Distributions may include the net income from dividends and interest earned by fund securities, net capital gains, or in certain cases it may include a return of capital. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. All mutual funds, including closed-end funds, periodically distribute profits they earn to investors. By law, if a fund has net gains from the sale of securities, or if it earns dividends and interest from securities, it must pass substantially all of those earnings to its shareholders or it will be subject to corporate income taxes and excise taxes. These taxes would, in effect, reduce investors' total return.
