Management’s Discussion of Fund Performance

HOW DID THE FUND PERFORM OVER THE REPORTING PERIOD?

For the twelve-month period ending September 30, 2025, the FPA New Income Fund’s Investor Class (“Fund”) net return was 4.93%, which includes reinvestment of all distributions.

WHAT AFFECTED THE FUND’S PERFORMANCE?

During the 12 months ending September 30, 2025, Treasury yields decreased for maturities up to two years, driven by cuts to the Fed Funds rate and expectations of further cuts. Treasury yields for maturities greater than two years increased over the 12 months ending September 30, 2025. Spreads on investment grade and high yield rated debt decreased. Due to low spreads, we largely focused on buying longer-duration, High Quality bonds (rated single-A or higher) we believe will enhance both the Fund’s long-term returns and short-term upside-versus-downside return profile. Over the past 12 months, the Fund’s duration has increased from 3.2 years to 3.3 years. We seek to opportunistically invest in Credit when we believe prices adequately compensate for the risk of permanent impairment of capital and near-term mark-to-market risk. The Fund’s exposure to investments rated BBB or lower decreased as decreasing spreads in that part of the market generally made these investments unattractive.

FUND PERFORMANCE CAN BE ATTRIBUTED TO THE FOLLOWING:^[1]

The largest contributors to performance during the 12 months ending September 30, 2025:

- Agency-guaranteed residential mortgage pools
- Corporates
- Asset-backed securities (ABS) backed by equipment

The only detractor from performance was ABS backed by credit card receivables (part of ABS Other sector). While there were individual investments that detracted from performance during the fiscal year, there were no other meaningful detractors from performance at the sector level.

Fund Performance

The following graph and chart compare the initial and subsequent account values at the end of each of the most recently completed 10 fiscal years of the Fund, or for the life of the Fund, if shorter. It assumes a \$10,000 initial investment at the beginning of the first fiscal year in an appropriate, broad-based securities market index for the same period.

GROWTH OF \$10,000

AVERAGE ANNUAL TOTAL RETURN	1 Year	5 Years	10 Years
FPA New Income Fund (Investor Class/FPNRX) ¹	4.93%	3.15%	2.79%
Bloomberg US Aggregate Bond Index	2.88%	-0.45%	1.84%
Consumer Price Index Seasonally Adjusted + 100 bps	4.11%	5.58%	4.20%

¹ Investor Class commenced operations on April 30, 2024. The performance figures for Investor Class shares include the performance for the Institutional Class shares for the periods prior to the inception date of Investor Class shares, adjusted for the difference in Institutional Class shares and Investor Class shares expenses. Investor Class shares impose higher expenses than Institutional Class shares. Since Investor Class shares have higher expenses and are therefore more expensive than Institutional Class shares, the returns for Investor Class shares will be lower than the returns shown for Institutional Class shares.

Keep in mind that the Fund's past performance is not a good predictor of how the Fund will perform in the future.

The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.
