained from a bank or trust company; a broker or dealer; a credit union; a national securities exchange, registered securities association or clearing agency; or a savings and loan association. Additional documents such as articles of incorporation, business licenses, partnership agreements or trust documents may be required for sales by corporations, partnerships, trusts, fiduciaries, executors or administrators.

Telephone Transactions. You must elect the option on the Account Application to have the right to sell your shares by telephone. If you wish to make an election to have the right to sell your shares via telephone or to change such an election after opening an account, you will need to complete an Account Privileges Change Form with a signature guarantee. Sales via telephone are not available for shares in certificate form.

If you have elected the option to sell your Fund shares by telephone, you may direct that a check for the proceeds payable to the shareholder of record be mailed to the address of record or you may designate a bank account to receive the proceeds of such redemptions. There is a \$3.50 charge per wire. No telephone redemptions to the address of record will be processed within 30 days of a change in the address of record.

UMB Fund Services, Inc. uses procedures it considers reasonable to confirm redemption instructions via telephone, including requiring account registration verification from the caller and recording telephone instructions. Neither UMB Fund Services, Inc. nor the Fund is liable for losses due to unauthorized or fraudulent instructions if there is a reasonable belief in the authenticity of received instructions and reasonable procedures are employed. During periods of significant economic or market changes, it may be difficult to sell your shares by telephone.

The Fund can change or discontinue telephone redemption privileges without notice.

Automatic Redemption (Sale) of Your Shares. If as a result of a redemption, your account value falls below \$500, the Fund can direct UMB Fund Services, Inc. to redeem your remaining Fund shares. In such case, you will be notified in writing that your account value is insufficient and be given up to 60 days to increase it to \$500.

Escheatment. If your account is deemed “abandoned” or “unclaimed” under state law, the Fund may be required to “escheat” or transfer the assets in your account to the applicable state’s unclaimed property administration. The state may sell escheated Fund shares and, if you subsequently seek to reclaim your proceeds of liquidation from the state, you may only be able to recover the amount received when the shares were sold. Escheatment rules vary considerably by state. Please check your state’s unclaimed or abandoned property department website for specific information. It is your responsibility to ensure that you maintain a correct address for your account, keep your account active, and promptly cash all checks for dividends, capital gains and redemptions. Neither the Fund, the Fund’s transfer agent, the Fund’s distributor nor the Adviser or its affiliates will be liable to shareholders or their representatives for good faith compliance with state escheatment laws. Escheatment of an IRA account will be subject to 10% federal withholding tax and treated as a taxable distribution to you.

Excessive Trading and Market Timing. The Fund is not intended as a vehicle for frequent trading and/or market timing in an attempt to profit from short-term fluctuations in the securities markets and does not accommodate frequent trading. The Board has adopted policies and procedures designed to deter or prevent frequent purchases and redemptions. Such trading could interfere with the efficient management of the Fund’s portfolio, increase brokerage and administrative costs, and dilute the value of Fund shares held by long-term investors. In addition, exchanges between this Fund and the other FPA Funds are limited to no more than four exchanges during any calendar year (see the section titled “How to Exchange Your Shares”). Irrespective of exchange limits, the Fund reserves the right to reject any purchase request (including in connection with an exchange) if management determines in its discretion that the request may be part of a pattern of excessive trading that could adversely affect the Fund. Notifications will be made in writing by the Fund within five days. There can be no assurance that the Fund will successfully detect or prevent market timing.

HOW TO EXCHANGE YOUR SHARES

You can add to an existing FPA Fund account or start a new FPA Fund account by exchanging your shares of the Fund for shares of the FPA Crescent Fund, FPA Flexible Fixed Income Fund, FPA Queens Road Small Cap Value Fund, and FPA Queens Road Value Fund, which are offered in separate prospectuses.

The Fund can change or discontinue the right to exchange Fund shares into the FPA Crescent Fund, FPA Flexible Fixed Income Fund, FPA Queens Road Small Cap Value Fund, and FPA Queens Road Value Fund upon 60 days' notice to shareholders.

You can exercise your exchange privileges either by written instructions or telephone (telephone exchange privileges are available unless you specifically decline them on the Account Application).

Exchanges and purchases are effected at the share price next determined after receipt of a proper request (as described above under "Written Requests") by UMB Fund Services, Inc.

For federal income tax purposes, an exchange is treated as a sale of Fund shares and could result in a capital gain or loss.

Exchanges are subject to the following restrictions:

- You are limited to four exchanges in one account during any calendar year;
- Shares must be owned 15 days before exchanging, and cannot be in certificate form unless you deliver the certificate when you request the exchange;
- An exchange is subject to the same initial investment minimums required for each particular FPA Fund and, at a minimum, requires the purchase of shares with a value of at least \$1,000; and
- Exchanges are subject to the same signature and signature guarantee requirements applicable to the redemption of shares.

Converting Shares

You may be eligible for share conversion between the Institutional Class or Investor Class shares of the Fund, subject to the discretion of the Fund to permit or reject such a conversion. Please contact your financial intermediary, UMB Fund Services, Inc., or the Fund for information related to share class conversions.

A conversion between share classes of the Fund is generally expected to be a nontaxable event.

If you convert from one class of shares to another, the transaction will be based on the respective NAVs of the two classes on the trade date for the conversion. Consequently, a conversion may provide you with fewer shares or more shares than you originally owned, depending on that day's

NAV. At the time of conversion, the total dollar value of your “old” shares will equal the total dollar value of your “new” shares. However, subsequent share price fluctuations may decrease or increase the total dollar value of your “new” shares compared with that of your “old” shares.

For more information or for prospectuses for other FPA Funds, please visit <https://fpa.com/funds> or contact a dealer or Distribution Services, LLC. You should read the prospectuses of these other Funds and consider differences in objectives and policies before making any exchange.

OTHER SHAREHOLDER SERVICES

Investment Account. Each shareholder has an investment account in which UMB Fund Services, Inc. holds Fund shares. You will receive a statement showing account activity after each transaction. Stock certificates will not be issued.

In-Kind Transactions. Subject to procedures adopted by the Fund’s Board and at the Fund’s sole discretion, you may pay for shares of the Fund with securities instead of cash.

The Fund has agreed to redeem shares, with respect to any one shareholder of record during any 90-day period, solely in cash up to the lesser of \$250,000 or 1% of the net asset value of the Fund at the beginning of the period. Pursuant to procedures adopted by the Fund’s Board, the Fund reserves the right in its sole discretion to honor any redemption request in excess of the foregoing limits by making payment in whole or in part in readily marketable securities chosen by the Fund and valued as such securities are valued for purposes of computing the Fund’s net asset value. If payment is made in securities, a shareholder may incur transaction expenses in converting those securities to cash, may realize, upon receipt, a gain or loss for tax purposes, and will be exposed to market risk prior to and upon the sale of such securities or other property.

Pre-Authorized Investment Plan. You may establish an account with a \$100 minimum initial investment and the establishment of automatic monthly investments of at least \$100. To make automatic monthly investments, you must complete the Account Application available from dealers or Distribution Services, LLC. UMB Fund Services, Inc. will withdraw funds from your bank account monthly for \$100 or more as specified through the Automated Clearing House.

Retirement Plans. A retirement plan account and/or an IRA can purchase shares by contacting any investment dealer authorized to sell the Fund’s shares. Investments can be made directly to UMB Fund Services, Inc., and no minimum investment amount is imposed for investments in retirement plans. UMB Fund Services, Inc. currently charges an annual account maintenance fee of \$15 on retirement accounts. All purchases made by check should be in U.S. dollars and made payable to the FPA Funds. Third party, starter or counter checks will not be accepted. A charge may be imposed if a check does not clear. Please note that financial intermediaries may impose their own minimum investment and subsequent purchase amounts.

You should consult your tax adviser about the implications of investing in Fund shares through a retirement account. Persons with earned income ineligible for deductible contributions generally may make non-deductible contributions to an IRA. The earnings on shares held in an IRA are generally tax-deferred. In addition, although contributions to a Roth IRA are not deductible,

earnings in the account generally are not taxed even on withdrawal. Retirement-related tax matters are complicated and you should consult your tax adviser about them. Distribution Services, LLC and dealers have applicable forms and information regarding plan administration, custodial fees and other plan documents.

Systematic Withdrawal Plan. If you have an account with a value of \$10,000 or more, you can make monthly, quarterly, semi-annual or annual withdrawals of \$50 or more by electing this option on the Account Privileges Change Form. Under this arrangement, sufficient Fund shares will be sold to cover the withdrawals and the proceeds will be forwarded to you as directed on the Account Privileges Change Form. If withdrawals continually exceed reinvestments, your account will be reduced and ultimately exhausted. Please note that concurrent withdrawals and purchases are ordinarily not in your best interest and you will generally recognize any taxable gains or losses on the withdrawals.

Shareholder Servicing Arrangements and Shareholder Service Fees. Brokers, dealers, banks, trust companies and other financial representatives (each, a “Service Organization”) may receive compensation from the Fund or its service providers for providing a variety of services. This section briefly describes how Service Organizations may be compensated.

For providing certain services to their clients, a Service Organization may be paid a fee based on the assets or number of accounts of the Fund that are attributable to the Service Organization. These non-distribution administrative and support services may include establishing and maintaining accounts and records relating to shareholders, processing dividend and distribution payments from the Fund on behalf of shareholders, forwarding communications from the Fund, providing sub-accounting with respect to Fund shares, and other similar services. In addition, your Service Organization may charge you other account fees for buying or redeeming shares of the Fund or for servicing your account. Your Service Organization should provide you with a schedule of its fees and services.

Pursuant to the Shareholder Service Plan adopted by the Board, on behalf of the Fund, the Fund may pay a fee at an annual rate of up to 0.10% and 0.25% of its average daily net assets attributable to Institutional Class and Investor Class shares, respectively, to Service Organizations. The Fund does not pay these service fees on shares purchased directly. In addition, the Adviser may, at its own expense, pay a Service Organization for these services.

Distribution Services, LLC, the Fund’s principal underwriter, may enter into agreements with selling dealers where the selling dealer waives its right to shareholder servicing fees for selling Fund shares or servicing shareholder accounts. These arrangements typically are intended to avoid duplicate payment of fees where the selling dealer’s transactions are through an omnibus account with a different clearing broker and that broker is entitled to receive shareholder servicing fees from the Fund.

The Adviser may, at its own expense and out of its own resources, pay financial representatives for distribution and marketing services performed with respect to the Fund. These payments by the Adviser may include one or more of the following types of payments: one-time account establishment fees, annual per-account fees and/or annual asset-based charges. These payments

may create a conflict of interest by influencing the broker or financial intermediary and your salesperson to recommend the Fund over another investment. For more information, ask your salesperson or visit your financial intermediary's website.

DISTRIBUTIONS AND TAXES

Distributions

The Fund earns income from its investments and distributes that income, if and to the extent it exceeds expenses, to its shareholders as dividends. The Fund also realizes capital gains and losses from the sale or exchange of its investments and distributes any net capital gains to its shareholders as capital gain distributions (as used in this section, together with income dividends, "distributions"). The Fund distributes income dividends monthly and other distributions, if any, at least annually.

Distributions the Fund pays may be reinvested automatically in Fund shares at net asset value or taken in cash. If your account is held directly with the Fund and you would like to receive distributions in cash, contact UMB Fund Services, Inc. at 800-638-3060. If your account is with a securities dealer or other financial intermediary that has an agreement with the Fund, contact your dealer or intermediary about which option you prefer.

Taxes

Except for tax-advantaged retirement plans and accounts and other tax-exempt investors, all Fund distributions you receive generally are subject to federal income tax, whether you receive them in cash or reinvest them in additional shares. Fund distributions to IRAs (including Roth IRAs) and qualified retirement plans generally are tax-free, but may be taxable upon later distribution from such accounts.

Distributions of net investment income, the excess of net short-term capital gain over net long-term capital loss, and net gains (if any) from certain non-U.S. currency transactions (*i.e.*, "dividends") are generally taxed as ordinary income. The Fund's dividends attributable to "qualified dividend income" (generally, dividends it receives on stock of most U.S. and certain non-U.S. corporations with respect to which the Fund satisfies certain holding period and other restrictions) are subject to federal income tax for individual and certain other non-corporate shareholders (each, an "individual shareholder") who satisfy those restrictions with respect to their Fund shares at the rates for long-term capital gains—a maximum of 15% or 20%, depending on whether the individual shareholder's income exceeds certain threshold amounts. Given the Fund's investment strategies, it is not expected that a significant portion of the dividends paid by the Fund will be eligible to be designated as qualified dividend income.

Distributions of net capital gain (*i.e.*, the excess of net long-term capital gain over net short-term capital loss) are generally taxed as long-term capital gain and, for individual shareholders, are subject to the 15% or 20% maximum federal income tax rates mentioned above. The tax treatment of capital gain distributions from the Fund depends on how long the Fund held the securities it sold that generated the gain, not when you bought your Fund shares or whether you reinvested your distributions.

Fund distributions generally are taxable to you in the year you receive them. In some cases, however, distributions you receive in January are taxable as if they had been paid the previous December 31.

When you sell (redeem) Fund shares, including pursuant to an exchange, you generally will realize a taxable gain or loss. An exception, once again, applies to tax-advantaged retirement plans and accounts and other tax-exempt investors. Any capital gain that an individual shareholder recognizes on a redemption of their Fund shares that have been held for more than one year will qualify for the 15% or 20% maximum federal income tax rates mentioned above.

The federal income tax you actually owe on Fund distributions and share transactions can vary with many factors, such as your marginal tax bracket, how long you held your shares and whether you owe federal alternative minimum tax. Shortly after the end of each calendar year, the Fund will send you a tax statement that will detail the distributions you received during that year and will show their tax status. This may be separate from the statement that covers your share transactions. Most importantly, consult your tax professional. Everyone's tax situation is different, and your tax professional should be able to help you answer any questions you may have.

The Fund is required to withhold 24% of the money you are otherwise entitled to receive from its distributions and redemption proceeds (regardless of whether you realize a gain or loss) if you are an individual shareholder who fails to provide a correct taxpayer identification number to the Fund (together with the withholding described in the next sentence, "backup withholding"). Withholding at that rate also is required from the Fund's distributions to which you are otherwise entitled if you are such a shareholder and the Internal Revenue Service (the "IRS") tells the Fund that you are subject to backup withholding or you are subject to backup withholding for any other reason. Backup withholding is not an additional tax, and any amounts so withheld may be credited against a shareholder's federal income tax liability or refunded.

If you buy shares when the Fund has earned or realized, but not yet distributed, ordinary income or net capital gains, you will be "buying a dividend" by paying the full price of the shares and then receiving a portion of the price back in the form of a taxable distribution. You can avoid this situation by waiting to invest until after the record date for the distribution.

Distributions are taxable to you even if they are paid from income or gain earned by the Fund before your investment (and thus were included in the price you paid for your Fund shares).

The amounts of the Fund's distributions are driven by federal tax requirements. The Fund's required taxable distributions to shareholders may be significant even if the Fund's overall performance for the period is negative.

Generally, if you are investing in the Fund through a tax-advantaged retirement plan or account, distributions paid by the Fund are not taxable to you on a current basis (but may be taxable upon withdrawal from such plan or account).

An individual is required to pay a 3.8% tax on the lesser of (1) the individual's "net investment income," which generally includes distributions the Fund pays and net gains realized on the

redemption or exchange of Fund shares, or (2) the excess of the individual’s “modified adjusted gross income” over a threshold amount (\$250,000 for married persons filing jointly and \$200,000 for single taxpayers). This tax is in addition to any other taxes due on that income. A similar tax applies to estates and trusts. Shareholders should consult their own tax advisers regarding the effect, if any, this provision may have on their investment in Fund shares.

A Fund shareholder’s basis in Fund shares acquired after December 31, 2011 (“Covered Shares”), will be determined in accordance with the Fund’s default method, which is HIFL (highest in, first long-term) basis, unless the shareholder affirmatively elects in writing (which may be electronic) to use the average basis method or a different acceptable basis determination method (e.g., a specific identification method). The method a Fund shareholder elects (or the default method) may not be changed with respect to a redemption of Covered Shares after the settlement date of the redemption.

In addition to the requirement to report the gross proceeds from the redemption of shares, the Fund (or its administrative agent) must report to the IRS and furnish to its shareholders the basis information for Covered Shares and indicate whether they had a short-term (one year or less) or long-term (more than one year) holding period. Fund shareholders should consult with their tax advisers to determine the best IRS-accepted basis method for their tax situation and to obtain more information about how the basis reporting law applies to them.

Shareholders other than U.S. persons may be subject to a different U.S. federal income tax treatment, including withholding tax at the rate of 30% on amounts treated as ordinary dividends from the Fund, as discussed in more detail in the SAI.

This section summarizes some of the consequences under current federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. **Consult your tax adviser about the potential tax consequences of an investment in the Fund under all applicable tax laws.**

FINANCIAL HIGHLIGHTS

The Fund's Financial Highlights for the fiscal year ended September 30, 2025, are incorporated in this Prospectus by reference to the Fund's Annual Financials and Other Information, which are included as part of the Fund's most recent Form N-CSR filing, which can be located on the SEC's website and is available upon request (see back cover).

OTHER FUND INFORMATION**Shareholders Reports and Financials and Other Information**

Additional information about the Fund's investments is available in the Fund's annual and semi-annual reports to shareholders and the Fund's Financials and Other Information, which are each included in the Fund's Form N-CSR filings. In the Fund's annual report, you will find a discussion of the market conditions and other key factors that significantly affected the Fund's performance during its most recent fiscal year. In the Fund's Financials and Other Information, you will find the Fund's annual and semi-annual financial statements.

Statement of Additional Information (SAI)

The SAI provides additional details about the investments and techniques of the Fund and certain other additional information. The SAI is on file with the SEC and is incorporated into this Prospectus by reference. This means that the SAI is legally considered a part of this Prospectus even though it is not physically within this Prospectus.

Shareholder reports and other information about the Fund (including the SAI) are available without charge, upon request, by calling Distribution Services, LLC at (800) 638-3060 and on the EDGAR database on the SEC's Web Site at <https://www.sec.gov>, and copies of this information may be obtained, upon payment of a duplicating fee, by electronic request at publicinfo@sec.gov.

For more information, to request a free copy of any of the documents above or to discuss any questions about the Fund you may contact Distribution Services, LLC at Three Canal Plaza, Suite 100, Portland, Maine 04101, or (800) 638-3060, or go to <https://fpa.com/fund>.

Investment Company Act No. 811-08544
